The National Center for Education Statistics (NCES) is the primary federal entity for collecting, analyzing, and reporting data related to education in the United States and other nations. It fulfills a congressional mandate to collect, collate, analyze, and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist state and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

NCES activities are designed to address high-priority education data needs; provide consistent, reliable, complete, and accurate indicators of education status and trends; and report timely, useful, and high-quality data to the U.S. Department of Education, the Congress, the states, other education policymakers, practitioners, data users, and the general public. Unless specifically noted, all information contained herein is in the public domain.

We strive to make our products available in a variety of formats and in language that is appropriate to a variety of audiences. You, as our customer, are the best judge of our success in communicating information effectively. If you have any comments or suggestions about this or any other NCES product or report, we would like to hear from you. Please direct your comments to

FOREWORD

The 2009 edition of the *Digest of Education Statistics* is the 45th in a series of publications initiated in 1962. The *Digest* has been issued annually except for combined editions for the years 1977–78, 1983–84, and 1985–86. Its primary purpose is to provide a compilation of statistical information covering the broad field of American education from prekindergarten through graduate school. The *Digest* includes a selection of data from many sources, both government and private, and draws especially on the results of surveys and activities carried out by the National Center for Education Statistics (NCES). To qualify for inclusion in the *Digest*, material must be nationwide in scope and of current interest and value. The publication contains information on a variety of subjects in the field of education statistics, including the number of schools and colleges, teachers, enrollments, and graduates, in addition to data on educational attainment, finances, federal funds for education, libraries, and international comparisons. Supplemental information on population trends, attitudes on education, education characteristics of the labor force, government finances, and economic trends provides background for evaluating education data. Although the *Digest* contains important information on federal education funding, more detailed information on federal activities is available from federal education program offices.

The *Digest* contains seven chapters: All Levels of Education, Elementary and Secondary Education, Postsecondary Education, Federal Programs for Education and Related Activities, Outcomes of Education, International Comparisons of Education, and Libraries and Educational Technology. Preceding these chapters is an Introduction that provides a brief overview of current trends in American education, which supplements the tabular materials in chapters 1 through 7. The *Digest* concludes with three appendixes. The first appendix, Guide to Sources, provides a brief synopsis of the surveys used to generate the *Digest* tables; the second, Definitions, is included to help readers understand terms used in the *Digest*; and the third, Index of Table Numbers, allows readers to quickly locate tables on specific topics.

In addition to updating many of the statistics that have appeared in previous years, this edition contains new material, including

- 4th- and 8th-grade public school students' average reading scale scores and selected reading achievement-level results, by specific urban district and race/ethnicity (table 122);
- 4th- and 8th-grade public school students' average reading scale scores and selected reading achievement-level results, by English language learner (ELL) status and state or jurisdiction (table 124);
- average arts scale score of 8th-graders, percentage distribution by frequency of instruction, and percentage participating in selected activities, by subject and selected student and school characteristics (table 126);
- 4th- and 8th-grade public school students' average mathematics scale scores and selected mathematics achievement-level results, by specific urban district and race/ethnicity (table 137);
- number of U.S. students studying abroad and percentage distribution, by sex, race/ethnicity, academic level, host region, and duration of stay (table 225);
- certificates conferred by postsecondary institutions participating in Title IV programs, by race/ethnicity and sex of student (table 281); and
- graduation rates of first-time postsecondary students who started as full-time degree-seeking students, by sex, race/ethnicity, time between starting and graduating, and level and control of institution where student started (table 331).

The *Digest* can be accessed from http://nces.ed.gov/programs/digest.

List of Figures

Figure		Page
1.	The structure of education in the United States	11
2.	Enrollment, total expenditures in constant dollars, and expenditures as a percentage of the gross domestic product (GDP), by level of education: Selected years, 1965–66 through 2008–09	12
3.	Percentage of persons 25 years old and over, by highest level of educational attainment: Selected years, 1940 through 2009	13
4.	Percentage of persons 25 through 29 years old, by highest level of educational attainment: Selected years, 1940 through 2009	13
5.	Highest level of education attained by persons 25 years old and over: March 2009	14
6.	Enrollment, number of teachers, pupil/teacher ratio, and expenditures in public schools: 1960–61 through 2007–08	60
7.	Total and full-day preprimary enrollment of 3- to 5-year-olds: October 1970 through October 2008	61
8.	Percentage change in public elementary and secondary enrollment, by state: Fall 2000 to fall 2007	61
9.	Percentage of revenue for public elementary and secondary schools, by source of funds: 1970–71 through 2006–07	62
10.	Current expenditure per pupil in fall enrollment in public elementary and secondary schools: 1970–71 through 2006–07	62
11.	Enrollment, degrees conferred, and expenditures in degree-granting institutions: Fall 1960 through fall 2008 and 1960–61 through 2007–08	273
12.	Percentage change in total enrollment in degree-granting institutions, by state: Fall 2000 through fall 2007	274
13.	Enrollment in degree-granting institutions, by age: Fall 1970 through fall 2018	274
14.	Full-time-equivalent (FTE) students per staff member in public and private degree-granting institutions, by type of staff: 1976 and 2007	275
15.	Bachelor's degrees conferred by degree-granting institutions in selected fields of study: 1997–98, 2002–03, and 2007–08	275
16.	Percentage distribution of total revenues of public degree-granting institutions, by source of funds: 2006–07	276
17.	Percentage distribution of total revenues of private not-for-profit degree-granting institutions, by source of funds: 2006–07	276
18.	Federal on-budget funds for education, by level or other educational purpose: Selected years, 1965 through 2009	535
19.	Percentage of federal on-budget funds for education, by agency: Fiscal year 2008	536
20.	Department of Education outlays, by type of recipient: Fiscal year 2009	536
21.	Labor force participation rate of persons 20 to 64 years old, by age group and highest level of education: 2008	554
22.	Unemployment rates of persons 25 years old and over, by highest level of education: 2008	555
23.	Labor force status of 2007–08 high school dropouts and completers not enrolled in college: October 2008	555
24.	Median annual earnings of persons 25 years old and over, by highest level of education and sex: 2008	556
25.	Average salaries of bachelor's degree recipients 1 year after graduation, by field: 1981, 1991, and 2001	556
26.	Percentage change in enrollment, by selected areas of the world and level of education: 2000 to 2007	580
27.	Bachelor's degree recipients as a percentage of the population of the typical ages of graduation, by country: 2006	581
28.	Public direct expenditures on education as a percentage of the gross domestic product (GDP), by country: 2006	581
29.	Percentage of all public schools and instructional rooms with internet access: Selected years, fall 1994 through fall 2005	606

List of Text Tables

Table		Page
A.	Total elementary and secondary school enrollment, by overall trends: Selected years, 1949–50 to fall 2008	10
B.	Number of public school staff, by selected categories: 1969–70, 1980, and 2007	56
C.	Postsecondary students denied access to Title IV financial aid because eligibility was suspended due to a drug-related conviction: 2008–09	272
D.	Federal on-budget funding for education, by category: Selected fiscal years, 1965 through 2008	527
E.	Median annual earnings of full-time year-round workers 25 years old and over, by selected levels of educational attainment and sex: Selected years, 1995 through 2008	554
F.	Population and enrollment at different levels in major areas of the world: 2000 and 2007	578

List of Reference Tables

Chapter 1. All Levels of Education

Enrollment, Teachers, and Schools

Table		Page
1.	Projected number of participants in educational institutions, by level and control of institution: Fall 2009	15
2.	Enrollment in educational institutions, by level and control of institution: Selected years, fall 1980 through fall 2009	15
3.	Enrollment in educational institutions, by level and control of institution: Selected years, 1869–70 through fall 2018	16
4.	Number of teachers in elementary and secondary schools, and instructional staff in postsecondary degree-granting institutions, by control of institution: Selected years, fall 1970 through fall 2018	18
5.	Number of educational institutions, by level and control of institution: Selected years, 1980–81 through 2007–08	19

Enrollment Rates

6.	Percentage of the population 3 to 34 years old enrolled in school, by sex, race/ethnicity, and age: Selected years, 1980 through 2008	20
7.	Percentage of the population 3 to 34 years old enrolled in school, by age group: Selected years, 1940 through 2008	22

Educational Attainment

8.	Percentage of persons age 25 and over and 25 to 29, by race/ethnicity, years of school completed, and sex: Selected years, 1910 through 2009	24
9.	Number of persons age 18 and over, by highest level of education attained, age, sex, and race/ethnicity: 2009	26
10.	Persons age 18 and over who hold at least a bachelor's degree in specific fields of study, by sex, race/ethnicity, and age: 2001	27
11.	Educational attainment of persons 18 years old and over, by state: 2000 and 2005–07	28
12.	Educational attainment of persons 25 years old and over, by race/ethnicity and state: 2005–07	29
13.	Educational attainment of persons 25 years old and over, by sex and state: 2005–07	31
14.	Educational attainment of persons 25 years old and over for metropolitan areas with more than 1 million persons, by sex: 2009	32

Population

15.	Estimates of resident population, by age group: 1970 through 2009	33
16.	Estimates of resident population, by race/ethnicity and age group: Selected years, 1980 through 2009	34
17.	Estimated total and school-age resident populations, by state: Selected years, 1970 through 2008	35

Characteristics of Families With Children

18.	Number and percentage distribution of family households, by family structure and presence of own children under 18: Selected years, 1970 through 2008	36
19.	Number and percentage of family households with own children under 18, by age and number of children, race/ethnicity, and family structure: 2008	37

20. Household income, population poverty rates, and poverty status of 5- to 17-year-olds, by state: 1990, 2000, and 2006–08 38
21. Poverty status of all persons, persons in families, and related children under age 18, by race/ethnicity: Selected years, 1959 through 2008 40

Opinions on and Parent Involvement in Education

22. Average grade that the public would give the public schools in their community and in the nation at large: 1974 through 2009 43
23. Percentage of elementary and secondary school children whose parents were involved in school activities, by selected child, parent, and school characteristics: 1999, 2003, and 2007 44
24. Percentage of kindergartners through fifth-graders whose parents reported doing education-related activities with their children in the past month, by selected child, parent, and school characteristics: 1999, 2003, and 2007 45
25. Percentage of kindergartners through fifth-graders whose parents reported doing various activities with their children in the past week, by selected child, parent, and school characteristics: 1999, 2003, and 2007 46

Finances

26. Expenditures of educational institutions related to the gross domestic product, by level of institution: Selected years, 1929–30 through 2008–09 47
27. Expenditures of educational institutions, by level and control of institution: Selected years, 1899–1900 through 2008–09 48
28. Amount and percentage distribution of direct general expenditures of state and local governments, by function: Selected years, 1970–71 through 2005–06 49
29. Direct general expenditures of state and local governments for all functions and for education, by level of education and state: 2005–06 50
30. Direct general expenditures per capita of state and local governments for all functions and for education, by level of education and state: 2005–06 51
31. Gross domestic product, state and local expenditures, personal income, disposable personal income, median family income, and population: Selected years, 1929 through 2008 52
32. Gross domestic product price index, Consumer Price Index, education price indexes, and federal budget composite deflator: Selected years, 1919 through 2008 53

Chapter 2. Elementary and Secondary Education

Enrollment

33. Historical summary of public elementary and secondary school statistics: Selected years, 1869–70 through 2006–07 63
34. Enrollment in public elementary and secondary schools, by state or jurisdiction: Selected years, fall 1990 through fall 2009 65
35. Enrollment in public elementary and secondary schools, by level, grade, and state or jurisdiction: Fall 2007 67
36. Enrollment in public elementary and secondary schools, by level, grade, and state or jurisdiction: Fall 2006 69
37. Enrollment in public elementary and secondary schools, by grade: Selected years, fall 1980 through fall 2007 71
38. Number and percentage of homeschooled students ages 5 through 17 with a grade equivalent of kindergarten through 12th grade, by selected child, parent, and household characteristics: 1999, 2003, and 2007 72
39. Percentage distribution of students ages 5 through 17 attending kindergarten through 12th grade, by school type or participation in homeschooling and selected child, parent, and household characteristics: 1999, 2003, and 2007 73

40. Average daily attendance in public elementary and secondary schools, by state or jurisdiction: Selected years, 1969–70 through 2006–07 74
41. Percentage distribution of enrollment in public elementary and secondary schools, by race/ethnicity and state or jurisdiction: Fall 1997 and fall 2007 75
42. Number and percentage of public school students eligible for free or reduced-price lunch, by state: 2000–01, 2005–06, 2006–07, and 2007–08 76
43. Enrollment of 3-, 4-, and 5-year-old children in preprimary programs, by level of program, control of program, and attendance status: Selected years, 1965 through 2008 77
44. Number of children under 6 years old and not yet enrolled in kindergarten, percentage in center-based programs, average weekly hours in nonparental care, and percentage in various types of primary care arrangements, by selected child and family characteristics: 2005 78
45. Child care arrangements of 3- to 5-year-old children who are not yet in kindergarten, by age and race/ethnicity: Various years, 1991 through 2005 79
46. Percentage distribution of children at about 2 and 4 years of age, by type of child care arrangement and selected child and family characteristics: 2003–04 and 2005–06 80
47. Percentage distribution of quality rating of child care arrangements of children at about 4 years of age, by type of arrangement and selected child and family characteristics: 2005–06 81
48. Children of prekindergarten through second-grade age, by enrollment status, selected maternal characteristics, and household income: 1995, 2001, and 2005 82
49. Number of 3- to 5-year-olds not yet enrolled in kindergarten and percentage participating in home literacy activities with a family member, by type and frequency of activity and selected child and family characteristics: 1993, 2001, and 2007 83
50. Children 3 to 21 years old served under Individuals with Disabilities Education Act, Part B, by type of disability: Selected years, 1976–77 through 2007–08 84
51. Percentage distribution of students 6 to 21 years old served under Individuals with Disabilities Education Act, Part B, by educational environment and type of disability: Selected years, fall 1989 through fall 2007 85
52. Number and percentage of children served under Individuals with Disabilities Education Act, Part B, by age group and state or jurisdiction: Selected years, 1990–91 through 2007–08 86
53. Number of gifted and talented students in public elementary and secondary schools, by sex, race/ethnicity, and state: 2004 and 2006 87
54. Percentage of gifted and talented students in public elementary and secondary schools, by sex, race/ethnicity, and state: 2004 and 2006 88
55. Enrollment in grades 9 through 12 in public and private schools compared with population 14 to 17 years of age: Selected years, 1889–90 through fall 2009 89
56. Enrollment in foreign language courses compared with enrollment in grades 9 through 12 in public secondary schools: Selected years, fall 1948 through fall 2000 90
57. Percentage of public school districts and schools with students enrolled in technology-based distance education courses and number of enrollments in such courses, by instructional level and district characteristics: 2002–03 and 2004–05 91

Private Elementary and Secondary Schools

58. Number and percentage distribution of private elementary and secondary students, teachers, and schools, by orientation of school and selected school and student characteristics: Fall 2007. . . . 92
59. Private elementary and secondary enrollment, number of schools, and average tuition, by school level, orientation, and tuition: 1999–2000, 2003–04, and 2007–08 93
60. Private elementary and secondary school full-time-equivalent staff and student to full-time-equivalent staff ratios, by orientation of school, school level, and type of staff: 2007–08 94
61. Enrollment and instructional staff in Catholic elementary and secondary schools, by level: Selected years, 1919–20 through 2008–09 96
62. Private elementary and secondary schools, enrollment, teachers, and high school graduates, by state: Selected years, 1997 through 2007 97

Teachers and Other Staff

63. Public elementary and secondary pupil/teacher ratios, by enrollment school size, type, percentage of students eligible for free or reduced-price lunch, locale, and level of school: Fall 1987 through fall 2007 98
64. Public and private elementary and secondary teachers, enrollment, and pupil/teacher ratios: Selected years, fall 1955 through fall 2018 100
65. Public elementary and secondary teachers, by level and state or jurisdiction: Selected years, fall 2000 through fall 2007 101
66. Teachers, enrollment, and pupil/teacher ratios in public elementary and secondary schools, by state or jurisdiction: Selected years, fall 2000 through fall 2007 102
67. Highest degree earned, years of full-time teaching experience, and average class size for teachers in public elementary and secondary schools, by state: 2007–08 103
68. Highest degree earned and years of full-time teaching experience for teachers in public and private elementary and secondary schools, by selected teacher characteristics: 1999–2000, 2003–04, and 2007–08 104
69. Selected characteristics of public school teachers: Selected years, spring 1961 through spring 2001 106
70. Percentage of public school teachers of grades 9 through 12, by field of main teaching assignment and selected demographic and educational characteristics: 2007–08 107
71. Percentage of teachers indicating that certain issues are serious problems in their schools and that certain problems occur daily, by level and control of school: Selected years 1987–88 through 2007–08 108
72. Teachers' perceptions about teaching and school conditions, by control and level of school: Selected years, 1993–94 through 2007–08 109
73. Mobility of public and private elementary and secondary teachers, by selected teacher and school characteristics: Selected years, 1987–88 through 2004–05 110
74. Average base salary for full-time teachers in public elementary and secondary schools, by highest degree earned and years of full-time teaching: Selected years, 1990–91 through 2007–08 111
75. Average salaries for full-time teachers in public and private elementary and secondary schools, by selected characteristics: 2007–08 113
76. Average base salary for full-time public elementary and secondary school teachers with a bachelor's degree as their highest degree, by years of full-time teaching experience and state: 1993–94, 1999–2000, 2003–04, and 2007–08 115
77. Average base salary for full-time public elementary and secondary school teachers with a master's degree as their highest degree, by years of full-time teaching experience and state: 1993–94, 1999–2000, 2003–04, and 2007–08 116
78. Estimated average annual salary of teachers in public elementary and secondary schools: Selected years, 1959–60 through 2008–09 117
79. Estimated average annual salary of teachers in public elementary and secondary schools, by state or jurisdiction: Selected years, 1969–70 through 2008–09 118
80. Staff employed in public elementary and secondary school systems, by functional area: Selected years, 1949–50 through fall 2007 119
81. Staff employed in public elementary and secondary school systems, by type of assignment and state or jurisdiction: Fall 2007 120
82. Staff employed in public elementary and secondary school systems, by type of assignment and state or jurisdiction: Fall 2006 121
83. Staff and teachers in public elementary and secondary school systems, by state or jurisdiction: Fall 2000 through fall 2007 122
84. Staff, enrollment, and pupil/staff ratios in public elementary and secondary school systems, by state or jurisdiction: Fall 2000 through fall 2007 123
85. Number, highest degree, experience, and salaries of principals in public and private elementary and secondary schools, by selected characteristics: 1993–94, 2003–04, and 2007–08 124

Schools and School Districts

86. Number of public school districts and public and private elementary and secondary schools: Selected years, 1869–70 through 2007–08 125
87. Number and enrollment of regular public school districts, by enrollment size of district: Selected years, 1979–80 through 2007–08 126
88. Number of public elementary and secondary education agencies, by type of agency and state or jurisdiction: 2006–07 and 2007–08 127
89. Public elementary and secondary students, schools, pupil/teacher ratios, and finances, by type of locale: 2006–07 and 2007–08 128
90. Selected statistics on enrollment, teachers, dropouts, and graduates in public school districts enrolling more than 15,000 students: 1990, 2000, 2005–06, and 2007 130
91. Revenues, expenditures, poverty rate, and Title I allocations of public school districts enrolling more than 15,000 students: 2006–07 and fiscal year 2009 141
92. Enrollment, poverty, and federal funds for the 100 largest school districts, by enrollment size in 2007: Fall 2007, 2006–07, and fiscal year 2009 151
93. Public elementary and secondary schools, by type of school: Selected years, 1967–68 through 2007–08 154
94. Number and percentage distribution of public elementary and secondary schools and enrollment, by type and enrollment size of school: 2005–06, 2006–07, and 2007–08 155
95. Average enrollment and percentage distribution of public elementary and secondary schools, by type and size: Selected years, 1982–83 through 2007–08 156
96. Public elementary and secondary school students, by racial/ethnic enrollment concentration of school: Fall 1995, fall 2000, and fall 2007 157
97. Public elementary and secondary schools, by type and state or jurisdiction: 1990–91, 2000–01, and 2007–08 158
98. Public elementary schools, by grade span, average school size, and state or jurisdiction: 2007–08 159
99. Public secondary schools, by grade span, average school size, and state or jurisdiction: 2007–08 160
100. Number and enrollment of traditional public and public charter elementary and secondary schools and percentages of students, teachers, and schools, by selected characteristics: 2007–08 161
101. Percentage of public schools with permanent and portable (temporary) buildings and with environmental factors that interfere with instruction in classrooms, by selected school characteristics, type of factor, and extent of interference: 2005 163
102. Percentage of public schools with enrollment under, at, or over capacity, by selected school characteristics: 1999 and 2005 163

High School Completers and Dropouts

103. High school graduates, by sex and control of school: Selected years, 1869–70 through 2018–19 . 164
104. Public high school graduates, by state or jurisdiction: Selected years, 1980–81 through 2007–08 165
105. Averaged freshman graduation rates for public secondary schools, by state or jurisdiction: Selected years, 1990–91 through 2006–07 166
106. Public high school graduates and dropouts, by race/ethnicity and state or jurisdiction: 2006–07 . . 167
107. General Educational Development (GED) test takers and test passers, by age: 1971 through 2008 168
108. Percentage of high school dropouts among persons 16 through 24 years old (status dropout rate), by sex and race/ethnicity: Selected years, 1960 through 2008 169
109. Percentage of high school dropouts among persons 16 through 24 years old (status dropout rate), by income level, and percentage distribution of status dropouts, by labor force status and educational attainment: 1970 through 2008 170
110. Number of 14- through 21-year-old students served under Individuals with Disabilities Education Act, Part B, who exited school, by exit reason, age, and type of disability: United States and other jurisdictions, 2005–06 and 2006–07 171

Educational Achievement

111. Percentage of children demonstrating specific cognitive and motor skills at about 9 months of age, by child's age and selected characteristics: 2001–02 172
112. Percentage of children demonstrating specific mental skills, physical skills, and secure emotional attachment to parents at about 2 years of age, by selected characteristics: 2003–04 173
113. Children's specific language, literacy, mathematics, color knowledge, and fine motor skills at about 4 years of age, by age of child and selected characteristics: 2005–06 174
114. Mean reading scale scores and specific reading skills of fall 1998 first-time kindergartners, by time of assessment and selected characteristics: Selected years, fall 1998 through spring 2007 175
115. Mean mathematics and science scale scores and specific mathematics skills of fall 1998 first-time kindergartners, by time of assessment and selected characteristics: Selected years, fall 1998 through spring 2007 176
116. Average reading scale score, by age and selected student and school characteristics: Selected years, 1971 through 2008 177
117. Average reading scale score, by sex, grade, race/ethnicity, and percentile: Selected years, 1992 through 2007 178
118. Average reading scale scores and percentage distribution of 9-, 13-, and 17-year-olds, by amount of reading for school, frequency of reading for fun, and time spent doing homework and watching TV/video: Selected years, 1984 through 2008 179
119. Percentage of students at or above selected reading score levels, by age, sex, and race/ethnicity: Selected years, 1971 through 2008 180
120. Average reading scale score and percentage of 4th-graders in public schools attaining reading achievement levels, by race/ethnicity and state or jurisdiction: Selected years, 1992 through 2007 181
121. Average reading scale score and percentage of 8th-graders in public schools attaining reading achievement levels, by locale and state or jurisdiction: Selected years, 1998 through 2007 183
122. Percentage distribution of 4th- and 8th-grade public school students, students' average reading scale scores, and percentage of students at or above selected reading achievement levels, by jurisdiction or specific urban district and race/ethnicity: 2007 185
123. Average reading scale scores of 4th-, 8th-, and 12th-graders, by selected student and school characteristics: Selected years, 1992 through 2007 186
124. Average reading scale scores of 4th- and 8th-graders in public schools and percentage scoring at or above selected reading achievement levels, by English language learner (ELL) status and state or jurisdiction: 2007 187
125. Average writing scale score and percentage of students attaining writing achievement levels, by selected student characteristics and grade level: 2002 and 2007 188
126. Average arts scale score of 8th-graders, percentage distribution by frequency of instruction, and percentage participating in selected activities, by subject and selected student and school characteristics: 2008 189
127. Percentage of students attaining U.S. history achievement levels, by grade level and selected student characteristics: 2001 and 2006 190
128. Average U.S. history scale score, by grade level and selected student characteristics, and percentage distribution of 12th-graders, by selected student characteristics: 1994, 2001, and 2006 191
129. Average civics scale score and percentage of students attaining civics achievement levels, by grade level and selected student characteristics: 1998 and 2006 192
130. Average economics scale score of 12th-graders, percentage attaining economics achievement levels, and percentage with different levels of economics coursework, by selected student and school characteristics: 2006 193
131. Percentage of students attaining geography achievement levels, by grade level and selected student characteristics: 2001 194
132. Average mathematics scale score, by age and selected student and school characteristics: Selected years, 1973 through 2008 195
133. Percentage of students at or above selected mathematics proficiency levels, by age, sex, and race/ethnicity: Selected years, 1978 through 2008 196

134. Mathematics performance of 17-year-olds, by highest mathematics course taken, sex, and race/ethnicity: Selected years, 1978 through 2008 197
135. Average mathematics scale score of 4th-grade public school students and percentages attaining mathematics achievement levels and having 5 or more hours of mathematics instruction per week, by state or jurisdiction: Selected years, 1992 through 2009 198
136. Average mathematics scale score of 8th-grade public school students and percentage attaining mathematics achievement levels, by level of parental education and state or jurisdiction: Selected years, 1990 through 2009 199
137. Percentage distribution of 4th- and 8th-grade public school students, students' average mathematics scale scores, and percentage of students at or above selected mathematics achievement levels, by jurisdiction or specific urban district and race/ethnicity: 2007. 201
138. Average mathematics scale scores of 4th-, 8th-, and 12th-graders, by selected student and school characteristics: Selected years, 1990 through 2009 202
139. Average mathematics scale score of 8th-graders and percentage reporting various attitudes toward mathematics work, by frequency of attitude and selected student and school characteristics: 2007 203
140. Average science scale scores and percentage of 4th-, 8th-, and 12th-graders attaining science achievement levels, by selected student characteristics and percentile: 1996, 2000, and 2005. . 204
141. Average science scale score for 8th-graders in public schools, by selected student characteristics and state or jurisdiction: 1996, 2000, and 2005 205
142. Average science scale score of 12th-graders and percentage reporting various attitudes toward science, by selected student and school characteristics: 2005 207
143. SAT mean scores of college-bound seniors, by race/ethnicity: Selected years, 1986–87 through 2008–09 208
144. SAT mean scores of college-bound seniors, by sex: 1966–67 through 2008–09 209
145. SAT mean scores of college-bound seniors, by selected student characteristics: Selected years, 1995–96 through 2008–09 210
146. SAT mean scores of college-bound seniors and percentage of graduates taking SAT, by state or jurisdiction: Selected years, 1987–88 through 2008–09 212
147. ACT score averages and standard deviations, by sex and race/ethnicity, and percentage of ACT test takers, by selected composite score ranges and planned fields of study: Selected years, 1995 through 2009 213
148. Percentage distribution of elementary and secondary school children, by average grades and selected child and school characteristics: 1996, 2003, and 2007 214

Coursetaking

149. Average number of Carnegie units earned by public high school graduates in various subject fields, by selected student characteristics: Selected years, 1982 through 2005 215
150. Average number of Carnegie units earned by public high school graduates in career/technical education courses, by selected student characteristics: Selected years, 1982 through 2005. . . . 218
151. Percentage of public and private high school graduates taking selected mathematics and science courses in high school, by sex and race/ethnicity: Selected years, 1982 through 2005 221
152. Percentage distribution of public and private high school graduates, by highest level of mathematics and science course completed and selected student characteristics: 2003–04. . . . 222
153. Percentage of public and private high school graduates earning minimum credits in selected combinations of academic courses, by sex and race/ethnicity: Selected years, 1982 through 2005. 223
154. Public high schools that offered and students enrolled in dual credit, Advanced Placement, and International Baccalaureate courses, by school characteristics: 2003. 224

Student Activities and Behavior

155. Percentage of high school seniors who say they engage in various activities, by selected student and school characteristics: 1992 and 2004 225
156. Percentage of high school seniors who participate in various school-sponsored extracurricular activities, by selected student characteristics: 1994 and 2004 226
157. Percentage of elementary and secondary school students who do homework outside of school, whose parents check that homework is done, and whose parents help with homework, by frequency and selected student and school characteristics: 2003 and 2007 227
158. Tenth-graders' attendance patterns, by selected student and school characteristics: 1990 and 2002 229
159. Number and percentage of public schools reporting crime incidents, and number and rate of incidents, by school characteristics and type of incident: 1999–2000, 2005–06, and 2007–08. . . 230
160. Percentage of schools with various security measures, by school control and selected characteristics: 2007–08 234
161. Number of students suspended and expelled from public elementary and secondary schools, by sex, race/ethnicity, and state: 2006 235
162. Percentage of students suspended and expelled from public elementary and secondary schools, by sex, race/ethnicity, and state: 2006 237
163. Percentage of students in grades 9 through 12 who reported experience with drugs and violence on school property, by race/ethnicity, grade, and sex: Selected years, 1997 through 2007 238
164. Percentage of 12- to 17-year-olds reporting use of illicit drugs, alcohol, and cigarettes during the past 30 days and the past year, by substance used, sex, and race/ethnicity: Selected years, 1982 through 2007 239
165. Percentage of high school seniors reporting drug use, by type of drug and reporting period: Selected years, 1975 through 2008 240

State Regulations

166. Age range for compulsory school attendance and special education services, and policies on year-round schools and kindergarten programs, by state: Selected years, 1997 through 2008 241
167. Minimum amount of instructional time per year and policy on textbook selection, by state: 2000, 2006, and 2008 242
168. Credit requirements and exit exam requirements for a standard high school diploma and the use of other high school completion credentials, by state: 2008 and 2009 243
169. States that use criterion-referenced tests (CRTs) aligned to state standards, by subject area and level: 2006–07 244
170. States using minimum-competency testing, by grade levels assessed, expected uses of standards, and state or jurisdiction: 2001–02 245
171. States requiring testing for initial certification of elementary and secondary teachers, by skills or knowledge assessment and state: 2008 and 2009 246

Revenues and Expenditures

172. Revenues for public elementary and secondary schools, by source of funds: Selected years, 1919–20 through 2006–07 247
173. Revenues for public elementary and secondary schools, by source and state or jurisdiction: 2006–07 248
174. Revenues for public elementary and secondary schools, by source and state or jurisdiction: 2005–06 249
175. Summary of expenditures for public elementary and secondary education, by purpose: Selected years, 1919–20 through 2006–07 250
176. Students transported at public expense and current expenditures for transportation: Selected years, 1929–30 through 2006–07 251
177. Current expenditures for public elementary and secondary education, by state or jurisdiction: Selected years, 1969–70 through 2006–07 252

178. Total expenditures for public elementary and secondary education, by function and state or jurisdiction: 2006–07 254
179. Total expenditures for public elementary and secondary education, by function and state or jurisdiction: 2005–06 256
180. Total expenditures for public elementary and secondary education, by function and subfunction: Selected years, 1990–91 through 2006–07 258
181. Expenditures for instruction in public elementary and secondary schools, by subfunction and state or jurisdiction: 2005–06 and 2006–07 260
182. Total and current expenditures per pupil in public elementary and secondary schools: Selected years, 1919–20 through 2006–07 261
183. Total and current expenditures per pupil in fall enrollment in public elementary and secondary education, by function and state or jurisdiction: 2006–07 262
184. Total and current expenditures per pupil in fall enrollment in public elementary and secondary education, by function and state or jurisdiction: 2005–06 263
185. Current expenditure per pupil in fall enrollment in public elementary and secondary schools, by state or jurisdiction: Selected years, 1969–70 through 2006–07 264
186. Current expenditure per pupil in average daily attendance in public elementary and secondary schools, by state or jurisdiction: Selected years, 1959–60 through 2006–07 266

Chapter 3. Postsecondary Education

Enrollment

187. Enrollment, staff, and degrees conferred in postsecondary institutions participating in Title IV programs, by type and control of institution, sex of student, type of staff, and type of degree: Fall 2007 and 2007–08 277
188. Historical summary of faculty, students, degrees, and finances in degree-granting institutions: Selected years, 1869–70 through 2007–08 278
189. Total fall enrollment in degree-granting institutions, by attendance status, sex of student, and control of institution: Selected years, 1947 through 2008 279
190. Total fall enrollment in degree-granting institutions, by control and type of institution: 1963 through 2008 280
191. Total fall enrollment in degree-granting institutions, by sex, age, and attendance status: Selected years, 1970 through 2018 281
192. Total fall enrollment in degree-granting institutions, by level of enrollment, sex, age, and attendance status of student: 2007 282
193. Total fall enrollment in degree-granting institutions, by control and type of institution, age, and attendance status of student: 2007 283
194. Total fall enrollment in degree-granting institutions, by level of enrollment, sex, attendance status, and type and control of institution: 2008 284
195. Total fall enrollment in degree-granting institutions, by level of enrollment, sex, attendance status, and type and control of institution: 2007 285
196. Total fall enrollment in degree-granting institutions, by attendance status, sex of student, and type and control of institution: Selected years, 1970 through 2008 286
197. Fall enrollment and number of degree-granting institutions, by control and affiliation of institution: Selected years, 1980 through 2008 287
198. Total first-time freshmen fall enrollment in degree-granting institutions, by attendance status, sex of student, and type and control of institution: 1955 through 2008 289
199. Total first-time freshmen fall enrollment in degree-granting institutions, by attendance status, sex, control of institution, and state or jurisdiction: Selected years, 2000 through 2008 290
200. Recent high school completers and their enrollment in college, by sex: 1960 through 2008 291
201. Recent high school completers and their enrollment in college, by race/ethnicity: 1960 through 2008 292

202. Graduation rates of previous year's 12th-graders and college attendance rates of those who graduated, by selected high school characteristics: 1999–2000, 2003–04, and 2007–08 294
203. Estimated rate of 2005–06 high school graduates attending degree-granting institutions, by state: 2006 295
204. Enrollment rates of 18- to 24-year-olds in degree-granting institutions, by type of institution and sex and race/ethnicity of student: 1967 through 2008 296
205. Total undergraduate fall enrollment in degree-granting institutions, by attendance status, sex of student, and control of institution: 1967 through 2008 297
206. Total postbaccalaureate fall enrollment in degree-granting institutions, by attendance status, sex of student, and control of institution: 1967 through 2008 298
207. Total fall enrollment in degree-granting institutions, by state or jurisdiction: Selected years, 1970 through 2007 299
208. Total fall enrollment in public degree-granting institutions, by state or jurisdiction: Selected years, 1970 through 2007 300
209. Total fall enrollment in private degree-granting institutions, by state or jurisdiction: Selected years, 1970 through 2007 301
210. Total fall enrollment in degree-granting institutions, by attendance status, sex, and state or jurisdiction: 2006 and 2007 302
211. Total fall enrollment in public degree-granting institutions, by attendance status, sex, and state or jurisdiction: 2006 and 2007 303
212. Total fall enrollment in private degree-granting institutions, by attendance status, sex, and state or jurisdiction: 2006 and 2007 304
213. Total fall enrollment in private not-for-profit degree-granting institutions, by attendance status, sex, and state or jurisdiction: 2006 and 2007 305
214. Total fall enrollment in degree-granting institutions, by control and type of institution and state or jurisdiction: 2006 and 2007 306
215. Total fall enrollment in degree-granting institutions, by level of enrollment and state or jurisdiction: 2005, 2006, and 2007 307
216. Total fall enrollment in degree-granting institutions, by control, level of enrollment, type of institution, and state or jurisdiction: 2007 308
217. Total fall enrollment in degree-granting institutions, by control, level of enrollment, type of institution, and state or jurisdiction: 2006 309
218. Full-time-equivalent fall enrollment in degree-granting institutions, by control and type of institution: 1967 through 2008 310
219. Full-time-equivalent fall enrollment in degree-granting institutions, by control and type of institution and state or jurisdiction: 2000, 2005, 2006, and 2007 311
220. Full-time-equivalent fall enrollment in degree-granting institutions, by control and state or jurisdiction: Selected years,1980 through 2007 312
221. Total full-year enrollment in degree-granting institutions, by control and type of institution and state or jurisdiction: 2006–07 and 2007–08 313
222. Residence and migration of all freshmen students in degree-granting institutions, by state or jurisdiction: Fall 2008 314
223. Residence and migration of all freshmen students in degree-granting institutions who graduated from high school in the previous 12 months, by state or jurisdiction: Fall 2008 315
224. Residence and migration of all freshmen students in 4-year degree-granting institutions who graduated from high school in the previous 12 months, by state or jurisdiction: Fall 2008 316
225. Number of U.S. students studying abroad and percentage distribution, by sex, race/ethnicity, academic level, host region, and duration of stay: 1996–97 through 2006–07 317
226. Total fall enrollment in degree-granting institutions, by race/ethnicity, sex, attendance status, and level of student: Selected years, 1976 through 2008 318
227. Total fall enrollment in degree-granting institutions, by race/ethnicity of student and type and control of institution: Selected years, 1976 through 2008 320

228. Fall enrollment in degree-granting institutions, by race/ethnicity of student and by state or jurisdiction: 2008 322
229. Fall enrollment in degree-granting institutions, by race/ethnicity of student and by state or jurisdiction: 2007 324
230. Fall enrollment of specific racial/ethnic groups in degree-granting institutions, by type and control of institution and percentage of students in the same racial/ethnic group: 2008 326
231. Number and percentage distribution of students enrolled in postsecondary institutions, by level, disability status, and selected student characteristics: 2003–04 and 2007–08 328
232. Enrollment in postsecondary education, by student level, type of institution, age, and major field of study: 2003–04 329
233. Graduate enrollment in science and engineering programs in degree-granting institutions, by discipline division: Fall 1995 through fall 2007 331
234. Number of degree-granting institutions and enrollment in these institutions, by size, type, and control of institution: Fall 2007 332
235. Enrollment of the 120 largest degree-granting college and university campuses, by selected characteristics and institution: Fall 2007 333
236. Selected statistics for degree-granting institutions enrolling more than 15,000 students in 2007: Selected years, 1990 through 2007–08 334
237. Enrollment and degrees conferred in degree-granting women's colleges, by selected characteristics and institution: Fall 2007 and 2007–08 344
238. Enrollment and degrees conferred in degree-granting institutions that serve large proportions of Hispanic undergraduate students, by selected characteristics and institution: Fall 2007 and 2007–08 345
239. Fall enrollment and degrees conferred in degree-granting tribally controlled institutions, by institution: Fall 2000 through fall 2007, and 2006–07 and 2007–08 352
240. Fall enrollment, degrees conferred, and expenditures in degree-granting historically Black colleges and universities, by institution: 2006, 2006–07, 2007, and 2007–08 353
241. Selected statistics on degree-granting historically Black colleges and universities, by control and type of institution: Selected years, 1990 through 2008 355
242. Fall enrollment in degree-granting historically Black colleges and universities, by type and control of institution: 1976 through 2007 356

Staff

243. Employees in degree-granting institutions, by sex, employment status, control and type of institution, and primary occupation: Selected years, fall 1987 through fall 2007 357
244. Total and full-time-equivalent staff in degree-granting institutions, by employment status, control of institution, and occupation: Fall 1976, fall 1997, and fall 2007 358
245. Employees in degree-granting institutions, by employment status, sex, control and type of institution, and primary occupation: Fall 2007 359
246. Employees in degree-granting institutions, by race/ethnicity, sex, employment status, control and type of institution, and primary occupation: Fall 2007 361
247. Number of full-time-equivalent (FTE) staff and faculty, and FTE staff and faculty/FTE student ratios in public degree-granting institutions, by type of institution and state or jurisdiction: Fall 2007 . . . 362
248. Number of full-time-equivalent (FTE) staff and faculty, and FTE staff and faculty/FTE student ratios in private degree-granting institutions, by type of institution and state or jurisdiction: Fall 2007 . . 363
249. Number of instructional faculty in degree-granting institutions, by employment status, sex, control, and type of institution: Selected years, fall 1970 through fall 2007 364
250. Full-time instructional faculty in degree-granting institutions, by race/ethnicity, sex, and academic rank: Fall 2003, fall 2005, and fall 2007 365
251. Percentage distribution of full-time faculty and instructional staff in degree-granting institutions, by type and control of institution, selected instruction activities, and number of classes taught for credit: Fall 2003 366

252. Percentage distribution of part-time faculty and instructional staff in degree-granting institutions, by type and control of institution, selected instruction activities, and number of classes taught for credit: Fall 2003 368
253. Full-time and part-time faculty and instructional staff in degree-granting institutions, by type and control of institution and selected characteristics: Fall 1992, fall 1998, and fall 2003 370
254. Full-time and part-time faculty and instructional staff in degree-granting institutions, by race/ethnicity, sex, and selected characteristics: Fall 2003 372
255. Full-time and part-time faculty and instructional staff in degree-granting institutions, by field and faculty characteristics: Fall 1992, fall 1998, and fall 2003 374
256. Full-time and part-time faculty and instructional staff in degree-granting institutions, by race/ethnicity, sex, and program area: Fall 1998 and fall 2003 376
257. Average salary of full-time instructional faculty on 9-month contracts in degree-granting institutions, by academic rank, control and type of institution, and sex: Selected years, 1970–71 through 2008–09 378
258. Average salary of full-time instructional faculty on 9-month contracts in degree-granting institutions, by sex, academic rank, and control and type of institution: Selected years, 1999–2000 through 2008–09 381
259. Average salary of full-time instructional faculty on 9-month contracts in degree-granting institutions, by control and type of institution and state or jurisdiction: 2008–09 382
260. Average salary of full-time instructional faculty on 9-month contracts in degree-granting institutions, by control and type of institution and state or jurisdiction: 2007–08 383
261. Average salary of full-time instructional faculty on 9-month contracts in 4-year degree-granting institutions, by type and control of institution, rank of faculty, and state or jurisdiction: 2008–09 . 384
262. Average salary of full-time instructional faculty on 9-month contracts in 4-year degree-granting institutions, by type and control of institution, rank of faculty, and state or jurisdiction: 2007–08 . 385
263. Average benefit expenditure for full-time instructional faculty on 9-month contracts in degree-granting institutions, by type of benefit and control of institution: Selected years, 1977–78 through 2008–09 386
264. Percentage of full-time instructional staff with tenure for degree-granting institutions with a tenure system, by academic rank, sex, and control and type of institution: Selected years, 1993–94 through 2007–08 388

Institutions

265. Degree-granting institutions, by control and type of institution: Selected years, 1949–50 through 2008–09 389
266. Degree-granting institutions and branches, by type and control of institution and state or jurisdiction: 2008–09 390
267. Degree-granting institutions that have closed their doors, by control and type of institution: 1969–70 through 2008–09 392

Degrees

268. Degrees conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1869–70 through 2018–19 393
269. Associate's degrees conferred by degree-granting institutions, by discipline division: 1996–97 through 2007–08 394
270. Associate's degrees and other subbaccalaureate awards conferred by degree-granting institutions, by length of curriculum, sex of student, and discipline division: 2007–08 395
271. Bachelor's degrees conferred by degree-granting institutions, by field of study: Selected years, 1970–71 through 2007–08 396
272. Master's degrees conferred by degree-granting institutions, by field of study: Selected years, 1970–71 through 2007–08 397
273. Doctor's degrees conferred by degree-granting institutions, by field of study: Selected years, 1970–71 through 2007–08 398

274. Bachelor's, master's, and doctor's degrees conferred by degree-granting institutions, by field of study and year: Selected years, 1970–71 through 2007–08 399
275. Bachelor's, master's, and doctor's degrees conferred by degree-granting institutions, by sex of student and discipline division: 2007–08 400
276. Degrees conferred by degree-granting institutions, by control of institution and level of degree: 1969–70 through 2007–08 415
277. Degrees conferred by degree-granting institutions, by control of institution, level of degree, and field of study: 2007–08 416
278. Number of degree-granting institutions conferring degrees, by control, level of degree, and field of study: 2007–08 417
279. Number of institutions and first-professional degrees conferred by degree-granting institutions in dentistry, medicine, and law, by sex of student: Selected years, 1949–50 through 2007–08 418
280. First-professional degrees conferred by degree-granting institutions, by sex of student, control of institution, and field of study: Selected years, 1985–86 through 2007–08 419
281. Certificates conferred by postsecondary institutions participating in Title IV programs, by race/ethnicity and sex of student: 1998–99 through 2007–08 420
282. Associate's degrees conferred by degree-granting institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2007–08 421
283. Associate's degrees conferred by degree-granting institutions, by sex, race/ethnicity, and field of study: 2007–08 422
284. Associate's degrees conferred by degree-granting institutions, by sex, race/ethnicity, and field of study: 2006–07 423
285. Bachelor's degrees conferred by degree-granting institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2007–08 424
286. Bachelor's degrees conferred by degree-granting institutions, by sex, race/ethnicity, and field of study: 2007–08 425
287. Bachelor's degrees conferred by degree-granting institutions, by sex, race/ethnicity, and field of study: 2006–07 426
288. Master's degrees conferred by degree-granting institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2007–08 427
289. Master's degrees conferred by degree-granting institutions, by sex, race/ethnicity, and field of study: 2007–08 428
290. Master's degrees conferred by degree-granting institutions, by sex, race/ethnicity, and field of study: 2006–07 429
291. Doctor's degrees conferred by degree-granting institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2007–08 430
292. Doctor's degrees conferred by degree-granting institutions, by sex, race/ethnicity, and field of study: 2007–08 431
293. Doctor's degrees conferred by degree-granting institutions, by sex, race/ethnicity, and field of study: 2006–07 432
294. First-professional degrees conferred by degree-granting institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2007–08 433
295. First-professional degrees conferred by degree-granting institutions, by sex, race/ethnicity, and field of study: 2007–08 434
296. First-professional degrees conferred by degree-granting institutions, by sex, race/ethnicity, and field of study: 2006–07 434
297. Degrees in agriculture and natural resources conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 through 2007–08 435
298. Degrees in architecture and related services conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1949–50 through 2007–08 436

299. Degrees in the biological and biomedical sciences conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1951–52 through 2007–08 437
300. Degrees in biology, microbiology, and zoology conferred by degree-granting institutions, by level of degree: 1970–71 through 2007–08 438
301. Degrees in business conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1955–56 through 2007–08 439
302. Degrees in communication, journalism, and related programs and in communications technologies conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 through 2007–08 440
303. Degrees in computer and information sciences conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 through 2007–08 441
304. Degrees in education conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1949–50 through 2007–08 442
305. Degrees in engineering and engineering technologies conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1949–50 through 2007–08 443
306. Degrees in chemical, civil, electrical, and mechanical engineering conferred by degree-granting institutions, by level of degree: 1970–71 through 2007–08 444
307. Degrees in English language and literature/letters conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1949–50 through 2007–08 445
308. Degrees in modern foreign languages and literatures conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1949–50 through 2007–08 446
309. Degrees in French, German, Italian, and Spanish conferred by degree-granting institutions, by level of degree: Selected years, 1949–50 through 2007–08 447
310. Degrees in Arabic, Chinese, Korean, and Russian conferred by degree-granting institutions, by level of degree: 1969–70 through 2007–08 448
311. Degrees in the health professions and related sciences conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 through 2007–08 449
312. Degrees in mathematics and statistics conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1949–50 through 2007–08 450
313. Degrees in the physical sciences and science technologies conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1959–60 through 2007–08 . . 451
314. Degrees in chemistry, geology and earth science, and physics conferred by degree-granting institutions, by level of degree: 1970–71 through 2007–08 452
315. Degrees in psychology conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1949–50 through 2007–08 453
316. Degrees in public administration and social services conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 through 2007–08 454
317. Degrees in the social sciences and history conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 through 2007–08 455
318. Degrees in economics, history, political science and government, and sociology conferred by degree-granting institutions, by level of degree: Selected years, 1949–50 through 2007–08 456
319. Degrees in visual and performing arts conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 through 2007–08 457
320. Statistical profile of persons receiving doctor's degrees, by field of study and selected characteristics: 2004–05 and 2005–06 458
321. Degrees conferred by degree-granting institutions, by control, level of degree, and state or jurisdiction: 2007–08 459
322. Bachelor's degrees conferred by degree-granting institutions, by field of study and state or jurisdiction: 2007–08 460
323. Master's degrees conferred by degree-granting institutions, by field of study and state or jurisdiction: 2007–08 461

324. Degrees conferred by degree-granting institutions, by level of degree and state or jurisdiction: 2006–07 and 2007–08 462
325. Doctor's degrees conferred by the 60 institutions conferring the most doctor's degrees: 1998–99 through 2007–08 463

Outcomes

326. Percentage distribution of 1990 high school sophomores, by highest level of education completed through 2000 and selected student characteristics: 2000 464
327. Mean number of semester credits completed by bachelor's degree recipients, by course area and major: 1976, 1984, and 1992–93 465
328. Number and percentage of degree-granting institutions with first-year undergraduates using various selection criteria for admission, by type and control of institution: Selected years, 2000–01 through 2008–09 466
329. Number of applications, admissions, and enrollees; their distribution across institutions accepting various percentages of applications; and SAT and ACT scores of applicants, by type and control of institution: 2008–09 467
330. Percentage of degree-granting institutions offering remedial services, by control and type of institution: 1989–90 through 2008–09 468
331. Graduation rates of first-time postsecondary students who started as full-time degree-seeking students, by sex, race/ethnicity, time between starting and graduating, and level and control of institution where student started: Selected cohort entry years, 1996 through 2004 469
332. Percentage distribution of enrollment and completion status of first-time postsecondary students starting during the 1995–96 academic year, by type of institution and other student characteristics: 2001 473
333. Average scores on Graduate Record Examination (GRE) general and subject tests: 1965 through 2008 475

Student Charges and Student Financial Assistance

334. Average undergraduate tuition and fees and room and board rates charged for full-time students in degree-granting institutions, by type and control of institution: 1964–65 through 2008–09 477
335. Average undergraduate tuition and fees and room and board rates charged for full-time students in degree-granting institutions, by type and control of institution and state or jurisdiction: 2007–08 and 2008–09 480
336. Undergraduate tuition and fees and room and board rates for full-time students in degree-granting institutions, by percentile of charges and control and type of institution: 2000–01 through 2008–09 481
337. Average graduate and first-professional tuition and required fees in degree-granting institutions, by first-professional field of study and control of institution: 1987–88 through 2008–09 482
338. Percentage of undergraduates receiving aid, by type and source of aid and selected student characteristics: 2007–08 483
339. Full-time, first-time degree/certificate seeking undergraduate students enrolled in degree-granting institutions, by participation and average amount awarded in financial aid programs, and type and control of institution: 2000–01 through 2007–08 484
340. Average amount of financial aid awarded to full-time, full-year undergraduates, by type and source of aid and selected student characteristics: 2007–08 485
341. Average amount of financial aid awarded to part-time or part-year undergraduates, by type and source of aid and selected student characteristics: 2007–08 486
342. Amount borrowed, aid status, and sources of aid for full-time and part-time undergraduates, by control and type of institution: 2003–04 and 2007–08 487
343. Percentage of full-time, full-year undergraduates receiving aid, by type and source of aid and control and type of institution: Selected years, 1992–93 through 2007–08 488

344. Average amount of financial aid awarded to full-time, full-year undergraduates, by type and source of aid and control and type of institution: Selected years, 1992–93 through 2007–08 489
345. Percentage of part-time or part-year undergraduates receiving aid, by type and source of aid and control and type of institution: Selected years, 1992–93 through 2007–08 491
346. Percentage of full-time and part-time undergraduates receiving federal aid, by aid program and control and type of institution: 2003–04 and 2007–08 492
347. Amount borrowed, aid status, and sources of aid for full-time, full-year postbaccalaureate students, by level of study and control and type of institution: Selected years, 1992–93 through 2007–08 . 493
348. Amount borrowed, aid status, and sources of aid for part-time or part-year postbaccalaureate students, by level of study and control and type of institution: Selected years, 1992–93 through 2007–08 494
349. Percentage of full-time, full-year postbaccalaureate students receiving aid, by type of aid, level of study, and control and type of institution: Selected years, 1992–93 through 2007–08 495
350. Percentage of part-time or part-year postbaccalaureate students receiving aid, by type of aid, level of study, and control and type of institution: Selected years, 1992–93 through 2007–08 496

Revenue

351. Current-fund revenue of degree-granting institutions, by source of funds: Selected years, 1919–20 through 1995–96 497
352. Revenues of public degree-granting institutions, by source of revenue and type of institution: 2003–04 through 2006–07 498
353. Revenues of public degree-granting institutions, by source of revenue and state or jurisdiction: 2006–07 500
354. Appropriations from state and local governments for public degree-granting institutions, by state or jurisdiction: Selected years, 1990–91 through 2006–07 501
355. Total revenue of private not-for-profit degree-granting institutions, by source of funds and type of institution: 1997–98 through 2006–07 502
356. Total revenue of private not-for-profit degree-granting institutions, by source of funds and type of institution: 2006–07 504
357. Total revenue of private for-profit degree-granting institutions, by source of funds and type of institution: 1999–2000 through 2006–07 505
358. Total revenue of private for-profit degree-granting institutions, by source of funds and type of institution: 2006–07 506
359. Revenue received from the federal government by the 120 degree-granting institutions receiving the largest amounts, by control and rank order: 2006–07 507
360. Voluntary support for degree-granting institutions, by source and purpose of support: Selected years, 1959–60 through 2007–08 508
361. Endowment funds of the 120 colleges and universities with the largest endowments, by rank order: 2006 and 2007 509

Expenditures

362. Expenditures of public degree-granting institutions, by purpose of expenditure and type of institution: 2003–04 through 2006–07 510
363. Expenditures of public degree-granting institutions, by type of institution, purpose of expenditure, and state or jurisdiction: 2004–05, 2005–06, and 2006–07 512
364. Total expenditures of private not-for-profit degree-granting institutions, by purpose and type of institution: 1996–97 through 2006–07 513
365. Total expenditures of private not-for-profit degree-granting institutions, by purpose and type of institution: 2006–07 515
366. Total expenditures of private for-profit degree-granting institutions, by purpose and type of institution: 1998–99 through 2006–07 516

367. Total expenditures of private for-profit degree-granting institutions, by purpose and type of institution: 2006–07 518
368. Total expenditures of private not-for-profit and for-profit degree-granting institutions, by level and state or jurisdiction: 1999–2000 through 2006–07 519

Adult Education

369. Participants in state-administered adult basic education, secondary education, and English as a second language programs, by type of program and state or jurisdiction: Selected fiscal years, 1990 through 2007 520
370. Participation of employed persons, 17 years old and over, in career-related adult education during the previous 12 months, by selected characteristics of participants: Various years, 1995 through 2005. . 521
371. Participation rate of persons, 17 years old and over, in adult education during the previous 12 months, by selected characteristics of participants: Selected years, 1991 through 2005 524

Vocational Education

372. Number of non-degree-granting Title IV institutions offering postsecondary education, by control and state or jurisdiction: Selected years, 2000–01 through 2008–09 526

Chapter 4. Federal Programs for Education and Related Activities

373. Federal support and estimated federal tax expenditures for education, by category: Selected fiscal years, 1965 through 2009 537
374. Federal on-budget funds for education, by agency: Selected fiscal years, 1970 through 2008. . . . 539
375. Federal on-budget funds for education, by level/educational purpose, agency, and program: Selected fiscal years, 1970 through 2009 540
376. Estimated federal support for education, by type of ultimate recipient and agency: Fiscal year 2008 546
377. U.S. Department of Education outlays, by type of recipient and level of education: Selected fiscal years, 1980 through 2009 547
378. U.S. Department of Education appropriations for major programs, by state or jurisdiction: Fiscal year 2008 548
379. Appropriations for Title I and selected other programs under the No Child Left Behind Act of 2001, by program and state or jurisdiction: Fiscal years 2008 and 2009. 549
380. Federal obligations for research, development, and R&D plant, by performers, fields of science, and category of obligation: Fiscal years 2000 through 2008 550

Chapter 5. Outcomes of Education

Educational Characteristics of the Workforce

381. Labor force participation rates and employment to population ratios of persons 16 to 64 years old, by highest level of education, age, sex, and race/ethnicity: 2008 557
382. Unemployment rate of persons 16 years old and over, by age, sex, race/ethnicity, and educational attainment: 2006, 2007, and 2008 558
383. Occupation of employed persons 25 years old and over, by educational attainment and sex: 2008 559
384. Median annual earnings of year-round, full-time workers 25 years old and over, by highest level of educational attainment and sex: 1990 through 2008 560
385. Distribution of earnings and median earnings of persons 25 years old and over, by highest level of educational attainment and sex: 2008 563

386. Literacy skills of adults, by type of literacy, proficiency levels, and selected characteristics: 1992 and 2003 565
387. Percentage of 12th-graders working different numbers of hours per week, by selected student characteristics and school locale type: 1992 and 2004 566

Recent High School and College Graduates

388. College enrollment and labor force status of 2006, 2007, and 2008 high school completers, by sex and race/ethnicity: 2006, 2007, and 2008 567
389. Labor force status of high school dropouts, by sex and race/ethnicity: Selected years, 1980 through 2008 569
390. Among special education students out of high school up to 6 years, percentage attending and completing postsecondary education, living independently, and working competitively, and mean competitive wage earned, by type of disability: 2007 570
391. Percentage distribution of 1999–2000 bachelor's degree recipients 1 year after graduation, by field of study, time to completion, enrollment status, employment status, occupational area, job characteristics, and annual salaries: 2001 571
392. Enrollment in postbaccalaureate certificate or advanced degree programs and highest degree attained by 1992–93 bachelor's degree recipients, by education characteristics: 2003 572
393. Percentage of bachelor's degree recipients employed full time 1 year after graduation and average annual salary, by field of study: Selected years, 1976 through 2001 573
394. Percentage of 18- to 25-year-olds reporting use of illicit drugs, alcohol, and cigarettes during the past 30 days and the past year, by substance used: Selected years, 1982 through 2007 574
395. Percentage of 18- to 25-year-olds reporting use of illicit drugs, alcohol, and cigarettes during the past 30 days and the past year, by substance used and selected characteristics: 2002 and 2007 575
396. Percentage of 1972 high school seniors, 1992 high school seniors, and 2004 high school seniors who felt that certain life values were "very important," by sex: Selected years, 1972 through 2004 576

Chapter 6. International Comparisons of Education

Population, Enrollment, and Teachers

397. Population, school enrollment, and teachers, by major areas of the world: Selected years, 1980 through 2007 582
398. Selected population and enrollment statistics for countries with populations over 10 million, by continent: Selected years, 1990 through 2007 583
399. School-age populations as a percentage of total population, by age group and country: Selected years, 1985 through 2006 585
400. Percentage of population enrolled in secondary and postsecondary education, by age group and country: Selected years, 1985 through 2006 586
401. Pupils per teacher in public and private elementary and secondary schools, by level of education and country: Selected years, 1985 through 2007 587

Achievement, Instruction, and Student Activities

402. Average mathematics literacy, reading literacy, and science literacy scores of 15-year-old students, by sex and country: 2006 588
403. Mean scores and percentage distribution of 15-year-old students scoring at each mathematics literacy proficiency level, by country: 2006 589
404. Mean scores and percentage distribution of 15-year-old students scoring at each science literacy proficiency level, by country: 2006 590
405. Average fourth-grade mathematics scores, by content and cognitive domain, index of time spent doing mathematics homework, and country: 2007 591

406. Average eighth-grade mathematics scores overall and in content and cognitive domains, by country: 2007 . . . 592
407. Percentage distribution of mathematics lesson time spent by eighth-grade students on various activities in a typical week, by country: 2007 . . . 593
408. Mathematics class sizes and average scores of eighth-grade students, yearly mathematics instructional time, and mathematics instructional time as a percentage of total instructional time, by country: 2007 . . . 594
409. Average mathematics scores and percentage distribution of eighth-graders, by index of self-confidence in learning mathematics, index of time spent doing mathematics homework, and country: 2007 . . . 595
410. Average fourth-grade science scores overall and in content and cognitive domains, yearly science instructional time, and science instructional time as a percentage of total instructional time, by country: 2007 . . . 596
411. Average eighth-grade science scores overall and in content and cognitive domains, by country: 2007 597
412. Percentage distribution of science lesson time spent by eighth-grade students on various activities in a typical week, by country: 2007 . . . 598

Postsecondary Degrees

413. Number of bachelor's degree recipients per 100 persons of the typical age of graduation, by sex and country: 2002 through 2006 . . . 599
414. Percentage of bachelor's degrees awarded in mathematics and science, by field and country: Selected years, 1985 through 2006 . . . 600
415. Percentage of graduate degrees awarded in mathematics and science, by field and country: Selected years, 1985 through 2006 . . . 601

Finances

416. Public and private education expenditures per student, by level of education and country: Selected years, 2000 through 2006 . . . 602
417. Total public direct expenditures on education as a percentage of the gross domestic product, by level of education and country: Selected years, 1985 through 2006 . . . 603

Foreign Students in the United States

418. Foreign students enrolled in institutions of higher education in the United States, by continent, region, and selected countries of origin: Selected years, 1980–81 through 2007–08 . . . 604

Chapter 7. Libraries and Educational Technology

Libraries

419. Selected statistics on public school libraries/media centers, by level of school: 1999–2000, 2003–04, and 2007–08 . . . 607
420. Selected statistics on public school libraries/media centers, by level and enrollment size of school: 2007–08 . . . 608
421. Selected statistics on public school libraries/media centers, by state: 2007–08 . . . 609
422. Collections, staff, and operating expenditures of degree-granting institution libraries: Selected years, 1976–77 through 2005–06 . . . 610
423. Collections, staff, and operating expenditures of the 60 largest college and university libraries: 2005–06 . . . 611
424. Public libraries, books and serial volumes, library visits, circulation, and reference transactions, by state: Fiscal years 2006 and 2007 . . . 612

Computers and Technology

425. Public schools and instructional rooms with internet access, by selected school characteristics: Selected years, 1994 through 2005 613
426. Use of the Internet by persons 3 years old and over, by type of use and selected characteristics of students and other users: 2003 615
427. Number and percentage of home computer users, by type of application and selected characteristics: 1997 and 2003 617
428. Number and percentage of student home computer users, by type of application and selected characteristics: 2003 618
429. Student use of computers, by level of enrollment, age, and student and school characteristics: 1993, 1997, and 2003 619
430. Percentage of workers, 18 years old and over, using computers on the job, by type of computer application and selected characteristics: 1993, 1997, and 2003 621

Appendix A. Guide to Sources

A-1. Respondent counts for selected High School and Beyond surveys: 1982, 1984, and 1986 661
A-2. Design effects (DEFF) and root design effects (DEFT) for selected High School and Beyond surveys and subsamples: 1984 and 1986 662
A-3. Respondent counts of full-time workers from the Recent College Graduates survey, by field of study: Selected years, 1976 to 1991 662
A-4. Sampling errors (95 percent confidence level) for percentages estimated from the Gallup Poll: 1992, 1993, and 1996 through 2009 663
A-5. Sampling errors (95 percent confidence level) for the difference in two percentages estimated from the Gallup Poll: 1992, 1993, and 1996 through 2009 663
A-6. Maximum differences required for significance (90 percent confidence level) between sample subgroups from the “Status of the American Public School Teacher” survey: 2000–01 663

INTRODUCTION

In fall 2009, about 75.2 million people were enrolled in American schools and colleges (table 1). About 4.7 million people were employed as elementary and secondary school teachers or as college faculty, in full-time equivalents (FTE). Other professional, administrative, and support staff at educational institutions totaled 5.4 million. All data for 2009 in this Introduction are projected. Some data for other years are projected or estimated as noted. In discussions of historical trends, different time periods and specific years are cited, depending on the timing of important changes as well as the availability of relevant data.

Elementary/Secondary Education

Enrollment

A pattern of annual increases in total public elementary and secondary school enrollment began in 1985 (table 3). Between 1985 and 2009, public school enrollment rose 26 percent, from 39.4 million to 49.8 million (table 2). Private school enrollment grew more slowly than public school enrollment during this period, rising 5 percent, from 5.6 million to 5.8 million. As a result, the percentage of elementary and secondary students enrolled in private schools declined from 12.4 percent in 1985 to 10.5 percent in 2009.

In public schools between 1985 and 2009, there was a 29 percent increase in elementary enrollment (prekindergarten through grade 8), compared with a 20 percent increase in secondary enrollment (table 2). Part of the relatively fast growth in public elementary school enrollment resulted from the expansion of prekindergarten programs (table 37). Between 1985 and 2007, enrollment in prekindergarten increased 614 percent, while enrollment in other elementary grades (including kindergarten through grade 8 plus ungraded elementary programs) increased 23 percent. The number of children enrolled in prekindergarten increased from 0.2 million in 1985 to 1.1 million in 2007, and the number enrolled in other elementary grades increased from 26.9 million to 33.1 million. Public secondary school enrollment declined 8 percent from 1985 to 1990, but then started increasing. For most of the period after 1992, secondary enrollment increased more rapidly than elementary enrollment, leading to relatively large secondary enrollment gains in recent years. For example, between 1999 and 2009, public secondary school enrollment rose 11 percent, compared with 4 percent for public elementary school enrollment (table 2). Overall, public school enrollment rose 6 percent between 1999 and 2009.

Since the enrollment rates of 5- and 6-year-olds, 7- to 13-year-olds, and 14- to 17-year-olds changed by about 2 or fewer percentage points between 1985 and 2008, increases in public and private elementary and secondary school enrollment have been driven primarily by increases in the number of children in these age groups (tables 7 and 15). Increases in both the enrollment rate of 3- and 4-year-old children (from 39 percent in 1985 to 53 percent in 2008) and the number of children in this age group (from 7.1 million to 8.3 million) also contributed to overall enrollment increases.

The National Center for Education Statistics (NCES) forecasts record levels of total elementary and secondary enrollment through at least 2018, reflecting expected increases in the size of the school-age population. For public schools, the projected fall 2009 enrollment is expected to be a new record, and new records are expected every year through 2018, the last year for which NCES enrollment projections have been developed (table 3). Public elementary school enrollment (prekindergarten through grade 8) is projected to increase by 9 percent between 2009 and 2018. Public secondary school enrollment (grades 9 through 12) is expected to increase 6 percent between 2009 and 2018. Overall, total public school enrollment is expected to increase 8 percent between 2009 and 2018.

Teachers

A projected 3.7 million full-time-equivalent (FTE) elementary and secondary school teachers were engaged in classroom instruction in fall 2009 (table 4). This number has risen 12 percent since 1999. The 2009 projected number of FTE teachers includes 3.2 million public school teachers and 0.5 million private school teachers.

The number of public school teachers has risen faster than the number of public school students over the past 10 years, resulting in declines in the pupil/teacher ratio (table 64). In the fall of 2009, there were a projected 15.3 public school pupils per teacher, compared with 16.1 public school pupils per teacher 10 years earlier.

The average salary for public school teachers in 2008–09 was $53,910, about 2 percent higher than in 1998–99, after adjustment for inflation (table 78). The salaries of public school teachers have generally maintained pace with inflation since 1990–91.

Student Performance

Most of the student performance data in the *Digest* are drawn from the National Assessment of Educational Progress (NAEP). The NAEP assessments have been conducted using three basic designs: the national main NAEP, state NAEP, and long-term trend NAEP. The national main NAEP and state NAEP provide current information about student performance in a variety of subjects, while long-term trend NAEP provides information on performance since the early 1970s in reading and mathematics only. Results from long-term trend NAEP are included in the discussion in chapter 2 of the *Digest*, while the information in this Introduction includes only results from the national main and state NAEP.

The main NAEP reports current information for the nation and specific geographic regions of the country. The assessment program includes students drawn from both public and nonpublic schools and reports results for student achievement at grades 4, 8, and 12. The main NAEP assessments follow the frameworks developed by the National Assessment Governing Board and use the latest advances in assessment methodology. The state NAEP is identical in content to the national main NAEP, but the state NAEP reports information only for public school students. Chapter 2 presents more information on the NAEP designs and methodology, and additional details appear in Appendix A: Guide to Sources.

Reading

Reported on a scale of 0 to 500, national average reading scores of 4th- and 8th-graders were higher in 2007 than in 1992, by 4 and 3 points, respectively (table 123). These 2007 scores were also higher than the 2005 scores. The reading score of 12th-graders was 6 points lower in 2005 (the most recent assessment year for grade 12) than in 1992. In the most recent assessment, females at each grade level outscored their male counterparts. For example, 12th-grade females scored 13 points higher than males in 2005. Average scores were higher in 2007 than in 1992 for White, Black, Hispanic, and Asian/Pacific Islander 4th-graders (ranging from 6 to 16 points) and for White, Black, and Hispanic 8th-graders (ranging from 5 to 7 points), while scores were lower in 2005 than in 1992 for White, Black, and Hispanic 12th-graders (ranging from 5 to 7 points).

The 2007 main NAEP reading assessment of states found that the average reading proficiency of public school 4th- and 8th-graders varied across participating jurisdictions (the 50 states, the Department of Defense overseas and domestic schools, and the District of Columbia). For 4th-graders in public schools, the U.S. average score was 220, with average scores in participating jurisdictions ranging from 197 in the District of Columbia to 236 in Massachusetts (table 120). For 8th-graders in public schools, the U.S. average score was 261, with average scores in participating jurisdictions ranging from 241 in the District of Columbia to 273 in the Department of Defense schools, Massachusetts, and Vermont (table 121).

Mathematics

From 2007 to 2009, gains in average NAEP mathematics scores seen in earlier years continued at grade 8 but not at grade 4. At grade 8, the average NAEP mathematics score (reported on a scale of 0 to 500) increased 2 points from 2007 to 2009 and was higher in 2009 than in any previous assessment year (table 138). At grade 4, the average score in 2009 was unchanged from the score in 2007 but still higher than the scores in the six assessment years from 1990 to 2005. From 2007 to 2009, no significant score changes occurred at grade 4 for males or females or for any of the racial/ethnic groups. At grade 8, average scores increased from 2007 to 2009 for both male and female students as well as for White, Black, Hispanic, and Asian/Pacific Islander students. For American Indian/Alaska Native 8th-graders, no measurable differences were detected in average scores over the assessment years.

The 2009 main NAEP assessment of states found that the average mathematics proficiency of public school 4th- and 8th-graders varied across participating jurisdictions (the 50 states, the Department of Defense overseas and domestic schools, and the District of Columbia). For 4th-graders in public schools, the U.S. average score was 239, with average scores in participating jurisdictions ranging from 219 in the District of Columbia to 251 in New Hampshire and 252 in Massachusetts (table 135). For 8th-graders in public schools, the U.S. average score was 282, with average scores in participating jurisdictions ranging from 254 in the District of Columbia to 299 in Massachusetts (table 136).

Science

NAEP has assessed the science abilities of students in grades 4, 8, and 12 in both public and private schools since 1996, using a separate scale of 0 to 300 for each grade. The national average 4th-grade science score increased from 147 in 1996 to 151 in 2005; there was no measurable change in the 8th-grade score; and the 12th-grade score decreased from 150 in 1996 to 147 in 2005 (table 140). Certain subgroups outperformed others in science in 2005. For example, males outperformed females at all three grades. Male 4th-graders had a higher average score in 2005 than in 1996, and both male and female 12th-graders had lower scores in 2005 than in 1996. White students scored higher, on average, than Black and Hispanic students at all three grades in 2005. At grade 4, average scores were higher for White, Black, Hispanic, and Asian/Pacific Islander students in 2005 than in 1996. At grade 8, the average score for Black students was higher in 2005 than in 1996, but the scores did not measurably change for other racial/ethnic groups. At grade 12, there were no measurable changes in average scores for any racial/ethnic group when comparing results from 2005 with those from 1996.

International Comparisons

The 2007 Trends in International Mathematics and Science Study (TIMSS) assessed students' mathematics and science performance at grade 4 in 36 countries and at grade 8 in 48 countries. The assessment is curriculum based and

measures what students have actually learned against the subject matter that is expected to be taught in the participating countries by the end of grades 4 and 8. At both grades, TIMSS scores are reported on a scale of 0 to 1,000, with the scale average fixed at 500. In 2007, the average mathematics scores of U.S. 4th-graders (529) and 8th-graders (508) were higher than the scale average (tables 405 and 406). U.S. 4th-graders scored higher in mathematics, on average, than their counterparts in 23 countries and lower than those in 8 countries (table 405). Average mathematics scores in the other 4 countries were not measurably different from the U.S. average. At grade 8, the average U.S. mathematics score was higher than those of students in 37 countries in 2007 and below the average scores of students in 5 countries (table 406). Average 8th-grade mathematics scores in the other 5 countries were not measurably different from the U.S. average. The average science scores of both U.S. 4th-graders (539) and eighth-graders (520) were higher than the fixed TIMSS scale average of 500 in 2007 (tables 410 and 411). The average U.S. 4th-grade science score was higher than those of students in 25 countries, lower than those of students in 4 countries, and not measurably different from those in the remaining 6 countries (table 410). At grade 8, the average U.S. science score was higher than the average scores of students in 35 of the 47 other countries, lower than those in 9 countries, and not measurably different from those in the other 3 countries (table 411).

In the Program for International Student Assessment (PISA) 2006, U.S. 15-year-old students' average mathematics literacy score of 474 was lower than the Organization for Economic Cooperation and Development (OECD) average of 498 and placed U.S. 15-year-olds in the bottom quarter of participating OECD nations (table 402). Fifteen-year-old students in 23 of the 29 other participating OECD-member countries outperformed their U.S. peers. There was no measurable change in U.S. 15-year-olds' average mathematics literacy score between 2003 and 2006, in its relationship to the OECD average, or in its relative position to the countries whose scores increased or decreased. In PISA 2006, U.S. 15-year-old students' average science literacy score of 489 was lower than the OECD average of 500 and placed U.S. 15-year-olds in the bottom third of participating OECD nations. Fifteen-year-old students in 16 of the 29 other participating OECD-member countries outperformed their U.S. peers in terms of average scores.

High School Graduates and Dropouts

About 3,329,000 high school students are expected to graduate during the 2008–09 school year (table 103), including about 3,019,000 public school graduates and 311,000 private school graduates. High school graduates include only recipients of diplomas, not recipients of equivalency credentials. The number of high school graduates projected for 2009–10 is lower than the record-high projection for 2008–09, but exceeds the high point during the baby boom era in 1975–76, when 3,142,000 students earned diplomas. In 2006–07, an estimated 73.9 percent of public high school students graduated on time—that is, received a diploma 4 years after beginning their freshman year (table 105).

The number of General Educational Development (GED) credentials issued by the states to GED test passers rose from 330,000 in 1977 to 487,000 in 2000 (table 107). A record number of 648,000 GED credentials were issued in 2001. In 2002, there were revisions to the GED test and to the data reporting procedures. In 2001, test takers were required to successfully complete all five components of the GED or else begin the five-part series again with the new test that was introduced in 2002. Prior to 2002, reporting was based on summary data from the states on the number of GED credentials issued. As of 2002, reporting has been based on individual GED candidate- and test-level records collected by the GED Testing Service. In 2008, about 469,000 passed the GED tests, up from 330,000 in 2002, the first year of the new test series.[1]

The percentage of dropouts among 16- to 24-year-olds has shown some decreases over the past 20 years. This percentage, known as the status dropout rate, includes all people in the 16- to 24-year-old age group who are not enrolled in school and who have not completed a high school program, regardless of when they left school. (People who left school but went on to receive a GED credential are not treated as dropouts in this measure.) Between 1988 and 2008, the status dropout rate declined from 12.9 percent to 8.0 percent (table 108). Although the status dropout rate declined for both Blacks and Hispanics during this period, their rates in 2008 (9.9 and 18.3 percent, respectively) remained higher than the rate for Whites (4.8 percent) in 2008. This measure is based on the civilian noninstitutionalized population, which excludes people in prisons, people in the military, and other people not living in households.

Educational Technology

The number of computers in public elementary and secondary schools has increased. In 2005, the average public school contained 154 instructional computers, compared with 90 in 1998 (table 425). One important technological advance that has come to classrooms following the introduction of computers has been connections to the Internet. The percentage of instructional rooms with access to the Internet increased from 51 percent in 1998 to 94 percent in 2005 (figure 29). Nearly all schools had access to the Internet in 2005 (table 425).

[1] Information on changes in GED test series and reporting is based on the 2003 edition of *Who Passed the GED Tests?*, by the GED Testing Service of the American Council on Education, as well as communication with staff of the GED Testing Service.

Postsecondary Education

College Enrollment

College enrollment was a projected 19.6 million in fall 2009, higher than in any previous year (table 3). College enrollment is expected to continue setting new records from fall 2010 through fall 2018. Between fall 2009 and fall 2018, enrollment is expected to increase by 9 percent. Despite decreases in the size of the traditional college-age population (18 to 24 years old) during the late 1980s and early 1990s, total enrollment increased during this period (tables 7, 15, 189, and 204). The traditional college-age population rose 14 percent between 1998 and 2008, which was reflected by an increase of 32 percent in college enrollment. Between 1998 and 2008, the number of full-time students increased by 37 percent, compared to a 24 percent increase in part-time students (table 189). During the same time period, the number of males enrolled increased 29 percent, while the number of females enrolled increased 34 percent.

Faculty

In fall 2007, degree-granting institutions—defined as postsecondary institutions that grant an associate's or higher degree and are eligible for Title IV federal financial aid programs—employed 1.4 million faculty members, including 0.7 million full-time and 0.7 million part-time faculty (table 245). In addition, degree-granting institutions employed 0.3 million graduate assistants.

Postsecondary Degrees

During the 2007–08 academic year, postsecondary degrees numbered 750,000 associate's degrees; 1,563,000 bachelor's degrees; 625,000 master's degrees; 91,300 first-professional degrees; and 63,700 doctor's degrees (table 268). Between 1997–98 and 2007–08, the number of degrees conferred rose at all levels. The number of associate's degrees was 34 percent higher in 2007–08 than in 1997–98, the number of bachelor's degrees was 32 percent higher, the number of master's degrees was 45 percent higher, the number of first-professional degrees was 16 percent higher, and the number of doctor's degrees was 38 percent higher.

Between 1997–98 and 2007–08, the number of bachelor's degrees awarded to males increased 28 percent, while the number awarded to females increased 35 percent. As a result, females earned 57 percent of all bachelor's degrees in 2007–08, compared with 56 percent in 1997–98. Between 1997–98 and 2007–08, the number of White students earning bachelor's degrees increased 25 percent, compared with the larger increases of 55 percent for Black students, 86 percent for Hispanic students, 52 percent for Asian/Pacific Islander students, and 46 percent for American Indian/Alaska Native students (table 285). In 2007–08, White students earned 72 percent of all bachelor's degrees awarded (vs. 76 percent in 1997–98), Black students earned 10 percent (vs. 8 percent in 1997–98), Hispanic students earned 8 percent (vs. 6 percent in 1997–98), and Asian/Pacific Islander students earned 7 percent (vs. 6 percent in 1997–98). American Indian/Alaska Native students earned about 1 percent of the degrees in both years.

Undergraduate Prices

For the 2008–09 academic year, annual prices for undergraduate tuition, room, and board were estimated to be $12,283 at public institutions and $31,233 at private institutions (table 334). Between 1998–99 and 2008–09, prices for undergraduate tuition, room, and board at public institutions rose 32 percent, and prices at private institutions rose 24 percent, after adjustment for inflation.

Educational Attainment

The U.S. Census Bureau collects annual statistics on the educational attainment of the population. Between 1999 and 2009, the percentage of the adult population 25 years of age and over who had completed high school rose from 83 percent to 87 percent, and the percentage of adults with a bachelor's degree increased from 25 percent to 30 percent (table 8). High school completers include those people who graduated from high school with a diploma, as well as those who completed high school through equivalency programs. The percentage of young adults (25- to 29-year-olds) who had completed high school in 2009 was about the same as it was in 1999 (89 and 88 percent, respectively). The percentage of young adults who had completed a bachelor's degree increased from 28 percent in 1999 to 31 percent in 2009.

Education Expenditures

Expenditures for public and private education, from prekindergarten through graduate school (excluding postsecondary schools not awarding associate's or higher degrees), are estimated at $1.1 trillion for 2008–09 (table 26). Expenditures of elementary and secondary schools are expected to total $661 billion, while those of degree-granting postsecondary institutions are expected to total $432 billion. Total expenditures for education are expected to amount to 7.6 percent of the gross domestic product in 2008–09, about 0.7 percentage points higher than in 1998–99.

Interpreting Statistics

Readers should be aware of the limitations of statistics. These limitations vary with the exact nature of a particular survey. For example, estimates based on a sample of institutions will differ somewhat from the figures that would have been obtained if a complete census had been taken using the same survey procedures. Standard errors are available for sample survey data appearing in this report. In most cases, standard errors for all items appear in the printed table. In some cases, only standard errors for key items appear in the printed table. Standard errors that do not

appear in the tables are available from NCES upon request. Although some of the surveys conducted by NCES are census or universe surveys (which attempt to collect information from all potential respondents), all surveys are subject to design, reporting, and processing errors and errors due to nonresponse. Differences in sampling, data collection procedures, coverage of target population, timing, phrasing of questions, scope of nonresponse, interviewer training, data processing, coding, and so forth mean that the results from the different sources may not be strictly comparable. More information on survey methodologies can be found in Appendix A: Guide to Sources.

Estimates presented in the text and figures are rounded from original estimates, not from a series of roundings. Percentages in the text are rounded to whole numbers, while ratios and percentage distributions are normally presented to one decimal place, where applicable.

Unless otherwise noted, all data in this report are for the 50 states and the District of Columbia. Unless otherwise noted, all financial data are in current dollars, meaning not adjusted for changes in the purchasing power of the dollar due to inflation. Price indexes for inflation adjustments can be found in table 32.

Common data elements are collected in different ways in different surveys. Since the *Digest* relies on a number of data sources, there are discrepancies in definitions and data across tables in the volume. For example, several different surveys collect data on public school enrollment, and while similar, the estimates are not identical. The definitions of racial/ethnic groups also differ across surveys, particularly with respect to persons of two or more races. Individual tables note the definitions used in the given studies.

All statements cited in the text about differences between two or more groups or changes over time were tested for statistical significance and are statistically significant at the .05 level. Various test procedures were used, depending on the nature of the statement tested. The most commonly used test procedures were *t* tests, equivalence tests, and linear trend tests. Equivalence tests were used to determine whether two statistics are substantively equivalent or substantively different. This was accomplished by using a hypothesis test to determine whether the confidence interval of the difference between sample estimates is substantively significant (i.e., greater or less than a preset substantively important difference). In most cases involving percentages, a difference of 3.0 was used to determine substantive equivalence or difference. In some comparisons involving only very small percentages, a lower difference was used. In cases involving only relatively large values, a larger difference was used, such as $1,000 in the case of annual salaries. Linear trend tests were conducted by evaluating the significance of the slope of a simple regression of the data over time, and a *t* test comparing the end points.

GUIDE TO TABULAR PRESENTATION

This section is intended to assist the reader in following the basic structure of the *Digest* tables and to provide a legend for some of the common symbols and indexes used throughout the book. Unless otherwise noted, all data are for the 50 states and the District of Columbia. Changes in survey instruments sometimes mean that data for specific categories are not available in a consistent manner over the entire reporting period. Because of these survey limitations, data for these specific categories may be noted as included with other categories where applicable.

Table Components

Title Describes the table content concisely. (Tables may not include data for all years implied in table titles. When this is the case, the title will include the term "Selected years.")

Unit indicator Informs the reader of the measurement unit in the table—"In thousands," "In millions of dollars," etc. Noted below the title unless several units are used, in which case the unit indicators are generally given in the spanner or individual column heads.

Spanner Describes a group of two or more columns.

Column head Describes a specific column.

Stub Describes a row or a group of rows. Each stub row is followed by a number of dots (leaders).

Field The area of the table which contains the data elements.

Example of Table Structure

Table Number and Title — **Table 0. Projected number of participants in educational institutions, by level and control of institution: Fall 2006**

Unit Indicator → [In millions]

Participants	All levels (elementary, secondary, and postsecondary degree-granting)	Elementary and secondary schools		
		Total	Public	Private
1	2	3	4	5
Total	**82.2**	**62.0**	**55.0**	**6.8**
Enrollment	72.7	55.1	48.9	6.1
Teachers and faculty	4.5	3.6	3.2	0.5
Other professional, administrative, and support staff	5.0	3.2	2.9	0.3[1]

Spanner → Elementary and secondary schools

Column Heads → Participants; All levels (elementary, secondary, and postsecondary degree-granting); Total; Public; Private

Column Numbers → 1; 2; 3; 4; 5

Stub → Total; Enrollment; Teachers and faculty; Other professional, administrative, and support staff

Field → the data elements

Footnote → [1]Reference (numbered) notes refer to specific parts of the table.

Note → NOTE: Includes enrollments in local public school systems and in most private schools (religiously affiliated and nonsectarian). Excludes federal schools. Excludes private preprimary enrollment in schools that do not offer kindergarten or above. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Data for teachers and other staff in public and private elementary and secondary schools and colleges and universities are reported in terms of full-time equivalents. Detail may not sum to totals because of rounding.

Source → SOURCE: U.S. Department of Education, National Center for Education Statistics, *Projections of Education Statistics to 2015*; and unpublished projections and estimates. (This table was prepared September 2006.)

Special notes Symbols used to indicate why data do not appear in designated cell.

— Not available.

† Not applicable.

Rounds to zero.

! Interpret data with caution.

‡ Reporting standards not met.

Footnote Describes a unique circumstance relating to a specific item within the table. Following are two typical examples:

Estimated Based on available information from a subset of the population of interest.

Projected Calculated from a forecasting model based on historical information.

Note Furnishes general information that relates to the entire table.

Source The document or reference from which the data are drawn. This note may also include the organizational unit responsible for preparing the data.

Descriptive Terms

Measures of central tendency A number that is used to represent the "typical value" of a group of numbers. It is regarded as a measure of "location" or "central tendency" of a group of numbers.

Arithmetic mean (average) is the most commonly used measure of central tendency. It is derived by summing the individual item values of a particular group and dividing that sum by the number of items. This value is often referred to simply as the "mean" or "average."

Median is the measure of central tendency that occupies the middle position in a rank order of values. It generally has the same number of items above it as below it. If there is an even number of items in the group, the median is the average of the middle two items.

Average per capita, or per person, figure represents an average computed for every person in a specified group, or population. It is derived by dividing the total for an item (such as income or expenditures) by the number of persons in the specified population.

Index number A value that provides a means of measuring, summarizing, and communicating the nature of changes that occur from time to time or from place to place. An index is used to express changes in prices over periods of time, but may also be used to express differences between related subjects at a single point in time.

The *Digest* most often uses the Consumer Price Index to compare purchasing power over time.

To compute a price index, a base year or period is selected. The base-year price is then designated as the base or reference price to which the prices for other years or periods are related.

A method of expressing the price relationship is:

Index number =

$$\frac{\text{Price of a set of one or more items for related year}}{\text{Price of the same set of items for base year}} \times 100$$

When 100 is subtracted from the index number, the result equals the percent change in price from the base year.

Current and constant dollars are used in a number of tables to express finance data. Unless otherwise noted, all figures are in current dollars, not adjusted for inflation. Constant dollars provide a measure of the impact of inflation on the current dollars.

Current dollar figures reflect actual prices or costs prevailing during the specified year(s).

Constant dollar figures attempt to remove the effects of price changes (inflation) from statistical series reported in dollar terms.

The constant dollar value for an item is derived by dividing the base-year price index (for example, the Consumer Price Index for 1999) by the price index for the year of data to be adjusted and multiplying by the price of item to be adjusted. The result is an adjusted dollar value as it would presumably exist if prices were the same as the base year—in other words, as if the dollar had constant purchasing power. Any changes in the constant dollar amounts would reflect only changes in the real values.

In the 2009 edition of the *Digest*, the following 23 tables include finance data that are adjusted to school year 2007–08 dollars: tables 27, 33, 74, 78, 79, 85, 172, 175, 176, 182, 185, 186, 257, 263, 334, 337, 352, 355, 357, 362, 364, 366, and 422. Data adjusted to calendar year 2008 dollars appear in tables 20, 384, 393, and 416. Table 373 includes adjustments to fiscal year (FY) 2009 dollars.

CHAPTER 1
All Levels of Education

This chapter provides a broad overview of education in the United States. It brings together material from preprimary, elementary, secondary, and postsecondary education, as well as from the general population, to present a composite picture of the American educational system. Tables feature data on the total number of people enrolled in school, the number of teachers, the number of schools, and total expenditures for education at all levels. This chapter also includes statistics on education-related topics such as educational attainment, family characteristics, population, and opinions about schools. Economic indicators and price indexes have been added to facilitate analyses.

The U.S. system of education can be described as having three levels of formal education (elementary, secondary, and postsecondary) (figure 1). Students may spend 1 to 3 years in prekindergarten and kindergarten, which may be offered either in separate schools or in elementary schools that also offer higher grades. (In *Digest of Education Statistics* tables, prekindergarten and kindergarten are generally defined as a part of elementary education.) Following kindergarten, students ordinarily spend from 6 to 8 years in elementary school. The elementary school program is followed by a 4- to 6-year program in secondary school. Students normally complete the entire program through grade 12 by age 18. Education at the elementary and secondary levels is provided in a range of institutional settings—including elementary schools (preprimary schools, middle schools, and schools offering broader ranges of elementary grades); secondary schools (junior high schools, high schools, and senior high schools); and combined elementary/secondary schools—that vary in structure from locality to locality.

High school graduates who decide to continue their education may enter a technical or vocational institution, a 2-year community or junior college, or a 4-year college or university. A 2-year college normally offers the first 2 years of a standard 4-year college curriculum and a selection of terminal career and technical education programs. Academic courses completed at a 2-year college are usually transferable for credit at a 4-year college or university. A technical or vocational institution offers postsecondary technical training leading to a specific career.

An associate's degree requires at least 2 years of college-level coursework, and a bachelor's degree normally requires 4 years of college-level coursework. At least 1 year of coursework beyond the bachelor's is necessary for a master's degree, while a doctor's degree usually requires a minimum of 3 or 4 years beyond the bachelor's.

Professional schools differ widely in admission requirements and program length. Medical students, for example, generally complete a bachelor's program of premedical studies at a college or university before they can enter the 4-year program at a medical school. Law programs normally require 3 years of coursework beyond the bachelor's degree level.

Many of the statistics in this chapter are derived from the statistical activities of the National Center for Education Statistics (NCES). In addition, substantial contributions have been drawn from the work of other groups, both governmental and nongovernmental, as shown in the source notes of the tables. Information on survey methodologies is contained in Appendix A: Guide to Sources and in the publications cited in the table source notes.

Enrollment

Total enrollment in public and private elementary and secondary schools (prekindergarten through grade 12) grew rapidly during the 1950s and 1960s, reaching a peak year in 1971 (table A, table 3, and figure 2). This enrollment rise was caused by what is known as the "baby boom," a dramatic increase in births following World War II. From 1971 to 1984, total elementary and secondary school enrollment decreased every year, reflecting the decline in the size of the school-age population over that period. After these years of decline, enrollment in elementary and secondary schools started increasing in fall 1985, began hitting new record levels in the mid-1990s, and continued to reach new record levels every year through 2006. Enrollment for fall 2007 (55.2 million) was slightly lower than in fall 2006 (55.3 million); however, beginning with fall 2008, enrollments are projected to continue rising again.

Table A. Total elementary and secondary school enrollment, by overall trends: Selected years, 1949–50 to fall 2008

Trend and year	Number of students (in millions)
"Baby boom" increases	
1949–50 school year	28.5
Fall 1959	40.9
Fall 1969	51.1
Fall 1971 (peak)	51.3
13 years with annual declines	
Fall 1972 (first year of decline)	50.7
Fall 1984 (final year of decline)	44.9
Annual increases from 1985 to 2006	
Fall 1985	45.0
Fall 1996 (new record highs begin)	51.5
Fall 2006 (final year of record highs)	55.3
Slight decline followed by increases	
Fall 2007	55.2
Fall 2008 (new record highs begin)	55.3

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Biennial Survey of Education in the United States, 1949–50; Statistics of Public Elementary and Secondary School Systems,* 1959 through 1972; Common Core of Data (CCD), 1984 through 2007; Private School Universe Survey (PSS), 1997–98 through 2007–08; and *Projections of Education Statistics to 2018.*

From 1985 to 2008, total public and private school enrollment rates changed by 2 percentage points or less for 5- and 6-year-olds (96 percent in 1985 vs. 94 percent in 2008), 7- to 13-year-olds (99 percent in both years), and 14- to 17-year-olds (95 vs. 97 percent) (table 7). Since these enrollment rates remained relatively steady between 1985 and 2008, increases in public and private elementary and secondary school enrollment have been driven primarily by increases in the number of children in these age groups. Between 1985 and 2008, the number of 5- and 6-year-olds increased by 17 percent, the number of 7- to 13-year-olds increased by 21 percent, and the number of 14- to 17-year-olds increased by 14 percent (table 15). Increases in the enrollment rate of prekindergarten age children (ages 3 and 4) from 39 percent in 1985 to 53 percent in 2008 (table 7) and in the number of 3- and 4-year-olds from 7.1 million to 8.3 million (table 15) also contributed to overall prekindergarten through grade 12 enrollment increases.

Public school enrollment at the elementary level (prekindergarten through grade 8) rose from 29.9 million in fall 1990 to 34.2 million in 2003 (table 3). After a decrease of less than 1 percent between fall 2003 and fall 2004, elementary enrollment generally increased to a projected total of 35.0 million for fall 2009. Public elementary enrollment is projected to continue a pattern of annual increases through 2018 (the last year for which NCES has projected school enrollment). Public school enrollment in the upper grades rose from 11.3 million in 1990 to 15.1 million in 2007, with a projected enrollment of 14.8 million for 2009. Public secondary enrollment is projected to show a decrease of 3 percent between 2007 and 2011, and then increase again through 2018. Public secondary school enrollment in 2018 is expected to be about 6 percent higher than in 2009. Total public elementary and secondary enrollment is projected to set new records every year from 2009 to 2018.

The percentage of students in private elementary and secondary schools declined from 11.4 percent in 1997 to 10.7 percent in 2007 (table 3). In 2009, a projected 5.8 million students were enrolled in private schools at the elementary and secondary levels.

Total public and private college and university enrollment reached 14.5 million in fall 1992 and decreased to 14.3 million in fall 1995 (table 3). Total college and university enrollment increased 34 percent between 1995 and 2008 (to 19.1 million), and a further increase of 12 percent is expected between fall 2008 and fall 2018. The percentage of college and university students who attended private colleges and universities rose from 23 to 27 percent between 1998 and 2008. In fall 2008, about 5.1 million students attended private colleges and universities, with about 3.7 million in not-for-profit institutions and 1.5 million in for-profit institutions (table 189). Enrollment increases in colleges and universities have been driven by both increases in population and increases in enrollment rates. For example, the percentage of 18- and 19-year-olds enrolled in colleges and universities rose from 46 to 49 percent between 1998 and 2008, while the enrollment rate of 20- to 24-year-olds rose from 33 percent to 37 percent (table 7). During the same period, the number of 18- and 19-year-olds rose 10 percent, and the number of 20- to 24-year-olds rose 16 percent (table 15).

Educational Attainment

The percentages of adults 25 years old and over completing high school and higher education have been rising. In 2009, some 87 percent of the population 25 years old and over had completed at least high school and 30 percent had completed a bachelor's or higher degree (table 8 and figure 3). These percentages are higher than in 1999, when 83 percent had completed at least high school and 25 percent had completed a bachelor's or higher degree. In 2009, about 8 percent of people 25 years old or over held a master's degree as their highest degree, 2 percent held a professional degree (e.g., medicine or law), and 1 percent held a doctor's degree (table 9 and figure 5).

Teachers and Faculty

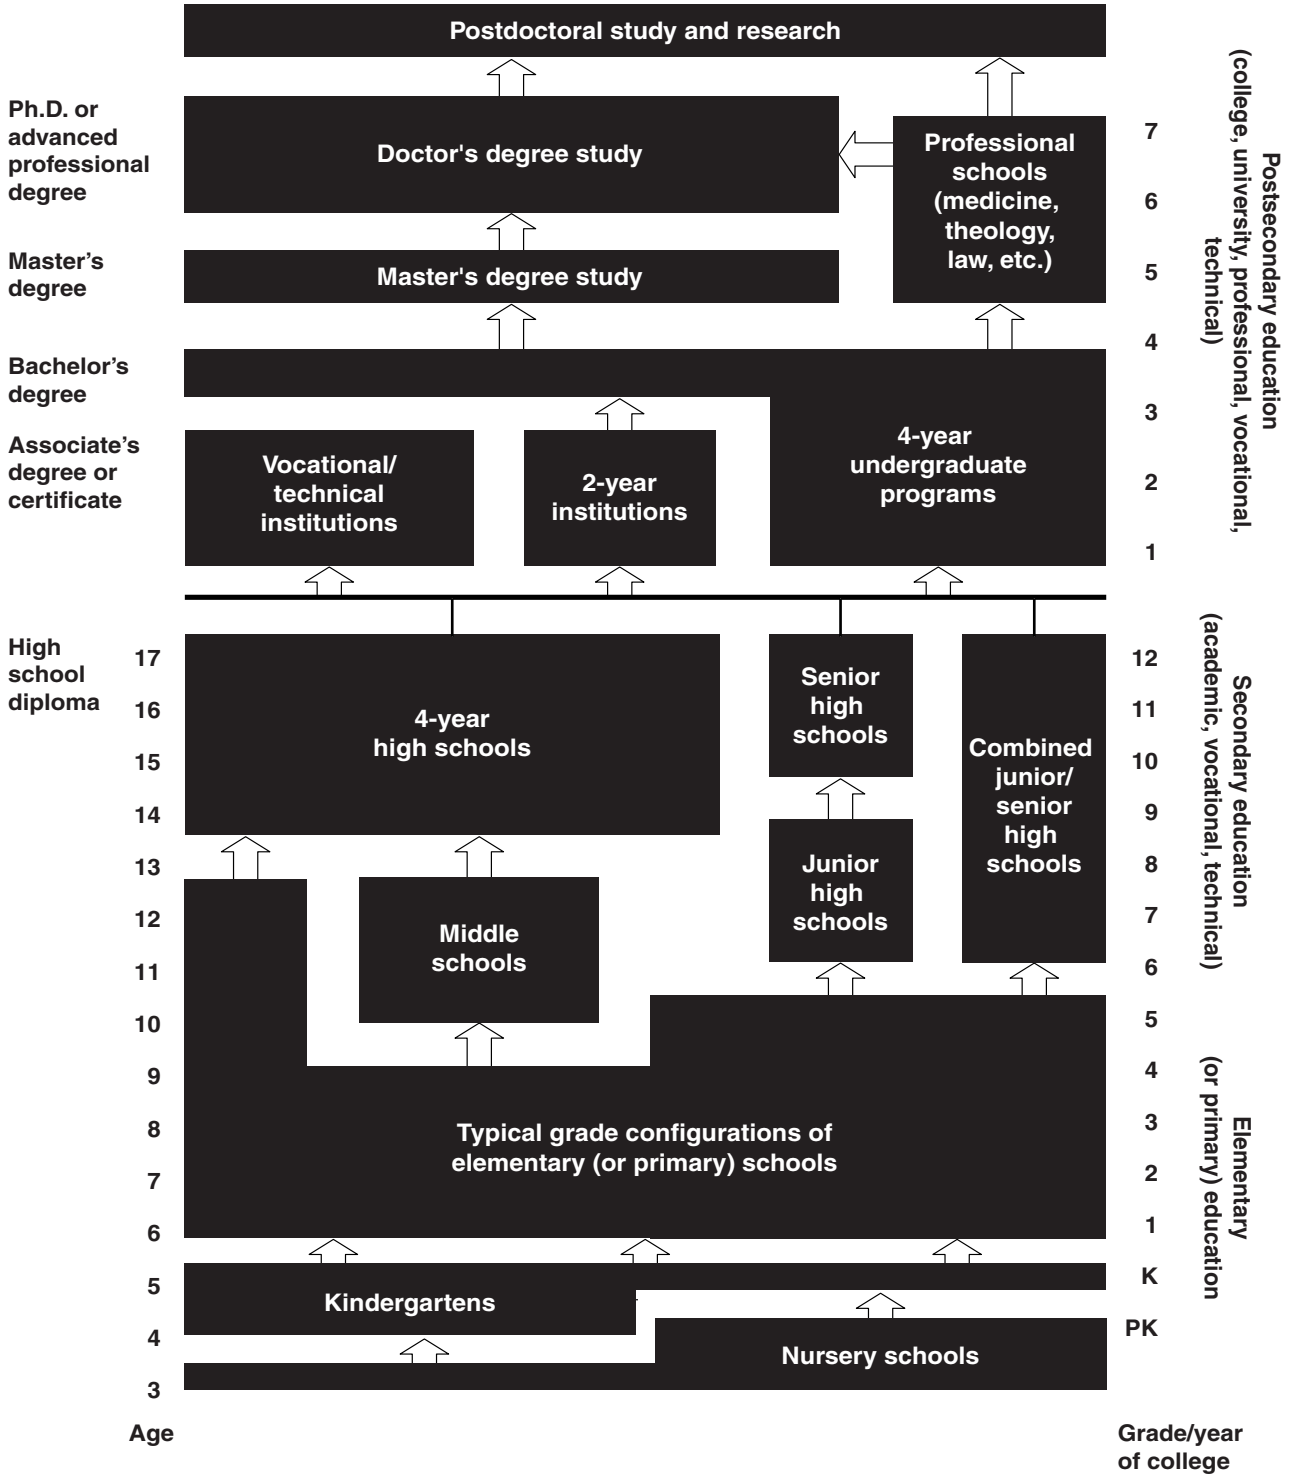
A projected 3.7 million elementary and secondary school full-time-equivalent (FTE) teachers were engaged in classroom instruction in the fall of 2009 (table 4), an increase of about 12 percent over 1999. The number of FTE public school teachers in 2009 was about 3.2 million, and the number of FTE private school teachers was about 0.5 million. FTE faculty at postsecondary degree-granting institutions totaled a projected 1.0 million in 2009, including 0.6 million at public institutions and 0.3 million at private institutions (table 1).

Expenditures

Expenditures of educational institutions rose to an estimated $1.1 trillion for the 2008–09 school year (table 27). Elementary and secondary schools spent about 60 percent of

this total ($661 billion), and colleges and universities spent the remaining 40 percent ($432 billion). After adjustment for inflation, total expenditures of all educational institutions rose by an estimated 39 percent between 1998–99 and 2008–09. Inflation-adjusted expenditures of elementary and secondary schools rose by an estimated 32 percent during this period, while those of colleges and universities rose by an estimated 51 percent. In 2008–09, expenditures of educational institutions were an estimated 7.6 percent of the gross domestic product (table 26).

Figure 1. The structure of education in the United States



NOTE: Figure is not intended to show relative number of institutions nor relative size of enrollment for the different levels of education. Figure reflects typical patterns of progression rather than all possible variations. Adult education programs, while not separately delineated above, may provide instruction at the adult basic, adult secondary, or postsecondary education levels.

[1]Includes enrollments in local public school systems and in most private schools (religiously affiliated and nonsectarian). Excludes homeschooled children who were not also enrolled in public and private schools. Based on the National Household Education Survey, the homeschooled children numbered approximately 1.5 million in 2007. Private elementary enrollment includes preprimary students in schools offering kindergarten or higher grades.
[2]Estimated.
[3]Data are actual.
NOTE: Degree-granting enrollment projections are based on the high alternative projections published by the National Center for Education Statistics. Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Appendix A: Guide to Sources for details.) Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

—Not available.
[1]Beginning in fall 1980, data include estimates for an expanded universe of private schools. Therefore, direct comparisons with earlier years should be avoided.
[2]Data for 1869–70 through 1949–50 include resident degree-credit students enrolled at any time during the academic year. Beginning in 1959, data include all resident and extension students enrolled at the beginning of the fall term.
[3]Estimated.
[4]Data for elementary and secondary are projected; data for degree-granting institutions are actual.
[5]Projected from *Projections of Education Statistics to 2018* (high alternative for degree-granting institutions).
NOTE: Data for 1869–70 through 1949–50 reflect enrollment for the entire school year. Elementary and secondary enrollment includes students in local public school systems and in most private schools (religiously affiliated and nonsectarian), but generally excludes homeschooled children and students in subcollegiate departments of colleges and in federal schools. Based on the National Household Education Survey, the homeschooled children numbered approximately 1.5 million in 2007. Excludes preprimary pupils in private schools that do not offer kindergarten or above. Postsecondary data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Appendix A: Guide to Sources for details.) Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

—Not available.
[1]Includes teachers in local public school systems and in most private schools (religiously affiliated and nonsectarian). Teachers are reported in terms of full-time equivalents.
[2]Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Appendix A: Guide to Sources for details.) Includes full-time and part-time faculty with the rank of instructor or above in colleges, universities, professional schools, and 2-year colleges. Excludes teaching assistants.
[3]Estimated.
[4]Inclusion of institutions is not consistent with surveys for 1987 and later years.
[5]Projected.
NOTE: Detail may not sum to totals because of rounding. Some data have been revised from previously published figures. Headcounts are used to report data for degree-granting institutions instructional staff.

—Not available.
†Not applicable.
[1]Includes special education, alternative, and other schools not classified by grade span. Because of changes in survey definitions, figures for "other" schools are not comparable from year to year.
[2]Data for 1980–81 and 1990–91 include schools with first or higher grades. Data for 1995–96 and later years include schools with kindergarten or higher grades.
[3]Included in other private school categories.
NOTE: Postsecondary data for 1980–81 and 1990–91 are for institutions of higher education, while later data are for Title IV degree-granting and non-degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Appendix A: Guide to Sources for details.) Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

NOTE: Includes enrollment in any type of graded public, parochial, or other private schools. Includes nursery schools, kindergartens, elementary schools, high schools, colleges, universities, and professional schools. Attendance may be on either a full-time or part-time basis and during the day or night. Enrollments in "special" schools, such as trade schools, business colleges, or correspondence schools, are not included. Beginning in 1994, preprimary enrollment was collected using new procedures and may not be comparable to figures for earlier years. Total includes persons from other racial/ethnic groups not shown separately. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, selected years, 1980 through 2008. (This table was prepared August 2009.)

Table 7. Percentage of the population 3 to 34 years old enrolled in school, by age group: Selected years, 1940 through 2008

—Not available.
†Not applicable.
[1]Preprimary enrollment collected using new procedures. Data may not be comparable to figures for earlier years.
NOTE: Data for 1940 are for April. Data for all other years are as of October. Includes enrollment in any type of graded public, parochial, or other private schools. Includes nursery schools, kindergartens, elementary schools, high schools, colleges, universities, and professional schools. Attendance may be on either a full-time or part-time basis and during the day or night. Enrollments in "special" schools, such as trade schools, business colleges, or correspondence schools, are not included. Standard errors appear in parentheses.

#Rounds to zero.
[1]Includes persons of Hispanic ethnicity for years prior to 1980.
[2]Data for years prior to 1993 are for persons with 4 or more years of high school. Data for later years are for high school completers—i.e., those persons who graduated from high school with a diploma, as well as those who completed high school through equivalency programs, such as a GED program.
[3]Data for years prior to 1993 are for persons with 4 or more years of college.
[4]Estimates based on Census Bureau reverse projection of 1940 census data on education by age.
NOTE: Totals include other racial/ethnic groups not separately shown. Race categories exclude persons of Hispanic ethnicity except where otherwise noted. Standard errors appear in parentheses.
SOURCE: U.S. Department of Commerce, Census Bureau, *U.S. Census of Population: 1960,* Vol. I, Part 1; 1960 Census Monograph, *Education of the American Population*, by John K. Folger and Charles B. Nam; Current Population Reports, Series P-20; various years; and Current Population Survey (CPS), March 1970 through March 2009. (This table was prepared September 2009.)

Table 9. Number of persons age 18 and over, by highest level of education attained, age, sex, and race/ethnicity: 2009

†Not applicable.
‡Reporting standards not met.
NOTE: Total includes other racial/ethnic groups not shown separately. Although cells with fewer than 75,000 weighted persons are subject to relatively wide sampling variation, they are included in the table to permit various types of aggregations; see Appendix A: Guide to Sources or http://www.census.gov/apsd/techdoc/cps/cps-main.html for information on calculating standard errors. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

#Rounds to zero.
[1]High school completers include diploma recipients and those completing through alternative credentials, such as a GED.
[2]Use of a 3-year average increases the sample size, thereby reducing the size of sampling errors and producing more stable estimates.
NOTE: Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

NOTE: Estimates are 3-year averages of 2005–07 data. Use of a 3-year average increases the sample size, thereby reducing the size of sampling errors and producing more stable estimates. Standard errors appear in parentheses. Detail may not sum to totals because of rounding.

—Not available.
[1]Included under Asian.
[2]Data on persons of two or more races were collected beginning in 2000. Direct comparability of the data (other than Hispanic) prior to 2000 with the data for 2000 and later years is limited by the extent to which people reporting more than one race in later years had been reported in specific race groups in earlier years.

NOTE: Resident population includes civilian population and armed forces personnel residing within the United States; it excludes armed forces personnel residing overseas. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures. Estimates as of July 1.

[1]As of April 1.
[2]Estimates as of July 1.
NOTE: Resident population includes civilian population and armed forces personnel residing within the United States and within each state; it excludes armed forces personnel residing overseas. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Commerce, Census Bureau, *Current Population Reports*, Series P-25, No. 1095; CPH-L-74 (1990 data); and 2000 through 2008 Population Estimates, retrieved September 23, 2009, from http://www.census.gov/popest/datasets.html. (This table was prepared September 2009.)

Table 18. Number and percentage distribution of family households, by family structure and presence of own children under 18: Selected years, 1970 through 2008

Family structure and presence of children	1970		1980		1990		2000		2005		2006		2007		2008		Change, 1970 to 1990	Change, 1990 to 2008
1	2		3		4		5		6		7		8		9		10	11
	Number (in thousands)																Percent change	
All families	**51,456**	**(257.3)**	**59,550**	**(271.4)**	**66,090**	**(307.8)**	**72,025**	**(311.6)**	**77,010**	**(226.6)**	**77,402**	**(226.9)**	**78,425**	**(227.5)**	**77,873**	**(240.1)**	**28.4**	**17.8**

†Not applicable.
‡Reporting standards not met.
[1]Adjusted by the Consumer Price Index research series using current methods (CPI-U-RS).
[2]Related children in a family include own children and all other children in the household who are related to the householder by birth, marriage, or adoption.
[3]Based on 1989 incomes collected in the 1990 census. Data may differ from figures derived from the Current Population Survey.
[4]Based on 1999 incomes collected in the 2000 census. Data may differ from figures derived from the Current Population Survey.
NOTE: Standard errors appear in parentheses. Standard errors in columns 12 and 13 cannot be shown with greater precision due to data source limitations.

—Not available.
†Not applicable.
‡Reporting standards not met.
[1]Included in "Other" in 1999 and 2003 data.
[2]Includes all other races or two or more races.
[3]GED=General Educational Development.
NOTE: Includes children enrolled in kindergarten through grade 12 and ungraded students. Excludes homeschooled children. The respondent was the parent most knowledgeable about the child's education. Responding parents reported on their own and their spouse's, or other household adults', activities. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.
SOURCE: U.S. Department of Education, National Center for Education Statistics, *Parent and Family Involvement in Education: 2002–03;* and Parent Survey (Parent:1999) and Parent and Family Involvement in Education Survey (PFI:2003 and 2007) of the National Household Education Surveys Program, unpublished tabulations. (This table was prepared August 2008.)

Table 24. Percentage of kindergartners through fifth-graders whose parents reported doing education-related activities with their children in the past month, by selected child, parent, and school characteristics: 1999, 2003, and 2007

Child, parent, and school characteristic	Visited a library						Went to a play, concert, or other live show						Visited an art gallery, museum, or historical site						Visited a zoo or aquarium						Attended an event sponsored by a community, religious, or ethnic group[1]

[1]In 1999 and 2007, a single item asked parents if they had attended an event sponsored by a community, ethnic, or religious group. In 2003, attendance at an event sponsored by a religious group was asked about separately from attendance at an event sponsored by a community or ethnic group.
[2]GED = General Educational Development.

NOTE: The respondent was the parent most knowledgeable about the child's education. Responding parents reported on their own activities and the activities of their spouse/other adults in the household. Excludes homeschooled children. Totals include other racial/ethnic groups not separately shown. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

[1]Estimated.
NOTE: Total expenditures for public elementary and secondary schools include current expenditures, interest on school debt, and capital outlay. Data for private elementary and secondary schools are estimated. Expenditures for colleges and universities in 1929–30 and 1939–40 include current-fund expenditures and additions to plant value. Public and private degree-granting institutions data for 1949–50 through 1995–96 are for current-fund expenditures. Data for private degree-granting institutions for 1996–97 and later years are for total expenditures. Data for public degree-granting institutions for 1996–97 through 2000–01 are for current expenditures; data for later years are for total expenditures. Data through 1995–96 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Appendix A: Guide to Sources for details.) Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

#Rounds to zero.

[1]Includes state and local government expenditures for education services, social services and income maintenance, transportation, public safety, environment and housing, governmental administration, interest on general debt, and other general expenditures.

[2]Includes assistance and subsidies to individuals, private elementary and secondary schools, and colleges and universities, as well as miscellaneous education expenditures.

NOTE: Current expenditure data in this table differ from figures appearing in other tables because of slightly varying definitions used in the Governmental Finances and Common Core of Data surveys. Detail may not sum to totals because of rounding. Standard errors appear in parentheses. Standard errors that are not shown are available upon request.

#Rounds to zero.
[1]Includes state and local government expenditures for education services, social services and income maintenance, transportation, public safety, environment and housing, governmental administration, interest on general debt, and other general expenditures.
[2]Includes assistance and subsidies to individuals, private elementary and secondary schools, and colleges and universities, as well as miscellaneous education expenditures.

NOTE: Per capita amounts are based on population figures as of July 2006. Detail may not sum to totals because of rounding.

—Not available.
[1]Data for years prior to 1963 include expenditures for government fiscal years ending during that particular calendar year. Data for 1963 and later years are the aggregations of expenditures for government fiscal years that ended on June 30 of the stated year. General expenditures exclude expenditures of publicly owned utilities and liquor stores, and of insurance-trust activities. Intergovernmental payments between state and local governments are excluded. Payments to the federal government are included.
[2]Constant dollars based on a chain-price index, which uses the geometric mean of output weights of adjacent time periods compiled over a time series. Chain-price indexes reflect changes in prices, while implicit price deflators reflect both changes in prices and in the composition of output.
[3]Population of the United States including armed forces overseas. Includes Alaska and Hawaii beginning in 1960.
[4]Resident population of the United States. Includes Alaska and Hawaii beginning in 1958. Data for 1990 and later years include revisions based on the 2000 census.
NOTE: Gross domestic product (GDP) data are adjusted by the GDP chained weight price deflator. Personal income data are adjusted by the personal consumption deflator. Some data have been revised from previously published figures.

CHAPTER 2
Elementary and Secondary Education

This chapter contains a variety of statistics on public and private elementary and secondary education. Data are presented for enrollments, teachers and other school staff, schools, dropouts, achievement, school violence, and revenues and expenditures. These data are derived from surveys conducted by the National Center for Education Statistics (NCES) and other public and private organizations. The information ranges from counts of students and schools to state graduation requirements.

Enrollments

Public elementary and secondary school enrollment rose from 48.2 million in 2002 to 49.3 million in 2007 (an increase of 2 percent), but enrollment at the elementary and secondary levels increased at different rates (table 37 and figure 6). Public elementary enrollment (prekindergarten through grade 8) was 0.3 percent higher in 2007 (34.2 million) than in 2002 (34.1 million), while public secondary enrollment was 7 percent higher in 2007 (15.1 million) than in 2002 (14.1 million). Enrollments in private elementary and secondary schools decreased by an estimated 5 percent between 2002 and 2007, from 6.2 million to 5.9 million (table 3).

In 2008, about 63 percent of 3- to 5-year-olds were enrolled in preprimary education (nursery school and kindergarten), similar to the proportion in 2000 (table 43 and figure 7). However, the percentage of children in full-day programs increased from 2000 to 2008. In 2008, about 58 percent of the children enrolled in preprimary education attended a full-day preprimary program, compared with 53 percent in 2000.

A higher percentage of 4-year-old children (57 percent) were cared for primarily in center-based programs during the day in 2005–06 than were cared for in home-based settings by their parents (20 percent), in home-based settings by relatives (13 percent), or in home-based settings by nonrelatives (8 percent) (table 46). There were differences in the average quality of care children received in these settings. A higher percentage of children in Head Start and other center-based programs (35 percent) received high-quality care than those in home-based relative and nonrelative care (9 percent), according to the ratings of trained observers (table 47).

The Individuals with Disabilities Education Act (IDEA), enacted in 1975, mandates that children and youth ages 3–21 with disabilities be provided a free and appropriate public school education. The percentage of total public school enrollment that represents children served by federally supported special education programs increased from 8.3 percent to 13.4 percent between 1976–77 and 2007–08 (table 50). Much of this overall increase can be attributed to a rise in the percentage of students identified as having specific learning disabilities from 1976–77 (1.8 percent) to 1990–91 (5.2 percent). The overall percentage of students being served in programs for those with disabilities remained relatively stable between 2002–03 (13.5 percent) and 2007–08 (13.4 percent). However, there were patterns of change in the percentages served with some specific conditions between 2002–03 and 2007–08. The percentage of children identified as having other health impairments (limited strength, vitality, or alertness due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes) rose from 0.8 to 1.3 percent of total public school enrollment; the percentage with autism rose from 0.3 to 0.6 percent; and the percentage with developmental delays rose from 0.6 to 0.7 percent. The percentage of children with specific learning disabilities declined from 5.9 percent to 5.2 percent of total public school enrollment during this period. In fall 2007, some 95 percent of 6- to 21-year-old students with disabilities were served in regular schools; 3 percent were served in a separate school for students with disabilities; 1 percent were placed in regular private schools by their parents; and less than 1 percent each were served in one of the following environments: in a separate residential facility, homebound or in a hospital, or in a correctional facility (table 51).

Teachers and Other School Staff

During the 1970s and early 1980s, public school enrollment decreased, while the number of teachers generally increased. For public schools, the number of pupils per teacher—that is, the pupil/teacher ratio[1]—declined from 22.3 in 1970 to 17.9 in 1985 (table 64 and figure 6). After 1985, the public school pupil/teacher ratio continued to decline, reaching 17.2 in 1989. After a period of relative stability during the

[1] The pupil/teacher ratio is based on all teachers—including teachers for students with disabilities and other special teachers—and all students enrolled in the fall of the school year. Unlike the pupil/teacher ratio, the average class size excludes students and teachers in classes that are exclusively for special education students. Class size averages are based on surveys of teachers reporting on the counts of students in their classes.

late 1980s through the mid-1990s, the ratio declined from 17.3 in 1995 to 16.0 in 2000. Decreases have continued since then, and the public school pupil/teacher ratio was 15.5 in 2007. By comparison, the pupil/teacher ratio for private schools was 13.0 in 2007. The average class size in 2007–08 was 20.0 pupils for public elementary schools and 23.4 pupils for public secondary schools (table 67).

In 2007–08, some 76 percent of public school teachers were female, 44 percent were under age 40, and 52 percent had a master's or higher degree (table 68). Compared with public school teachers, a lower percentage of private school teachers were female (74 percent), were under age 40 (39 percent), and had a master's or higher degree (38 percent).

Public school principals tend to be older and have more advanced credentials than public school teachers. In 2007–08, some 19 percent of public school principals were under age 40, and 99 percent of public school principals had a master's or higher degree (table 85). A lower percentage of principals than of teachers were female: about 50 percent of public school principals were female, compared with 76 percent of teachers.

From 1969–70 to 1980, there was an 8 percent increase in the number of public school teachers, compared with a 48 percent increase in the number of all other public school staff[2] (table B and table 80). Consequently, the percentage of staff who were teachers declined from 60 percent in 1969–70 to 52 percent in 1980. From 1980 to 2007, the number of teachers and the number of all other staff grew at more similar rates (46 and 53 percent, respectively) than they did in the 1970s. As a result, the proportion of teachers among total staff was 1 percentage point lower in 2007 than in 1980, in contrast to the decrease of 8 percentage points during the 1970s. Two staff categories increased more than 100 percent between 1980 and 2007—instructional aides, which rose 120 percent, and instructional coordinators, which rose 244 percent. Taken together, the percentage of staff with some instructional responsibilities (teachers and instructional aides) increased from 60 to 63 percent between 1980 and 2007. In 2007, there were 8 pupils per staff member (total staff) at public schools, compared with 10 pupils per staff member in 1980. At private schools in 2007, by comparison, the number of pupils per staff member was 7 (table 60).

Table B. Number of public school staff, by selected categories: 1969–70, 1980, and 2007

[In thousands]

Selected staff category	1969–70	1980	2007
Total	**3,361**	**4,168**	**6,216**
Teachers	2,016	2,184	3,178
Instructional aides	57	326	718
Instructional coordinators	32	21	71

[2] "All other public school staff" includes administrative staff, principals, librarians, guidance counselors, secretaries, custodial staff, food service workers, school bus drivers, and other professional and nonprofessional staff.

Schools

During most of the last century, the trend to consolidate small schools brought declines in the total number of public schools in the United States. In 1929–30, there were approximately 248,000 public schools, compared with about 99,000 in 2007–08 (table 86). But this number has been increasing in recent years: between 1997–98 and 2007–08, there was an increase of approximately 9,400 schools.

Since the early 1970s, public school systems have been shifting away from junior high schools (schools consisting of either grades 7 and 8 or grades 7 to 9) and toward middle schools (a subset of elementary schools beginning with grade 4, 5, or 6 and ending with grade 6, 7, or 8) (table 93). Although the number of all elementary schools (schools beginning with grade 6 or below and having no grade higher than 8) was 2 percent lower in 1997–98 than in 1970–71 (62,700 vs. 64,000), the number of middle schools was 426 percent higher in 1997–98 than in 1970–71 (10,900 vs. 2,100). During the same period, the number of junior high schools declined by 54 percent (from 7,800 in 1970–71 to 3,600 in 1997–98). Between 1997–98 and 2007–08, the number of all elementary schools rose by 7 percent to 67,000, while the subset of middle schools rose by 18 percent to 12,900. During the same period, the number of junior high schools declined by 15 percent to 3,000.

The average number of students in public elementary schools declined from 478 students in 1997–98 to 469 students in 2007–08 (table 95). The average enrollment size of public secondary schools increased from 699 students in 1997–98 to 722 in 2003–04, but then decreased to an average of 706 students in 2007–08. The average size of regular public secondary schools, which exclude alternative, special education, and vocational education schools, rose from 779 students to 816 between 1997–98 and 2007–08.

High School Graduates and Dropouts

About 3,295,000 high school students are expected to graduate during the 2009–10 school year (table 103), including 2,983,000 public school graduates and 311,000 private school graduates. High school graduates include only recipients of diplomas, not recipients of equivalency credentials. The 2009–10 projection of high school graduates is lower than the record-high projection of 3,329,000 graduates for 2008–09, but exceeds the high point during the baby boom era in 1975–76, when 3,142,000 students earned diplomas. In 2006–07, an estimated 73.9 percent of public high school students graduated on time—that is, received a diploma 4 years after beginning their freshman year (table 105).

The number of General Educational Development (GED) credentials issued by the states to GED test passers rose from 330,000 in 1977 to 487,000 in 2000 (table 107). A record number of 648,000 GED credentials were issued in 2001. In 2002, there were revisions to the GED test and to the data reporting procedures. In 2001, test takers were required to

successfully complete all five components of the GED or else begin the five-part series again with the new test that was introduced in 2002. Prior to 2002, reporting was based on summary data from the states on the number of GED credentials issued. As of 2002, reporting has been based on individual GED candidate- and test-level records collected by the GED Testing Service. In 2008, some 469,000 passed the GED tests, up from 330,000 in 2002, the first year of the new test series.[3]

The percentage of dropouts among 16- to 24-year-olds has shown some decreases over the past 20 years. This percentage, known as the status dropout rate, includes all people in the 16- to 24-year-old age group who are not enrolled in school and who have not completed a high school program, regardless of when they left school. (People who left school but went on to receive a GED credential are not treated as dropouts.) Between 1988 and 2008, the status dropout rate declined from 12.9 to 8.0 percent (table 108). Although the status dropout rate declined for both Blacks and Hispanics during this period, their rates (9.9 and 18.3 percent, respectively) remained higher than the rate for Whites (4.8 percent) in 2008. This measure is based on the civilian noninstitutionalized population, which excludes people in prisons, people in the military, and other people not living in households.

Achievement

Much of the student performance data in the *Digest* are drawn from the National Assessment of Educational Progress (NAEP). The NAEP assessments have been conducted using three basic designs: the national main NAEP, state NAEP, and long-term trend NAEP. The main NAEP reports current information for the nation and specific geographic regions of the country. The assessment program includes students drawn from both public and nonpublic schools and reports results for student achievement at grades 4, 8, and 12. The main NAEP assessments follow the frameworks developed by the National Assessment Governing Board and use the latest advances in assessment methodology. Because the assessment items reflect curricula associated with specific grade levels, the main NAEP uses samples of students at those grade levels.

Since 1990, NAEP assessments have also been conducted at the state level. Each participating state receives assessment results that report on the performance of students in that state. In its content, the state assessment is identical to the assessment conducted nationally. From 1990 through 2001, the national sample was a subset of the combined sample of students assessed in each participating state along with an additional sample from the states that did not participate in the state assessment. Since 2002, a combined sample of public schools has been selected for both state and national NAEP.

NAEP long-term trend assessments are designed to give information on the changes in the basic achievement level of America's youth since the early 1970s. They are administered nationally and report student performance in reading and mathematics at ages 9, 13, and 17. Measuring long-term trends of student achievement requires the precise replication of past procedures. For example, students of specific ages are sampled in order to maintain consistency with the original sample design. Similarly, the long-term trend instrument does not evolve based on changes in curricula or in educational practices. The differences in procedures between the main NAEP and the long-term trend NAEP mean that their results cannot be compared directly.

Reading

Reported on a scale of 0 to 500, NAEP long-term trend results in reading are available for 12 assessment years going back to the first in 1971. The average reading score for 9-year-olds was higher in 2008 than in all previous assessment years, increasing 4 points since 2004 and 12 points in comparison to 1971 (table 116). While the average score for 13-year-olds in 2008 was higher than in both 2004 and 1971, it was not significantly different from the scores in some assessment years in between. The average reading score for 17-year-olds was higher in 2008 than in 2004 but was not significantly different from the score in 1971.

White, Black, and Hispanic 9-, 13-, and 17-year-olds all had higher average reading scores in 2008 than they did in the first assessment year (which is 1975 for Hispanic students because separate data for Hispanics were not collected in 1971). At age 9, White, Black, and Hispanic students scored higher in 2008, on average, than in any previous assessment year. In comparison to 2004, average reading scores were higher in 2008 for White students at all three ages, for Black students at ages 9 and 13, and for Hispanic students at age 9. Reading results for 2008 continued to show gaps in scores between White and Black students (ranging from 21 to 29 points, depending on age) and between White and Hispanic students (ranging from 21 to 26 points). From 2004 to 2008, no significant changes were seen in these reading score gaps. However, the White-Black reading gap was smaller in 2008 than in 1971 at all three ages, and the White-Hispanic reading gap narrowed at ages 9 and 17 in comparison to 1975.

In 2008, female students continued to have higher average reading scores than male students at all three ages. The gap between male and female 9-year-olds was 7 points in 2008; this was not significantly different from the gap in 2004 but was narrower than the gap in 1971. The 8-point gender gap for 13-year-olds in 2008 was not significantly different from the gaps in either 2004 or in 1971. At age 17, the 11-point gap between males and females in 2008 was not significantly different from the gaps in any of the previous assessment years.

[3] Information on changes in GED test series and reporting is based on the 2003 edition of *Who Passed the GED Tests?,* by the GED Testing Service of the American Council on Education, as well as communication with staff of the GED Testing Service.

On the main NAEP reading assessment, reported on a scale of 0 to 500, national average scores of 4th- and 8th-graders were higher in 2007 than in 1992, by 4 and 3 points, respectively (table 123). These 2007 scores were also higher than the 2005 scores. The reading score of 12th-graders was 6 points lower in 2005 (the most recent assessment year for grade 12) than in 1992. In the most recent assessment, females at each grade level outscored their male counterparts. For example, 12th-grade females scored 13 points higher than males in 2005. Average scores were higher in 2007 than in 1992 for White, Black, Hispanic, and Asian/Pacific Islander 4th-graders (with increases ranging from 6 to 16 points) and for White, Black, and Hispanic 8th-graders (with increases ranging from 5 to 7 points), while scores were lower in 2005 than in 1992 for White, Black, and Hispanic 12th-graders (with decreases ranging from 5 to 7 points).

The 2007 main NAEP reading assessment of states found that the average reading proficiency of 4th- and 8th-graders in public schools varied across participating jurisdictions (the 50 states, the Department of Defense overseas and domestic schools, and the District of Columbia). For 4th-graders in public schools, the U.S. average score was 220, with average scores in participating jurisdictions ranging from 197 in the District of Columbia to 236 in Massachusetts (table 120). For 8th-graders in public schools, the U.S. average score was 261, with average scores in participating jurisdictions ranging from 241 in the District of Columbia to 273 in the Department of Defense schools, Massachusetts, and Vermont (table 121).

Mathematics

NAEP long-term trend mathematics results, reported on a scale of 0 to 500, are available for 11 assessment years, going back to the first in 1973. Average mathematics scores for 9- and 13-year-olds were higher in 2008 than in all previous assessment years (table 132). The average score for 9-year-olds in 2008 was 4 points higher than in 2004 and 24 points higher than in 1973. For 13-year-olds, the average score in 2008 was 3 points higher than in 2004 (based on unrounded scores) and 15 points higher than in 1973. In contrast, the average score for 17-year-olds in 2008 was not significantly different from the scores in 2004 and 1973.

White, Black, and Hispanic 9-, 13-, and 17-year-olds all had higher average mathematics scores in 2008 than in 1973. In comparison to 2004, average mathematics scores were higher in 2008 for White students at age 9. From 2004 to 2008, there were no significant changes in scores for 9-, 13-, and 17-year-old Black and Hispanic students or for 13- and 17-year-old White students. Mathematics results for 2008 continued to show score gaps between White and Hispanic students (ranging from 16 to 23 points, depending on age) and between White and Black students (ranging from 26 to 28 points). Across all three age groups, neither the White-Black gap nor the White-Hispanic gap in mathematics scores changed significantly from 2004 to 2008, but both were smaller in 2008 than in 1973.

While there was no significant difference between the average mathematics scores of male and female 9-year-olds in 2008, male students did score higher than female students at ages 13 and 17. At age 13, the 4-point gap between males and females in 2008 was not significantly different when compared to the gap in 2004, but it was larger than the gap in 1973. At age 17, the 5-point gender score gap in 2008 was not significantly different from the gaps in previous assessment years.

On the main NAEP mathematics assessment, gains in average scores seen in earlier years continued from 2007 to 2009 at grade 8 but not at grade 4. At grade 8, the average NAEP mathematics score (reported on a scale of 0 to 500) increased 2 points from 2007 to 2009 and was higher in 2009 than in any previous assessment year (table 138). At grade 4, the average score in 2009 was unchanged from the score in 2007 but still higher than the scores in the six assessment years from 1990 to 2005. From 2007 to 2009, no significant score changes occurred at grade 4 for males or females or for any of the racial/ethnic groups. At grade 8, average scores increased from 2007 to 2009 for both male and female students as well as for White, Black, Hispanic, and Asian/Pacific Islander students. For American Indian/Alaska Native 8th-graders, no measurable differences were detected in average scores over the assessment years.

The 2009 main NAEP assessment of states found that the average mathematics proficiency of public school 4th- and 8th-graders varied across participating jurisdictions (the 50 states, the Department of Defense overseas and domestic schools, and the District of Columbia). For 4th-graders in public schools, the U.S. average score was 239, with average scores in participating jurisdictions ranging from 219 in the District of Columbia to 251 in New Hampshire and 252 in Massachusetts (table 135). For 8th-graders in public schools, the U.S. average score was 282, with average scores in participating jurisdictions ranging from 254 in the District of Columbia to 299 in Massachusetts (table 136).

Science

NAEP has assessed the science abilities of students in grades 4, 8, and 12 since 1996, using a separate scale of 0 to 300 for each grade. From 1996 to 2005, the national average 4th-grade science score increased from 147 to 151, there was no measurable change in the 8th-grade score, and the 12th-grade score decreased from 150 to 147 (table 140). Certain subgroups outperformed others in science in 2005. For example, males outperformed females at all three grades. White students scored higher, on average, than Black and Hispanic students at all three grades in 2005. At 4th grade, average scores were higher for White, Black, Hispanic, and Asian/Pacific Islander students in 2005 than in 1996. At 8th grade, the average score for Black students was higher in 2005 than in 1996, but no measurable increases occurred for other racial/ethnic groups from 1996 to 2005. At 12th grade,

there were no measurable changes in average scores for any racial/ethnic group when comparing results from 2005 with those from 1996. Asian/Pacific Islander 4th-graders' results from 2000 are not included because reporting standards were not met.

Skills of Young Children

In addition to student performance data available through NAEP, the *Digest* presents data from other surveys to provide additional perspectives on student achievement. Differences among demographic groups in the acquisition of mental skills have been demonstrated at relatively early ages (table 112). In 2003–04, about 64 percent of 2-year-olds demonstrated skill in expressive vocabulary, which measured toddlers' ability to communicate using gestures, words, and sentences. A higher percentage of females (69 percent) demonstrated expressive vocabulary than males (59 percent). Also, a higher percentage of White 2-year-olds (71 percent) demonstrated expressive vocabulary than Black, Hispanic, or American Indian/Alaska Native 2-year-olds (56, 54, and 50 percent, respectively). The percentage of 2-year-olds from families with high socioeconomic status (SES) who demonstrated expressive vocabulary (75 percent) was higher than the percentage of children from low-SES families who did so (52 percent). Similar patterns of differences were observed by race/ethnicity and SES for children at about 4 years of age (table 113). White (14.2) and Asian (17.5) 48- to 57-month-old children had higher literacy scores than Black (12.0), Hispanic (10.7), and American Indian/Alaska Native (9.6) children. Also, high-SES children (18.0) had higher average literacy scores than low-SES children (9.2). These same patterns were observed among 48- to 57-month-old children with respect to average mathematics scores.

SAT Scores of College-Bound Seniors

The SAT (formerly known as the Scholastic Assessment Test and the Scholastic Aptitude Test) is not designed as an indicator of student achievement, but rather as an aid for predicting how well students will do in college. Between 1998–99 and 2004–05, the mathematics SAT average score increased by 9 points, but it declined by 5 points between 2004–05 and 2008–09 (table 144). The critical reading average score in 2008–09 was 4 points lower than in 1998–99.

Coursetaking in High School

The average number of science and mathematics courses completed by public high school graduates increased between 1982 and 2005. The average number of mathematics courses (Carnegie units) completed in high school rose from 2.6 in 1982 to 3.7 in 2005, and the number of science courses rose from 2.2 to 3.3 (table 149). The average number of courses in career/technical areas completed by all high school graduates was lower in 2005 (4.0 units) than in 1982 (4.6 units). As a result of the increased academic course load, the percentage of students completing the 1983 National Commission on Excellence recommendations for college-bound students (4 units of English, 3 units of social studies, 3 units of science, 3 units of mathematics, 2 units of foreign language, and .5 units of computer science) rose from 2 percent in 1982 to 36 percent in 2005 (table 153).

School Violence

In 2007–08, about 85 percent of public schools had a criminal incident, which is defined as a serious violent crime or a less serious crime such as a fight without weapons, theft, or vandalism (table 159). The percentage of schools having a criminal incident in 2007–08 was about the same as the percentage in 1999–2000 (86 percent). In 2007–08, some 75 percent of schools reported one or more violent incidents, 47 percent of schools reported one or more thefts/larcenies, and 67 percent reported other types of incidents. Overall, there were 4 criminal incidents reported per 100 students.

Revenues and Expenditures

The state share of revenues for public elementary and secondary schools generally grew from the 1930s through the mid-1980s, while the local share declined during the same time period (table 172 and figure 9). However, this pattern changed in the late 1980s, when the local share began to increase at the same time the state share decreased. Between 1986–87 and 1993–94, the state share declined from 49.7 percent to 45.2 percent, while the local share rose from 43.9 percent to 47.8 percent. Between 1993–94 and 2000–01, the state share rose again to 49.7 percent, the highest share since 1986–87, but declined every school year thereafter until 2005–06, when the state share was 46.5 percent. Between 1995–96 and 2005–06, the federal share of revenues rose from 6.6 to 9.1 percent. The local share declined from 45.9 percent in 1995–96 to 42.8 in 2002–03 and then increased each year, reaching 44.4 percent in 2005–06. Between 2005–06 and 2006–07, these patterns shifted. The federal percentage declined from 9.1 to 8.5 percent and the local percentage declined from 44.4 to 43.9 percent. In contrast, the state percentage rose from 46.5 to 47.6 percent.

After adjustment for inflation, current expenditures per student in fall enrollment at public schools rose during the 1980s, remained stable during the first part of the 1990s, and rose again after 1992–93 (table 182 and figure 10). There was an increase of 37 percent from 1980–81 to 1990–91; a change of less than 1 percent from 1990–91 to 1994–95 (which resulted from small decreases at the beginning of this period, followed by small increases after 1992–93); and an increase of 29 percent from 1994–95 to 2006–07. In 2006–07, current expenditures per student in fall enrollment were $9,683 in unadjusted dollars. In 2006–07, some 56 percent of students in public schools were transported at public expense at a cost of $779 per pupil, also in unadjusted dollars (table 176).

[1]Data on population and labor force are from the Census Bureau, and data on personal income and national income are from the Bureau of Economic Analysis, U.S. Department of Commerce. Population data through 1900 are based on total population from the decennial census. From 1909–10 to 1959–60, population data are total population, including armed forces overseas, as of July 1. Data for later years are for resident population that excludes armed forces overseas.
[2]Data for 1869–70 through 1959–60 are school year enrollment. Data for later years are fall enrollment.
[3]Data for 1870–71.
[4]Estimated by the National Center for Education Statistics.
[5]Prior to 1919–20, data are for the number of different persons employed rather than number of positions.
[6]Prior to 1919–20, includes interest on school debt.
[7]Because of the modification of the scope of "current expenditures for elementary and secondary schools," data for 1959–60 and later years are not entirely comparable with prior years.
[8]Beginning in 1969–70, includes capital outlay by state and local school building authorities.
[9]Includes summer schools, community colleges, and adult education. Beginning in 1959–60, also includes community services, formerly classified with "current expenditures for elementary and secondary schools."
[10]Excludes community colleges and adult education.
[11]Prior to 1959–60, average includes supervisors, principals, teachers, and other nonsupervisory instructional staff. Data for 1959–60 and later years are estimated by the National Education Association.
[12]Excludes current expenditures not allocable to pupil costs.
[13]"ADA" means average daily attendance in elementary and secondary schools.
[14]Expenditure figure is the sum of current expenditures allocable to pupil costs, capital outlay, and interest on school debt.
[15]Per-day rates derived by dividing annual rates by average length of term.
[16]Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.
NOTE: Some data have been revised from previously published figures. Beginning in 1959–60, data include Alaska and Hawaii. Detail may not sum to totals because of rounding.

NOTE: Because of changes in reporting practices and imputation of data for nonrespondents since 1992, prekindergarten enrollment data for 1992 and later years are not comparable to prekindergarten enrollment data for prior years. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

#Rounds to zero.
!Interpret data with caution.
[1]Refers to all students in public and private schools and homeschooled students.
[2]Students whose grade-equivalent was 'ungraded' were excluded from the grade analysis. The percentage of students with an 'ungraded' grade equivalent was 0.03 percent in 1999 and 0.02 percent in 2003 and 2007.
[3]Urbanicity is based on a U.S. Census Bureau classification of places. Urban is a place with at least 50,000 people. Rural is a place not classified as urban.

NOTE: The number and percentage of homeschoolers exclude students who were enrolled in school for more than 25 hours a week; also excluded in 1999 and 2003 are students who were homeschooled only due to a temporary illness and, in 2007, students who were homeschooled primarily due to a temporary illness. Some data have been revised from previously published figures. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

!Interpret data with caution.
[1]Excludes students who were enrolled in school for more than 25 hours a week; also excluded in 1999 and 2003 are students who were homeschooled only due to a temporary illness and, in 2007, students who were homeschooled primarily due to a temporary illness.
[2]Students whose grade-equivalent was "ungraded" were excluded from the grade analysis. The percentage of students with an "ungraded" grade equivalent was 0.03 percent in 1999 and 0.02 percent in 2003 and 2007.
[3]Urbanicity is based on a U.S. Census Bureau classification of places. Urban is a place with at least 50,000 people. Rural is a place not classified as urban.
NOTE: Data are based on parent reports. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures. Standard errors appear in parentheses.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Parent Survey (Parent:1999) and Parent and Family Involvement in Education Survey (PFI:2003 and PFI:2007) of the National Household Education Surveys Program. (This table was prepared August 2009.)

#Rounds to zero.
NOTE: Percentage distribution based on students for whom race/ethnicity was reported, which may be less than the total number of students in the state. Race categories exclude persons of Hispanic ethnicity. DoD = Department of Defense. Detail may not sum to totals because of rounding.

—Not available.
[1]U.S. total includes imputation for nonreporting state.
[2]Imputation for survey nonresponse.
NOTE: Table reflects counts of students enrolled in schools for which both enrollment data and free/reduced price lunch eligibility data were reported.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Public Elementary/Secondary School Universe Survey," 2000–01, 2005–06, 2006–07, and 2007–08. (This table was prepared September 2009.)

Table 43. Enrollment of 3-, 4-, and 5-year-old children in preprimary programs, by level of program, control of program, and attendance status: Selected years, 1965 through 2008

[Numbers in thousands]

Year and age	Total population, 3 to 5 years old		Enrollment by level and control										Enrollment by attendance					
							Nursery school				Kindergarten							
			Total		Percent enrolled		Public		Private		Public		Private		Full-day		Part-day		Percent full-day

[1]Data collected using new procedures. Data may not be comparable with figures prior to 1994.
[2]Enrollment data include only those students in preprimary programs.
NOTE: Data are based on sample surveys of the civilian noninstitutional population. Although cells with fewer than 75,000 children are subject to wide sampling variation, they are included in the table to permit various types of aggregations. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.
SOURCE: U.S. Department of Education, National Center for Education Statistics, *Preprimary Enrollment*, 1965, 1970, and 1975. U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1980 through 2008. (This table was prepared August 2009.)

Table 44. Number of children under 6 years old and not yet enrolled in kindergarten, percentage in center-based programs, average weekly hours in nonparental care, and percentage in various types of primary care arrangements, by selected child and family characteristics: 2005

Selected child and family characteristic	Number of children, ages 0 to 5 (in thousands)	Percent in center-based programs	Average hours per week in nonparental care[1]	Percentage distribution, by type of primary care arrangement						
					Nonparental care					
					Center-based care		Nonrelative care			
				Parental care only	Head Start	Other center-based	Family child care (in another home)	Sitter (in child's home)	Relative	Multiple arrangements[2]

†Not applicable.
#Rounds to zero.
[1]Mean hours per week per child, among preschool children enrolled in any type of nonparental care arrangement. For children with more than one arrangement, the hours of each weekly arrangement were summed to calculate the total amount of time in child care per week.
[2]Children who spend equal hours per week in multiple nonparental care arrangements.
[3]Excludes children living apart from their parents.
[4]Excludes children living in households with no mother or female guardian present.
[5]Poverty status was determined by household income and number of persons in household.
NOTE: A child's "primary arrangement" was defined as the regular nonparental care arrangement or early childhood education program in which the child spent the most time per week. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Early Childhood Program Participation Survey of the National Household Education Surveys Program (ECPP-NHES:2005). (This table was prepared October 2006.)

†Not applicable.
[1]Center-based programs include day care centers, nursery schools, prekindergartens, preschools, and Head Start programs.
NOTE: Row percents for nonparental and parental care do not add to 100 percent because some children participated in more than one type of nonparental care arrangement. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Early Childhood Education Survey, Parent Survey, and Early Childhood Program Participation Survey of the National Household Education Surveys Program (ECE-NHES:1991; Parent-NHES:1999; and ECPP-NHES:1995, 2001, and 2005). (This table was prepared July 2006.)

Table 46. Percentage distribution of children at about 2 and 4 years of age, by type of child care arrangement and selected child and family characteristics: 2003–04 and 2005–06

Selected characteristic	Children at about 2 years of age in 2003–04												Children at about 4 years of age in 2005–06

†Not applicable.
‡Reporting standards not met.
[1]Distribution of weighted Early Childhood Longitudinal Study, Birth Cohort survey population with data on primary care arrangements.
[2]Primary type of care arrangement is the type of nonparental care in which the child spent the most hours.
[3]Care provided in the child's home or in another private home by a relative (excluding parents).
[4]Care provided in the child's home or in another private home by a person unrelated to the child.
[5]Care provided in places such as early learning centers, nursery schools, and preschools, including Head Start.
[6]Children who spent an equal amount of time in each of two or more arrangements.
[7]Distribution of weighted Early Childhood Longitudinal Study, Birth Cohort survey population between 44 and 65 months of age with data on primary care arrangements.
[8]Poverty status based on Census Bureau guidelines from 2002, which identify a dollar amount determined to meet a household's needs, given its size and composition. In 2002, a family of four was considered to live below the poverty threshold if its income was less than or equal to $18,392.
[9]Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income.
NOTE: Data are based on a representative sample of children born in 2001. Estimates for children at about 2 years of age weighted by W2R0. Estimates for children at about 4 years of age weighted by W3R0. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and suppression of cells that do not meet standards. Standard errors appear in parentheses.

†Not applicable.
#Rounds to zero.
‡Reporting standards not met.
[1]Primary type of care arrangement is the type of nonparental care in which the child spent the most hours.
[2]Care provided in the child's home or in another private home by a relative (excluding parents) or by a person unrelated to the child.
[3]Quality rating based on the Family Day Care Rating Scale (FDCRS). Low quality = score of 1 but less than 3. Medium quality = score of 3 but less than 5. High quality = score of 5 to 7.
[4]Quality rating based on the Early Childhood Environment Rating Scale (ECERS). Low quality = score of 1 but less than 3. Medium quality = score of 3 but less than 5. High quality = score of 5 to 7.
[5]Care provided in places such as early learning centers, nursery schools, and preschools, not classified as Head Start.
[6]Poverty status based on Census Bureau guidelines from 2002, which identify a dollar amount determined to meet a household's needs, given its size and composition. In 2002, a family of four was considered to live below the poverty threshold if its income was less than or equal to $18,392.
[7]Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income.

NOTE: Estimates weighted by W33P0. Estimates pertain to children assessed between 44 months and 65 months of age. Rating is for child's primary type of care arrangement, which was the type of nonparental care in which the child spent the most hours. Children who were primarily cared for by parents or in multiple arrangements are not included in this table. Ratings of care arrangement quality using both the FDCRS and ECERS scales were based on interviewer observations of children's interactions with adults and peers, children's exposure to materials and activities, the extent to which and the manner in which routine care needs were met, and the furnishings and displays in the classroom. The FDCRS and ECERS metrics are designed to be equivalent. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and suppression of cells that do not meet standards. Standard errors appear in parentheses.

†Not applicable.
[1]The respondent was the parent most knowledgeable about the child's care and education. Responding parents reported on their own activities and the activities of their spouse/other adults in the household.
[2]In 1993, there were two versions of the survey question that asked how often the child was read to. Each respondent was asked one version of the question. Percentages represent all respondents who indicated a frequency of three or more times in the past week in response to either version of the question.
[3]Excludes children living in households with no mother or female guardian present.
[4]Poverty status was determined by household income and number of persons in household.
NOTE: Totals include other racial/ethnic groups not separately shown. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses. Some data have been revised from previously published figures.

#Rounds to zero.
[1]Data do not include Vermont, for which 2007–08 data were not available. In 2006–07, the total number of 3- to 21-year-olds served in Vermont was 14,010.
[2]Other health impairments include having limited strength, vitality, or alertness due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes.
[3]Prior to 1990–91 and after 1999–2000, preschool children are included in the counts by disability condition. For other years, preschool children are not included in the counts by disability condition, but are separately reported.
[4]Based on the total enrollment in public schools, prekindergarten through 12th grade.
NOTE: Prior to October 1994, children and youth with disabilities were served under Chapter 1 of the Elementary and Secondary Education Act as well as under the Individuals with Disabilities Education Act (IDEA), Part B. Data reported in this table for years prior to 1994–95 include children ages 0–21 served under Chapter 1. Data are for the 50 states and the District of Columbia only. Increases since 1987–88 are due in part to new legislation enacted in fall 1986, which added a mandate for public school special education services for 3- to 5-year-old disabled children. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

[1]Percentage of students with disabilities is based on the total enrollment in public schools, prekindergarten through 12th grade.

NOTE: Prior to October 1994, children and youth with disabilities were served under Chapter 1 of the Elementary and Secondary Education Act as well as under the Individuals with Disabilities Education Act (IDEA), Part B. Data reported in this table for 1990–91 include children ages 0–21 served under Chapter 1. Some data have been revised from previously published figures. U.S. totals for 2007–08 do not include data for Vermont.

SOURCE: U.S. Department of Education, Office of Special Education Programs, *Annual Report to Congress on the Implementation of the Individuals with Disabilities Education Act*, selected years, 1992 through 2007, and Individuals with Disabilities Education Act (IDEA) database, retrieved April 21, 2009, from http://www.ideadata.org/PartBdata.asp. National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 2007–08. (This table was prepared September 2009.)

Table 53. Number of gifted and talented students in public elementary and secondary schools, by sex, race/ethnicity, and state: 2004 and 2006

†Not applicable.
#Rounds to zero.
!Interpret data with caution.
[1]Data are based on universe counts of schools and school districts; therefore, these figures do not have standard errors.
[2]Data for 2006 are based on universe counts of schools and school districts; therefore, these figures do not have standard errors.
NOTE: Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses. Detail may not sum to totals because of rounding.

—Not available.
[1]Includes a relatively small number of secondary ungraded students.
[2]Data for 1890 through 1950 are from the decennial censuses of population. Later data are Census Bureau estimates as of July 1 preceding the opening of the school year.
[3]Gross enrollment ratio based on school enrollment of all ages in grades 9 to 12 divided by the 14- to 17-year-old population. Differs from enrollment rates in other tables, which are based on the enrollment of persons in the given age group only.
[4]Data are for 1927–28.
[5]Data are for 1940–41.
[6]Estimated.
[7]Projected.
NOTE: Includes enrollment in public schools that are a part of state and local school systems and also in most private schools, both religiously affiliated and nonsectarian. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

#Rounds to zero.
[1]Estimated.
[2]Includes enrollment in ancient Greek (not shown separately). Fewer than 1,000 students were enrolled in this language in each of the years shown.
[3]Until 1990, student enrollment in Japanese courses was included in the Other modern foreign languages category.
[4]Includes students enrolled in unspecified modern foreign languages. Since 1990, enrollment in Japanese courses is reported as a separate category.
NOTE: Percent change computed from unrounded numbers.

†Not applicable.
#Rounds to zero.
!Interpret data with caution; the coefficient of variation is greater than 30 percent.
[1]Based on students regularly enrolled in the districts. Enrollments may include duplicated counts of students, since districts were instructed to count a student enrolled in multiple courses for each course in which he or she was enrolled.
[2]Combined or ungraded schools are those in which the grades offered in the school span both elementary and secondary grades or that are not divided into grade levels.
NOTE: Percentages are based on unrounded numbers. Percentages are based on the estimated 89,310 and 89,610 public schools in the nation in 2002–03 and 2004–05, respectively. For the 2002–03 FRSS study sample, there were 3 cases for which district enrollment size was missing and 112 cases for which poverty concentration was missing. For the 2004–05 FRSS study sample, there were 7 cases for which district enrollment size was missing and 103 cases for which poverty concentration was missing. Detail may not sum to totals because of rounding or missing data. Some data have been revised from previously published figures. Standard errors appear in parentheses.

†Not applicable.
#Rounds to zero.
[1]Includes students in prekindergarten through grade 12 in schools that offer kindergarten or higher grade.
[2]Race/ethnicity is not known for an estimated 837,719 prekindergarten private school students. Percentage distribution is calculated based on the students for whom race/ethnicity is known.
[3]Reported in full-time equivalents (FTE). Excludes teachers who teach only prekindergarten students.
NOTE: Includes special education, vocational/technical education, and alternative schools. Tabulation includes schools that offer kindergarten or higher grade. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Private School Universe Survey (PSS), 2007–08. (This table was prepared June 2009.)

Table 59. Private elementary and secondary enrollment, number of schools, and average tuition, by school level, orientation, and tuition: 1999–2000, 2003–04, and 2007–08

School orientation and tuition	Kindergarten through 12th-grade enrollment[1]								Schools								Average tuition charged to students[2] (in current dollars)

†Not applicable.
‡Reporting standards not met.
[1]Only includes kindergarten students who attend schools that offer first or higher grade.
[2]Tuition weighted by the number of students enrolled in schools.
NOTE: Excludes schools not offering first or higher grade. Elementary schools have grade 6 or lower and no grade higher than 8. Secondary schools have no grade lower than 7. Combined schools have grades lower than 7 and higher than 8. Excludes prekindergarten students. Includes schools reporting tuition of 0. Detail may not sum to totals because of rounding and cell suppression. Standard errors appear in parentheses.

†Not applicable.
!Interpret data with caution.
‡Reporting standards not met.
[1]Includes schools beginning with grade 6 or below and with no grade higher than 8.
[2]Schools with no grade lower than 7.
[3]Schools with grades lower than 7 and higher than 8.
[4]Includes student support services professional staff, such as school psychologists, social workers, and speech therapists or pathologists.
[5]Includes other employees not identified by function.
NOTE: Data are based on a sample survey and may not be strictly comparable with data reported elsewhere. Excludes all prekindergarten students from calculations, but includes kindergarten students attending schools that offer first or higher grade. Includes only schools that offer first or higher grade. Standard errors appear in parentheses. Detail may not sum to totals because of rounding.

[1]Elementary enrollment is for kindergarten through grade 8, and secondary enrollment is for grades 9 through 12.
[2]From 1919-20 through fall 1960, includes part-time teachers. From 1969-70 through 1993-94, excludes part-time teachers. Beginning in 1994-95, reported in full-time equivalents (FTE). Prekindergarten teachers not counted separately, but may be included with elementary teachers.
[3]Includes middle schools.
[4]Prekindergarten enrollment was not reported separately, but may be included in elementary enrollment.
[5]Includes estimates for the nonreporting schools.
[6]Excludes the Archdiocese of New Orleans.
NOTE: Data collected by the National Catholic Educational Association and data collected by the National Center for Education Statistics are not directly comparable because survey procedures and definitions differ. Some data have been revised from previously published figures.

†Not applicable.
!Interpret data with caution.
‡Reporting standards not met.
[1]Reported in full-time equivalents (FTE). Excludes teachers who teach only prekindergarten students.
NOTE: Includes special education, vocational/technical education, and alternative schools. Tabulation includes schools that offer kindergarten or higher grade. Includes enrollment of students in prekindergarten though grade 12 in schools that offer kindergarten or higher grade. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Private School Universe Survey (PSS), various years, 1997–98 through 2007–08. (This table was prepared June 2009.)

Table 63. Public elementary and secondary pupil/teacher ratios, by enrollment school size, type, percentage of students eligible for free or reduced-price lunch, locale, and level of school: Fall 1987 through fall 2007

—Not available.
[1]Located inside an urbanized area and inside a principal city with a population of at least 250,000.
[2]Located inside an urbanized area and inside a principal city with a population of at least 100,000, but less than 250,000.
[3]Located inside an urbanized area and inside a principal city with a population less than 100,000.
[4]Located inside an urbanized area and outside a principal city with a population of 250,000 or more.
[5]Located inside an urbanized area and outside a principal city with a population of at least 100,000, but less than 250,000.
[6]Located inside an urbanized area and outside a principal city with a population less than 100,000.
[7]Located inside an urban cluster that is 10 miles or less from an urbanized area.
[8]Located inside an urban cluster that is more than 10 but less than or equal to 35 miles from an urbanized area.
[9]Located inside an urban cluster that is more than 35 miles from an urbanized area.
[10]Located outside any urbanized area or urban cluster, but 5 miles or less from an urbanized area or 2.5 miles or less from an urban cluster.
[11]Located outside any urbanized area or urban cluster and more than 5 miles but less than or equal to 25 miles from an urbanized area, or more than 2.5 miles but less than or equal to 10 miles from an urban cluster.
[12]Located outside any urbanized area or urban cluster, more than 25 miles from an urbanized area, and more than 10 miles from an urban cluster.
NOTE: Pupil/teacher ratios are based on data reported by types of schools rather than by instructional programs within schools. Only includes schools that reported both enrollment and teacher data. Ratios are based on data reported by schools and may differ from data reported in other tables that reflect aggregate totals reported by states.

[1]Estimated.
[2]Projected.
NOTE: Data for teachers are expressed in full-time equivalents (FTE). Counts of private school teachers and enrollment include prekindergarten through grade 12 in schools offering kindergarten or higher grades. Counts of public school teachers and enrollment include prekindergarten through grade 12. The pupil/teacher ratio includes teachers for students with disabilities and other special teachers, while these teachers are generally excluded from class size calculations. Ratios for public schools reflect totals reported by states and differ from totals reported for schools or school districts. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

—Not available.
[1]Data have been revised from previously published figures.
[2]Includes imputed values for states.
[3]Includes imputations for underreporting of prekindergarten teachers.
[4]Imputed.

NOTE: Distribution of elementary and secondary teachers determined by reporting units. Teachers reported in full-time equivalents (FTE). DoD = Department of Defense.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 2000–01 through 2007–08. (This table was prepared September 2009.)

Table 66. Teachers, enrollment, and pupil/teacher ratios in public elementary and secondary schools, by state or jurisdiction: Selected years, fall 2000 through fall 2007

State or jurisdiction	Pupil/teacher ratio				Fall 2005			Fall 2006[1]			Fall 2007		
	Fall 2000	Fall 2002	Fall 2003	Fall 2004[1]	Teachers	Enrollment	Pupil/ teacher ratio	Teachers	Enrollment	Pupil/ teacher ratio	Teachers	Enrollment	Pupil/ teacher ratio

—Not available.
[1]Data have been revised from previously published figures.
[2]Includes imputed values for states.
[3]Includes imputations for underreporting of prekindergarten teachers/enrollment.
[4]Imputed.

NOTE: Teachers reported in full-time equivalents (FTE). DoD = Department of Defense.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 2000–01 through 2007–08. (This table was prepared September 2009.)

Table 67. Highest degree earned, years of full-time teaching experience, and average class size for teachers in public elementary and secondary schools, by state: 2007–08

State	Total number of teachers (in thousands)		Percent of teachers, by highest degree earned[1]								Percent of teachers, by years of full-time teaching experience								Average class size, by level of instruction[2]			
			Bachelor's		Master's		Education specialist[3]		Doctor's		Less than 3		3 to 9		10 to 20		Over 20		Elementary		Secondary	
1	2		3		4		5		6		7		8		9		10		11		12

†Not applicable.
‡Reporting standards not met.
[1]Teachers with less than a bachelor's degree are not shown separately.
[2]Elementary teachers are those who taught self-contained classes at the elementary level, and secondary teachers are those who taught departmentalized classes (e.g., science, art, social science, or other course subjects) at the secondary level. Teachers were classified as elementary or secondary on the basis of the grades they taught, rather than on the level of the school in which they taught.
[3]Includes certificate of advanced graduate studies.
NOTE: Data are based on a head count of all teachers rather than on the number of full-time-equivalent teachers appearing in other tables. Excludes prekindergarten teachers. Standard errors appear in parentheses. Detail may not sum to totals because of rounding, cell suppression, and omitted categories (less than bachelor's).

—Not available.
†Not applicable.
‡Reporting standards not met.
[1]Includes certificate of advanced graduate studies.
[2]Data for 1999–2000 are only roughly comparable to data for later years, because the new category of two or more races was introduced in 2003–04.
[3]Includes Pacific Islander.
[4]Included under other elementary.
[5]Included under other secondary.
NOTE: Excludes prekindergarten teachers. Data are based on a head count of full-time and part-time teachers rather than on the number of full-time-equivalent teachers reported in other tables. Detail may not sum to totals because of rounding and cell suppression. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

—Not available.
[1]Figures for curriculum specialist or professional diploma based on 6 years of college study are not included.
[2]Measured in semester hours.
[3]Includes extra pay for extra duties.

NOTE: Data are based on sample surveys of public school teachers. See Appendix A: Guide to Sources for information on interpreting data from this survey. Data differ from figures appearing in other tables because of varying survey processing procedures and time period coverages. Detail may not sum to totals because of rounding.

†Not applicable.
‡Reporting standards not met.
[1]Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level.
[2]Data may sum to more than 100 percent because (1) a teacher who reported more than one major is represented in more than one field of study and (2) a teacher with multiple degrees in different fields of study is represented in more than one field of study.

NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

†Not applicable.
‡Reporting standards not met.
[1]Includes teachers with levels of education below the bachelor's degree (not shown separately).
[2]Includes certificate of advanced graduate studies.
[3]Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

NOTE: This table includes regular full-time teachers only; it excludes other staff even when they have full-time teaching duties (regular part-time teachers, itinerant teachers, long-term substitutes, administrators, library media specialists, other professional staff, and support staff). Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

†Not applicable.
‡Reporting standards not met.
[1]Includes compensation for extracurricular or additional activities such as coaching, student activity sponsorship, or teaching evening classes.
[2]Includes teaching summer sessions and other non-teaching jobs at any school.
[3]Includes certificates of advanced graduate studies.
[4]Located inside a principal city within an urbanized area.
[5]Located inside an urbanized area, but outside of a principal city.
[6]Located inside an urban cluster.
[7]Located outside any urbanized area or urban cluster.
NOTE: This table includes regular full-time teachers only; it excludes other staff even when they have full-time teaching duties (regular part-time teachers, itinerant teachers, long-term substitutes, administrators, library media specialists, other professional staff, and support staff). Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses. Detail may not sum to totals because of rounding, missing values in cells with too few cases to report, and survey item nonresponse.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Schools and Staffing Survey (SASS), "Public Teacher Questionnaire" and "Private Teacher Questionnaire," 2007–08. (This table was prepared October 2009.)

Table 76. Average base salary for full-time public elementary and secondary school teachers with a bachelor's degree as their highest degree, by years of full-time teaching experience and state: 1993–94, 1999–2000, 2003–04, and 2007–08

State	1993–94, total		1999–2000			2003–04				2007–08

†Not applicable.
‡Reporting standards not met.
NOTE: This table includes regular full-time teachers only; it excludes other staff even when they have full-time teaching duties (regular part-time teachers, itinerant teachers, long-term substitutes, administrators, library media specialists, other professional staff, and support staff). Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Schools and Staffing Survey (SASS), "Public School Teacher Questionnaire," 1993–94, 1999–2000, 2003–04, and 2007–08; and "Public Charter School Teacher Questionnaire," 1999–2000. (This table was prepared September 2009.)

Table 77. Average base salary for full-time public elementary and secondary school teachers with a master's degree as their highest degree, by years of full-time teaching experience and state: 1993–94, 1999–2000, 2003–04, and 2007–08

[1]The average monetary remuneration earned by FTE employees across all industries in a given year, including wages, salaries, commissions, tips, bonuses, voluntary employee contributions to certain deferred compensation plans, and receipts in kind that represent income. Calendar-year data from the U.S. Department of Commerce, Bureau of Economic Analysis, have been converted to a school-year basis by averaging the two appropriate calendar years in each case.
[2]Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

NOTE: Some data have been revised from previously published figures. Standard errors are not available for these estimates, which are based on state reports.

#Rounds to zero.
[1]Constant dollars based on the Consumer Price Index (CPI), prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis. The CPI does not account for differences in inflation rates from state to state.

NOTE: Some data have been revised from previously published figures. Standard errors are not available for these estimates, which are based on state reports.
SOURCE: National Education Association, *Estimates of School Statistics*, 1969–70 through 2008–09. (This table was prepared July 2009.)

Table 80. Staff employed in public elementary and secondary school systems, by functional area: Selected years, 1949–50 through fall 2007

[In full-time equivalents]

School year	Total	School district administrative staff			Instructional staff						Support staff[1]
		Total	Officials and administrators	Instruction coordinators	Total	Principals and assistant principals	Teachers	Instructional aides	Librarians	Guidance counselors

—Not available.

[1]Includes school district administrative support staff, school and library support staff, student support staff, and other support services staff.

[2]Because of classification revisions, categories other than teachers, principals, librarians, and guidance counselors are only roughly comparable to figures for years after 1980.

[3]Data included in column 8.

NOTE: Data for 1949–50 through 1969–70 are cumulative for the entire school year, rather than counts as of the fall of the year. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

[1]Includes imputations for undercounts in states as designated in footnotes 2 through 10.
[2]Includes imputations for instruction coordinators.
[3]Includes imputations for prekindergarten teachers.
[4]Includes imputations for all staff.
[5]Includes imputations for instructional aides.
[6]Includes imputations for library support staff.
[7]Includes imputations for school support staff.
[8]Includes imputations for administrative support staff.
[9]Includes imputations for other support services staff.
[10]Includes imputations for school administrators.
NOTE: DoD = Department of Defense. Some data have been revised from previously published figures.

!Interpret data with caution.
‡Reporting standards not met.
[1]Total differs from data appearing in other tables because of varying survey processing procedures and time period coverages.
[2]Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis. Excludes principals reporting a salary of $0.
[3]Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificate of advanced studies.
[4]Data include Pacific Islander.
NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and survey item nonresponse. Standard errors appear in parentheses.

—Not available.
[1]Includes operating and nonoperating districts.
[2]Schools with both elementary and secondary programs are included under elementary schools and also under secondary schools.
[3]Data for most years prior to 1976–77 are partly estimated. Prior to 1995–96, excludes schools with highest grade of kindergarten.
[4]Includes regular schools and special schools not classified by grade span.
[5]Includes elementary, secondary, and combined elementary/secondary schools.
[6]These data cannot be compared directly with the data for years after 1980–81.
[7]Because of expanded survey coverage, data are not directly comparable with figures after 1983–84.
[8]Some data have been revised from previously published figures.

†Not applicable.

NOTE: Size not reported includes school districts reporting enrollment of zero. Regular districts exclude regional education service agencies and supervisory union administrative centers, state-operated agencies, federally operated agencies, and other types of local education agencies, such as independent charter schools. Enrollment totals differ from other tables because this table represents data reported by school districts rather than states or schools. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

[1]Regular school districts include both independent districts and those that are a dependent segment of a local government. Includes nonoperating agencies. Components of supervisory unions operate schools, but share superintendent services with other districts.
[2]New York City counted as one school district.

NOTE: DoD = Department of Defense. Some data have been revised from previously published figures.

Table 89. Public elementary and secondary students, schools, pupil/teacher ratios, and finances, by type of locale: 2006–07 and 2007–08—Continued

Selected characteristic	Total	City, large[1]	City, midsize[2]	City, small[3]	Suburban, large[4]	Suburban, midsize[5]	Suburban, small[6]	Town, fringe[7]	Town, distant[8]	Town, remote[9]	Rural, fringe[10]	Rural, distant[11]	Rural, remote[12]
1	2	3	4	5	6	7	8	9	10	11	12	13	14
Current expenditure per student (in dollars)	$9,677	$10,670	$9,399	$9,612	$10,037	$9,118	$8,866	$9,015	$8,875	$8,706	$8,976	$8,906	$10,022
Instruction expenditure per student (in dollars)	5,952	6,713	5,665	5,909	6,194	5,583	5,408	5,521	5,396	5,284	5,468	5,424	6,002

[1]Located inside an urbanized area and inside a principal city with a population of at least 250,000.
[2]Located inside an urbanized area and inside a principal city with a population of at least 100,000, but less than 250,000.
[3]Located inside an urbanized area and inside a principal city with a population less than 100,000.
[4]Located inside an urbanized area and outside a principal city with a population of 250,000 or more.
[5]Located inside an urbanized area and outside a principal city with a population of at least 100,000, but less than 250,000.
[6]Located inside an urbanized area and outside a principal city with a population less than 100,000.
[7]Located inside an urban cluster that is 10 miles or less from an urbanized area.
[8]Located inside an urban cluster that is more than 10 but less than or equal to 35 miles from an urbanized area.
[9]Located inside an urban cluster that is more than 35 miles from an urbanized area.
[10]Located outside any urbanized area or urban cluster, but 5 miles or less from an urbanized area or 2.5 miles or less from an urban cluster.
[11]Located outside any urbanized area or urban cluster and more than 5 miles but less than or equal to 25 miles from an urbanized area, or more than 2.5 miles but less than or equal to 10 miles from an urban cluster.
[12]Located outside any urbanized area or urban cluster, more than 25 miles from an urbanized area, and more than 10 miles from an urban cluster.
[13]Average for schools reporting enrollment. Enrollment data were available for 94,775 out of 98,916 institutions in 2007–08.
[14]Ratio for schools reporting both full-time-equivalent teachers and fall enrollment data.
[15]Includes tuition and fee revenues from other in-state school systems, which are excluded from state data reported through the "National Public Education Financial Survey."
[16]Property tax and parent government contributions are determined on the basis of independence or dependence of the local school system and are mutually exclusive.
NOTE: Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity.

—Not available.
†Not applicable.
#Rounds to zero.
[1]The averaged freshman graduation rate provides an estimate of the percentage of students who receive a regular diploma within 4 years of entering ninth grade. The rate uses aggregate student enrollment data to estimate the size of an incoming freshman class and aggregate counts of the number of diplomas awarded 4 years later.
[2]Includes regular diplomas only.
[3]Reported data indicated an averaged freshman graduation rate of greater than 100.0 percent.

NOTE: Total enrollment, staff, and teacher data in this table reflect totals reported by school districts and may differ from data derived from summing school-level data to school district aggregates. ISD = independent school district. CISD = consolidated independent school district. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

†Not applicable.

[1]Poverty is defined based on the number of persons and related children in the family and their income. For information on poverty thresholds for 2007, see http://www.census.gov/hhes/www/poverty/threshld/thresh07.html.

[2]Current expenditure per pupil based on fall enrollment collected through the "School District Finance Survey (Form F-33)," 2006–07.

[3]Fiscal year 2009 Department of Education funds available for spending by school districts beginning with the 2009–10 school year divided by number of poverty children in 2007.

[4]Includes other expenditures not shown separately.

[5]Data included under Modesto City Elementary.

NOTE: Detail may not sum to totals because of rounding. ISD = independent school district. CISD = consolidated independent school district.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "School District Finance Survey (Form F-33)," 2006–07, and "Local Education Agency Universe Survey," 2007–08; and unpublished Department of Education budget data. (This table was prepared September 2009.)

Table 92. Enrollment, poverty, and federal funds for the 100 largest school districts, by enrollment size in 2007: Fall 2007, 2006–07, and fiscal year 2009

Name of district	State	Rank order	Enrollment, fall 2007	5- to 17-year-old population, 2007	5- to 17-year-olds in poverty, 2007	Poverty rate of 5- to 17-year-olds, 2007[1]	Revenues by source of funds, 2006–07				Revenue for selected federal programs (in thousands), 2006–07						Title I allocations (in thousands), fiscal year 2009[2]				
							Total (in thousands)	Federal (in thousands)	Federal as a percent of total	Federal revenue per student[3]	Title I basic and concentration grants	School lunch	Vocational education	Drug-free schools	Eisenhower math and science	Special education	Total	Basic grants	Concentration grants	Targeted grants	Education finance incentive grants

—Not available.

[1]Poverty is defined based on the number of persons and related children in the family and their income. For information on poverty thresholds for 2007, see http://www.census.gov/hhes/www/poverty/threshld/thresh05.html.

[2]Fiscal year 2009 Department of Education funds available for spending by school districts in the 2009–10 school year.

[3]Federal revenue per student is based on fall enrollment collected through the "School District Finance Survey (Form F-33)."

NOTE: Detail may not sum to totals because of rounding. ISD = independent school district.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "School District Finance Survey (Form F-33)," 2006–07, and "Local Education Agency Universe Survey," 2007–08; and unpublished Department of Education budget data. (This table was prepared September 2009.)

—Not available.
[1]Includes special education, alternative, and other schools not reported by grade span.
[2]Includes schools beginning with grade 6 or below and with no grade higher than 8.
[3]Includes schools with grade spans beginning with 4, 5, or 6 and ending with 6, 7, or 8.
[4]Includes schools with no grade lower than 7.
[5]Includes schools with grades 7 and 8 or grades 7 through 9.
[6]Includes schools beginning with grade 6 or lower and ending with grade 9 or above.
[7]Because of revision in data collection procedures, figures not comparable to data for other years.
[8]Some data have been revised from previously published figures.

#Rounds to zero.
[1]Totals differ from those reported in other tables because this table represents data reported by schools rather than by states or school districts. Percentage distribution and average enrollment calculations exclude data for schools not reporting enrollment.
[2]Includes special education, alternative, and other schools not reported by grade span.
[3]Includes schools beginning with grade 6 or below and with no grade higher than 8.
[4]Includes schools with no grade lower than 7.
[5]Includes schools beginning with grade 6 or below and ending with grade 9 or above.
[6]Excludes special education schools, vocational schools, and alternative schools.
[7]Data are for schools reporting their enrollment size. Enrollment data were available for 93,845 out of 97,382 schools in 2005–06, 94,164 out of 98,793 schools in 2006–07, and 94,775 out of 98,916 in 2007–08.
NOTE: Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

†Not applicable.
NOTE: Data reflect racial/ethnic data reported by schools. Because some schools do not report complete racial/ethnic data, totals may differ from figures in other tables. Excludes 1995 data for Idaho and 2000 data for Tennessee because racial/ethnic data were not reported. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

—Not available.

[1]Includes graduates of public and private schools.

[2]Data for 1929–30 and preceding years are from *Statistics of Public High Schools* and exclude graduates from high schools that failed to report to the Office of Education.

[3]The averaged freshman graduation rate provides an estimate of the percentage of students who receive a regular diploma within 4 years of entering ninth grade. The rate uses aggregate student enrollment data to estimate the size of an incoming freshman class and aggregate counts of the number of diplomas awarded 4 years later. Averaged freshman graduation rates in this table are based on reported totals of enrollment by grade and high school graduates, rather than on details reported by race/ethnicity.

[4]Derived from Current Population Reports, Series P-25. For years 1869–70 through 1989–90, 17-year-old population is an estimate of the October 17-year-old population based on July data. Data for 1990–91 and later years are October resident population estimates prepared by the Census Bureau.

[5]Estimated.

[6]Projected by private schools.

[7]Includes estimates for New York and Wisconsin. Without estimates for these two states, the averaged freshman graduation rate for the remaining 48 states and the District of Columbia is 75.0 percent.

[8]Projected by NCES.

NOTE: Includes graduates of regular day school programs. Excludes graduates of other programs, when separately reported, and recipients of high school equivalency certificates. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

[1]U.S. total includes estimates for nonreporting states.
[2]Beginning in 1989–90, graduates from adult programs are excluded.
[3]Data from NCES 2009-062, *Projections of Education Statistics to 2018*.
[4]Projected data from NCES 91-490, *Projections of Education Statistics to 2002*.
[5]Estimated high school graduates from NCES 2006-606rev, *The Averaged Freshman Graduation Rate for Public High Schools From the Common Core of Data: School Years 2002–03 and 2003–04*.

NOTE: Data include regular diploma recipients, but exclude students receiving a certificate of attendance and persons receiving high school equivalency certificates. DoD = Department of Defense. Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Education, National Center for Education Statistics; *Projections of Education Statistics to 2018;* Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 1981–82 through 2007–08; and *The Averaged Freshman Graduation Rate for Public High Schools From the Common Core of Data: School Years 2002–03 and 2003–04*. (This table was prepared September 2009.)

Table 105. Averaged freshman graduation rates for public secondary schools, by state or jurisdiction: Selected years, 1990–91 through 2006–07

[1]Includes estimates for New York and Wisconsin. Without estimates for these two states, the averaged freshman graduation rate for the remaining 48 states and the District of Columbia is 75.0 percent.
[2]U.S. total includes estimates for nonreporting states.
[3]Projected high school graduates from NCES 2008-078, *Projections of Education Statistics to 2017*.
[4]Estimated high school graduates from NCES 2006-606rev, *The Averaged Freshman Graduation Rate for Public High Schools From the Common Core of Data: School Years 2002–03 and 2003–04*.
NOTE: The averaged freshman graduation rate provides an estimate of the percentage of students who receive a regular diploma within 4 years of entering ninth grade. The rate uses aggregate student enrollment data to estimate the size of an incoming freshman class and aggregate counts of the number of diplomas awarded 4 years later. Averaged freshman graduation rates in this table are based on reported totals of enrollment by grade and high school graduates, rather than on details reported by race/ethnicity. Some data have been revised from previously published figures.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 1986–87 through 2007–08; *The Averaged Freshman Graduation Rate for Public High Schools From the Common Core of Data: School Years 2002–03 and 2003–04;* and *Projections of Education Statistics to 2017*. (This table was prepared September 2009.)

[1]Data differ slightly from figures reported in other tables due to varying reporting practices for racial/ethnic survey data.
[2]High school graduate counts include estimates for nonreporting states, based on 2006 12th-grade enrollment racial/ethnic distribution reported by state. Event dropout rate totals are totals for reporting states only.
NOTE: Includes only graduates for whom race/ethnicity was reported. Race categories exclude persons of Hispanic ethnicity. Event dropout rates measure the percentage of public school students in grades 9 through 12 who dropped out of school between one October and the next. DoD = Department of Defense.

—Not available.
[1]People who did not report their age were excluded from this calculation. Age data for 1988 and prior years are for all test takers and may not be comparable to data for later years.
[2]All people taking the GED tests (one or more subtests).
[3]People completing the entire GED battery of five tests.
[4]Data for 2002 and later years are for people passing the GED tests (i.e., earning both a passing total score on the test battery and a passing score on each individual test). Data for 2001 and prior years are for high school equivalency credentials issued by the states to GED test passers. In order to receive high school equivalency credentials in some states, GED test passers must meet additional state requirements (e.g., complete an approved course in civics or government).
[5]Includes other jurisdictions, such as Puerto Rico, Guam, and American Samoa.
NOTE: Data are for the United States only and exclude other jurisdictions, except where noted. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

—Not available.
†Not applicable.
[1]Includes other racial/ethnic categories not separately shown.
[2]Based on the April 1960 decennial census.
[3]White and Black include persons of Hispanic ethnicity.
[4]Because of changes in data collection procedures, data may not be comparable with figures for years prior to 1992.
[5]White and Black exclude persons identifying themselves as two or more races.

NOTE: "Status" dropouts are 16- to 24-year-olds who are not enrolled in school and who have not completed a high school program, regardless of when they left school. People who have received GED credentials are counted as high school completers. All data except for 1960 are based on October counts. Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in prisons, persons in the military, and other persons not living in households. Race categories exclude persons of Hispanic ethnicity except where otherwise noted. Standard errors appear in parentheses.
SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October 1967 through October 2008. (This table was prepared August 2009.)

Table 109. Percentage of high school dropouts among persons 16 through 24 years old (status dropout rate), by income level, and percentage distribution of status dropouts, by labor force status and educational attainment: 1970 through 2008

Year	Status dropout rate		Status dropout rate, by family income quartile								Percentage distribution of status dropouts, by labor force status								Percentage distribution of status dropouts, by years of school completed									
			Lowest quartile		Middle low quartile		Middle high quartile		Highest quartile		Total		Employed[1]		Unemployed		Not in labor force		Total		Less than 9 years		9 years		10 years		11 or 12 years

†Not applicable.
‡Reporting standards not met.
[1]Includes persons employed, but not currently working.
[2]Because of changes in data collection procedures, data may not be comparable with figures for years prior to 1992.
NOTE: "Status" dropouts are 16- to 24-year-olds who are not enrolled in school and who have not completed a high school program, regardless of when they left school. People who have received GED credentials are counted as high school completers.

Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in prisons, persons in the military, and other persons not living in households. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

†Not applicable.
[1]Students may exit special education services due to maximum age beginning at age 18 depending on state law or practice or order of any court.
[2][3]"Dropped out" is defined as the total who were enrolled at some point in the reporting year, were not enrolled at the end of the reporting year, and did not exit through any of the other bases described. Includes students previously categorized as "moved, not known to continue."
[3][4]"Transferred to regular education" was previously labeled "no longer receives special education."
[4]Other health impairments include having limited strength, vitality, or alertness due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes.

†Not applicable.
[1]Ability to explore objects, for example, reaching for and holding objects. The child may have no specific purpose except to play or discover.
[2]Ability to explore objects with a purpose, such as to explore a bell to understand the source of the sound.
[3]Measures proficiency in communication through diverse nonverbal sounds and gestures, such as vowel and vowel-consonant sounds.
[4]Measures proficiency in engaging in early problem solving, such as using a tool to reach an out-of-reach toy or locating a hidden toy.
[5]Measures proficiency in early communication skills, such as saying simple words like "mama" and "dada."
[6]Measures proficiency in being able to use visual tracking to guide hand movements to pick up a small object.
[7]Measures proficiency in ability to maintain control of the muscles used in sitting with and without support.
[8]Measures proficiency in ability to engage in various prewalking types of mobility, with and without support, such as shifting weight from one foot to the other.
[9]Measures proficiency in ability to walk with help and to stand independently.
[10]Measures proficiency in being able to walk independently.
[11]Measures proficiency in ability to maintain balance while shifting position.
[12]The type of nonparental care in which the child spent the most hours.
[13]Care provided in the child's home or in another private home by a relative (excluding parents).
[14]Care provided in the child's home or in another private home by a person unrelated to the child.
[15]Care provided in places such as early learning centers, nursery schools, and preschools, excluding Head Start.
[16]Children who spent an equal amount of time in each of two or more arrangements.
[17]Poverty status based on Census Bureau guidelines from 2002, which identify a dollar amount determined to meet a household's needs, given its size and composition. In 2002, a family of four was considered to live below the poverty threshold if its income was less than or equal to $18,392.
[18]Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income.
NOTE: This table is based on a survey that sampled children born in 2001 and was designed to collect information about them for the first time when the children were about 9 months of age (i.e., 8 to 10 months). As shown in the table, some children were older than this, although only 6.5 percent were over 13 months of age. Estimates weighted by W1C0. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Early Childhood Longitudinal Study, Birth Cohort 9-month–Preschool Restricted-Use Data File and Electronic Codebook. (This table was prepared February 2008.)

Table 112. Percentage of children demonstrating specific mental skills, physical skills, and secure emotional attachment to parents at about 2 years of age, by selected characteristics: 2003–04

Selected characteristic	Percentage distribution of children[1]		Percent of children who demonstrate skills or secure emotional attachment																										Secure emotional attachment to parents[3]	
			Specific mental skills[2]												Specific physical skills[2]															
			Receptive vocabulary[4]		Expressive vocabulary[5]		Listening comprehension[6]		Matching/ discrimination[7]		Early counting[8]		Skillful walking[9]		Balance[10]		Fine motor control[11]		Uses stairs[12]		Alternating balance[13]		Motor planning[14]

†Not applicable.

[1]Distribution of weighted Early Childhood Longitudinal Study, Birth Cohort survey population between 22 and 25 months of age.

[2]Based on assessments collected using the Bayley Short Form Research Edition (BSF-R), a shortened field method of administering the Bayley Scales of Infant Development-II (BSID-II) (Bayley 1993). The scores are fully equated with the BSID-II. The proficiency probabilities indicate mastery of a specific skill or ability within mental or physical domains.

[3]Secure attachment was measured by trained observers using Toddler Attachment Sort-45 Item (TAS-45) assessment. The formation of secure attachments in early childhood is an indicator that the child is able to use the parent as a secure base from which to explore novel stimuli in the environment freely and acquire a sense of self-confidence and adaptability to new and challenging situations. Other possible scale classifications in this metric were avoidant, ambivalent, and disorganized/disorientated.

[4]Ability to recognize and understand spoken words or to indicate a named object by pointing.

[5]Verbal expressiveness using gestures, words, and sentences.

[6]Ability to understand actions depicted by a story, in pictures, or by verbal instructions.

[7]Ability to match objects by their properties (e.g., color) or differentiate one object from another.

[8]Knowledge of counting words, knowledge of ordinality, and understanding of simple quantities.

[9]Ability to walk independently.

[10]Ability to maintain balance when changing position.

[11]Ability to use fine motor control with hands, such as grasping a pencil or holding a piece of paper while scribbling.

[12]Ability to walk up and down stairs, with and without alternating feet.

[13]Ability to maintain balance when changing position or when in motion, such as jumping.

[14]Ability to anticipate, regulate, and execute motor movements, such as being able to attempt to replicate the motions of others.

[15]The type of nonparental care in which the child spent the most hours.

[16]Care provided in the child's home or in another private home by a relative (excluding parents).

[17]Care provided in the child's home or in another private home by a person unrelated to the child.

[18]Care provided in places such as early learning centers, nursery schools, and preschools, including Head Start.

[19]Children who spent an equal amount of time in each of two or more arrangements.

[20]Poverty status based on Census Bureau guidelines from 2002, which identify a dollar amount determined to meet a household's needs, given its size and composition. In 2002, a family of four was considered to live below the poverty threshold if its income was less than or equal to $18,392.

[21]Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income.

NOTE: Estimates weighted by W2R0. Estimates pertain to children assessed between 22 months and 25 months of age. Children younger than 22 months (less than 1 percent of the survey population) and children older than 25 months (approximately 9 percent of the survey population) are excluded from this table. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Early Childhood Longitudinal Study, Birth Cohort 9-month–Preschool Restricted-Use Data File and Electronic Codebook. (This table was prepared February 2008.)

Table 113. Children's specific language, literacy, mathematics, color knowledge, and fine motor skills at about 4 years of age, by age of child and selected characteristics: 2005–06

Age and selected characteristic	Percentage distribution of children		Language				Literacy								Mathematics				Color knowledge–percent scoring 10 out of 10[9]		Fine motor score[10]	
			Receptive vocabulary score[1]		Expressive vocabulary score[2]		Overall literacy score[3]		Percent proficient at letter recognition[4]		Phonological awareness score[5]		Conventions of print score[6]		Overall mathematics score[7]		Percent proficient in numbers and shapes[8]

†Not applicable.
‡Reporting standards not met.
[1]Ability to recognize and understand spoken words or to indicate a named object by pointing. Potential score ranges from 0 to 15.
[2]Verbal expressiveness using gestures, words, and sentences. Potential score ranges from 0 to 5.
[3]Includes letter recognition, in both receptive and expressive modes; letter sounds; and early reading knowledge and skills. Potential score ranges from 0 to 37.
[4]Ability to identify a letter by either its name or the sounds it makes. Average score can be interpreted as the percentage of children who were proficient at recognizing the letters of the alphabet. Potential score ranges from 0 to 100.
[5]Measures understanding of the sounds and structure of spoken language, including rhyming, blending, segmenting, deleting, and substituting words, syllables, and sounds. Potential score ranges from 0 to 8.
[6]Understanding of what print represents and how it works. Potential score ranges from 0 to 8.
[7]Includes number sense, geometry, counting, operations, and patterns. Potential score ranges from 0 to 44.
[8]Ability to recognize single-digit numbers and basic geometric shapes. Average score can be interpreted as the percentage of children who were proficient. Potential score ranges from 0 to 100.
[9]Percentage of children who scored 10 on a test with a potential score range of 0 to 10. These children were able to name the colors of five pictured objects (2 points per correct answer).
[10]Measures the ability to use fine motor skills in drawing basic forms and shapes. Potential score ranges from 0 to 7.
[11]The type of nonparental care in which the child spent the most hours.
[12]Care provided in the child's home or in another private home by a relative (excluding parents).
[13]Care provided in the child's home or in another private home by a person unrelated to the child.
[14]Care provided in places such as early learning centers, nursery schools, and preschools, excluding Head Start.
[15]Children who spent an equal amount of time in each of two or more arrangements.
[16]Poverty status based on Census Bureau guidelines from 2002, which identify a dollar amount determined to meet a household's needs, given its size and composition. In 2002, a family of four was considered to live below the poverty threshold if its income was less than or equal to $18,392.
[17]Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income.
NOTE: Estimates weighted by W3R0. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

[1]Status during kindergarten year.

NOTE: Reading scale ranges from 0 to 209. Estimates for each assessment round include all children assessed in English in that round, even if they were not assessed in English in a previous round. In fall 1998, 8 percent of the kindergarten children were not administered the English battery because of their performance on the OLDS (Oral Language Development Scale) English proficiency assessment. By spring of first grade, this percentage had decreased to 2 percent. In the third grade and subsequent years, the OLDS was not administered and all children were assessed in English. Most of the children were in first grade in 1999–2000, but 5 percent were in kindergarten or other grades (e.g., second grade, ungraded classrooms); most were in third grade in 2001–02, but 11 percent were in second grade or other grades (e.g., fourth grade, ungraded classrooms); most were in fifth grade in 2003–04, but 14 percent were in fourth grade or other grades (e.g., sixth grade, ungraded classrooms); most were in eighth grade in 2006–07, but 14 percent were in seventh grade or other grades (e.g., ninth grade or ungraded classrooms). Data were calculated using C1_7FC0 weight. Estimates differ from previously published figures because the data were recalibrated to represent the kindergarten through eighth-grade reading assessment item pool. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

[1]Status during kindergarten year.

NOTE: Mathematics scale ranges from 0 to 172, and science scale ranges from 0 to 108. Estimates for each assessment round include all children assessed in that round, including children assessed in Spanish. In kindergarten and first grade, the mathematics assessment was administered in Spanish for Spanish-speaking children who did not pass the English OLDS (Oral Language Development Scale). All assessments were administered in English in third grade through eighth grade. Most of the children were in first grade in 1999–2000, but 5 percent were in kindergarten or other grades (e.g., second grade, ungraded classrooms); most were in third grade in 2001–02, but 11 percent were in second grade or other grades (e.g., fourth grade, ungraded classrooms); most were in fifth grade in 2003–04, but 14 percent were in fourth grade or other grades (e.g., sixth grade, ungraded classrooms); most were in eighth grade in 2006–07, but 14 percent were in seventh grade or other grades (e.g., ninth grade or ungraded classrooms). Data were calculated using C1_7FC0 weight. Estimates differ from previously published figures because the data were recalibrated to represent the kindergarten through eighth-grade mathematics assessment item pool and the third-grade through eighth-grade science assessment item pool. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

†Not applicable.
[1]Data for 1971 include persons of Hispanic ethnicity.
[2]Test scores of Hispanics were not tabulated separately.
NOTE: The NAEP reading scores have been evaluated at certain performance levels. Scale ranges from 0 to 500. Students scoring 150 (or higher) are able to follow brief written directions and carry out simple, discrete reading tasks. Students scoring 200 are able to understand, combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information. Students scoring 250 are able to search for specific information, interrelate ideas, and make generalizations about literature, science, and social studies materials. Students scoring 300 are able to find, understand, summarize, and explain relatively complicated literary and informational material. Includes public and private schools. Excludes persons not enrolled in school and students who were unable to be tested due to limited proficiency in English or due to a disability. Beginning in 2004, data are for a revised assessment format that provides accommodations for students with disabilities and English language learners. Race categories exclude persons of Hispanic ethnicity, except where noted. Totals include other racial/ethnic groups not shown separately. Some data have been revised from previously published figures. Standard errors appear in parentheses.

†Not applicable.
‡Reporting standards not met.
[1]Accommodations were not permitted for this assessment.
[2]The percentile represents a specific point on the percentage distribution of all students ranked by their reading score from low to high. For example, 10 percent of students scored at or below the 10th percentile score, while 90 percent of students scored above it.

NOTE: Scale ranges from 0 to 500. Includes public and private schools. Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or due to a disability. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

‡Reporting standards not met.

NOTE: The NAEP reading scores have been evaluated at certain performance levels. Scale ranges from 0 to 500. Students scoring 150 (or higher) are able to follow brief written directions and carry out simple, discrete reading tasks. Students scoring 200 are able to understand, combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information. Students scoring 250 are able to search for specific information, interrelate ideas, and make generalizations about literature, science, and social studies materials. Students scoring 300 are able to find, understand, summarize, and explain relatively complicated literary and informational material. Includes public and private schools. Excludes persons not enrolled in school and students who were unable to be tested due to limited proficiency in English or due to a disability. Beginning in 2004, data are for a revised assessment format that provides accommodations for students with disabilities and English language learners. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures. Standard errors appear in parentheses.

†Not applicable.

[1]Data for 1971 include persons of Hispanic ethnicity.

[2]Test scores of Hispanics were not tabulated separately.

NOTE: The NAEP reading scores have been evaluated at certain performance levels. Scale ranges from 0 to 500. Students scoring 150 (or higher) are able to follow brief written directions and carry out simple, discrete reading tasks. Students scoring 200 are able to understand, combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information. Students scoring 250 are able to search for specific information, interrelate ideas, and make generalizations about literature, science, and social studies materials. Students scoring 300 are able to find, understand, summarize, and explain relatively complicated literary and informational material. Includes public and private schools. Excludes persons not enrolled in school and students who were unable to be tested due to limited proficiency in English or due to a disability. Beginning in 2004, data are for a revised assessment format that provides accommodations for students with disabilities and English language learners. Race categories exclude persons of Hispanic ethnicity, except where noted. Standard errors appear in parentheses.

—Not available.
†Not applicable.
‡Reporting standards not met.
[1]Scale ranges from 0 to 500.
[2]Race/ethnicity based on school records.
[3]*Basic* denotes partial mastery of the knowledge and skills that are fundamental for proficient work at the 4th-grade level.
[4]*Proficient* represents solid academic performance for 4th-graders. Students reaching this level have demonstrated competency over challenging subject matter.
[5]*Advanced* signifies superior performance.
[6]Did not satisfy one or more of the guidelines for school participation in 1998. Data are subject to appreciable nonresponse bias.
[7]Did not satisfy one or more of the guidelines for school participation in 2002. Data are subject to appreciable nonresponse bias.
[8]Did not satisfy one or more of the guidelines for school participation in 1994. Data are subject to appreciable nonresponse bias.
[9]Prior to 2005, NAEP divided the Department of Defense (DoD) schools into two jurisdictions, domestic and overseas. In 2005, NAEP began combining the DoD domestic and overseas schools into a single jurisdiction. Data shown in this table for years prior to 2005 were recalculated for comparability.
NOTE: The reading data include students for whom accommodations were permitted except for the 1992 and 1994 data. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.
SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 1992, 1994, 1998, 2002, 2003, 2005, and 2007 Reading Assessments, retrieved May 16, 2008, from the NAEP Data Explorer (http://nces.ed.gov/nationsreportcard/nde/). (This table was prepared May 2008.)

†Not applicable.
‡Reporting standards not met.
[1]Scale ranges from 0 to 500.
[2]Central city is a large or mid-size central city of a Metropolitan Statistical Area (MSA). Urban fringe/large town includes places that are within an MSA of a central city but not primarily within its central city, as well as towns that are incorporated places not within an MSA and have a population greater than or equal to 25,000. Rural/small town includes places that are defined as rural by the U.S. Census Bureau and have a population less than 2,500 and/or a population density of less than 1,000 per square mile, as well as towns that are incorporated places not within an MSA and have a population less than 25,000 but greater than or equal to 2,500.
[3]*Basic* denotes partial mastery of the knowledge and skills that are fundamental for proficient work at the 8th-grade level.
[4]*Proficient* represents solid academic performance for 8th-graders. Students reaching this level have demonstrated competency over challenging subject matter.
[5]*Advanced* signifies superior performance.
[6]Did not satisfy one or more of the guidelines for school participation in 1998. Data are subject to appreciable nonresponse bias.
[7]Did not satisfy one or more of the guidelines for school participation in 2002. Data are subject to appreciable nonresponse bias.
[8]Did not satisfy one or more of the guidelines for school participation in 2003. Data are subject to appreciable nonresponse bias.
[9]Prior to 2005, NAEP divided the Department of Defense (DoD) schools into two jurisdictions, domestic and overseas. In 2005, NAEP began combining the DoD domestic and overseas schools into a single jurisdiction. Data shown in this table for years prior to 2005 were recalculated for comparability.
NOTE: The reading data include students for whom accommodations were permitted. Standard errors appear in parentheses.
SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 1998, 2002, 2003, 2005, and 2007 Reading Assessments, retrieved May 19, 2008, from the NAEP Data Explorer (http://nces.ed.gov/nationsreportcard/nde/). (This table was prepared May 2008.)

#Rounds to zero.
‡Reporting standards not met.
[1]Scale ranges from 0 to 500.
[2]*Basic* denotes partial mastery of prerequisite knowledge and skills that are fundamental for proficient work at a given grade.
[3]*Proficient* represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.
NOTE: Race categories exclude persons of Hispanic origin. Detail may not sum to totals because of rounding and missing data. Totals include racial/ethnic groups not shown separately.

‡Reporting standards not met.
[1]Accommodations were not permitted for this assessment.
NOTE: Scale ranges from 0 to 500. Includes public and private schools. Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or due to a disability. Race categories exclude persons of Hispanic ethnicity. Some data have been revised from previously published figures. Standard errors appear in parentheses.

†Not applicable.
#Rounds to zero.
‡Reporting standards not met.
[1]Scale ranges from 0 to 500.
[2]*Basic* denotes partial mastery of prerequisite knowledge and skills that are fundamental for proficient work at the specified grade level.
[3]*Proficient* represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

NOTE: The results for English language learners are based on students who were assessed and cannot be generalized to the total population of such students; some English language learners—making up about 2 percent of all public school students at both grade 4 and grade 8—were excluded from the 2007 Reading Assessment. Standard errors appear in parentheses.
SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 2007 Reading Assessment, retrieved April 23, 2009, from the Main NAEP Data Explorer (http://nces.ed.gov/nationsreportcard/naep_data/). (This table was prepared April 2009.)

Table 125. Average writing scale score and percentage of students attaining writing achievement levels, by selected student characteristics and grade level: 2002 and 2007

Grade, year, and achievement level	All students	Sex		Race/ethnicity					Parents' highest level of education				Free/reduced-price lunch eligibility		
		Male	Female	White	Black	Hispanic	Asian/ Pacific Islander	American Indian/ Alaska Native	Did not finish high school	Graduated high school	Some education after high school	Graduated college	Eligible	Not eligible	Information not available

‡Reporting standards not met.
[1]Scale ranges from 1 to 300 for all three grades, but scores cannot be compared across grades. For example, a score of 156 at grade 8 does not denote higher performance than a score of 153 at grade 12.
[2]*Basic* denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.
[3]*Proficient* represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.
[4]*Advanced* signifies superior performance for a given grade.

NOTE: Includes public and private schools. Excludes persons unable to be tested due to limited proficiency in English or due to a disability (if the accommodations provided were not sufficient to enable the test to properly reflect the students' writing proficiency). In 2002, the NAEP national samples of 4th- and 8th-graders were obtained by aggregating the samples from each state, rather than by independently selecting national samples for grades 4 and 8. As a consequence, the size of the national samples increased for these grade levels, and smaller differences were found to be statistically significant than would have been detected in previous assessments. Grade 4 was not included in the 2007 survey. Race categories exclude persons of Hispanic ethnicity. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

‡Reporting standards not met.
[1]Students were asked to analyze and describe aspects of music they heard, critique instrumental and vocal performances, and demonstrate their knowledge of standard musical notation and music's role in society.
[2]Responding questions asked students to analyze and describe works of art and design, while creating questions required students to create works of art and design of their own.

NOTE: Excludes students unable to be tested due to limited proficiency in English or due to a disability (if the accommodations provided were not sufficient to enable the test to properly reflect the students' music or visual arts proficiency). Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not shown separately. Standard errors appear in parentheses.

‡Reporting standards not met.
[1]Accommodations were not permitted for this assessment.
NOTE: Scale ranges from 0 to 500. Includes public and private schools. Excludes students unable to be tested due to limited proficiency in English or due to a disability (if the accommodations provided were not sufficient to enable the test to properly reflect the students' proficiency in U.S. history). Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not shown separately. Detail may not sum to totals because of rounding. Standard errors appear in parentheses. Some data have been modified from previously published figures.

#Rounds to zero.
†Not applicable.
‡Reporting standards not met.
[1]Scale ranges from 0 to 300.
[2]Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.
[3]Proficient represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.
[4]Advanced signifies superior performance for a given grade.
[5]Accommodations were not permitted for this assessment.
NOTE: Includes public and private schools. Excludes students unable to be tested due to limited proficiency in English or due to a disability (if the accommodations provided were not sufficient to enable the test to properly reflect the students' proficiency in civics). Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not shown separately. Standard errors appear in parentheses.

#Rounds to zero.
‡Reporting standards not met.
[1]Scale ranges from 0 to 300.
[2]*Basic* denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.
[3]*Proficient* represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.
[4]*Advanced* signifies superior performance for a given grade.
[5]Advanced economics includes Advanced Placement, International Baccalaureate, and honors courses.
NOTE: Includes public and private schools. Excludes persons unable to be tested due to limited proficiency in English or due to a disability (if the accommodations provided were not sufficient to enable the test to properly reflect the students' economics proficiency). Detail may not sum to totals due to rounding. Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not shown separately. Standard errors appear in parentheses.

—Not available.

†Not applicable.

NOTE: Scale ranges from 0 to 500. Students scoring 150 (or higher) know some basic addition and subtraction facts. Students scoring 200 have considerable understanding of two-digit numbers and know some basic multiplication and division facts. Students scoring 250 have an initial understanding of the four basic operations and are developing an ability to analyze simple logical relations. Students scoring 300 can perform reasoning and problem solving involving fractions, decimals, percents, elementary geometry, and simple algebra. Students scoring 350 can perform reasoning and problem solving involving geometry, algebra, and beginning statistics and probability. Includes public and private schools. Excludes persons not enrolled in school and students who were unable to be tested due to limited proficiency in English or due to a disability. Beginning in 2004, data are for a revised assessment format that provides accommodations for students with disabilities and English language learners. Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not shown separately. Some data have been revised from previously published figures. Standard errors appear in parentheses.

[2]Scale score of 200 or above.

[3]Scale score of 250 or above.

[4]Scale score of 300 or above.

[5]Scale score of 350 or above.

NOTE: Excludes persons not enrolled in school and students who were unable to be tested due to limited proficiency in English or due to a disability. Beginning in 2004, data are for a revised assessment format that provides accommodations for students with disabilities and English language learners. Totals include other racial/ethnic groups not shown separately. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

—Not available.
†Not applicable.
#Rounds to zero.
‡Reporting standards not met.
[1]Includes Asians/Pacific Islanders and American Indians/Alaska Natives.

NOTE: Score level 200 indicates ability to perform simple additive reasoning and problem solving. Score level 250 indicates ability to perform simple multiplicative reasoning and two-step problem solving. Score level 300 indicates ability to perform reasoning and problem solving involving fractions, decimals, percents, elementary geometry, and simple algebra. Score level 350 indicates ability to perform reasoning and problem solving involving geometry, algebra, and beginning statistics and probability. Scale ranges from 0 to 500. Excludes persons not enrolled in school and students who were unable to be tested due to limited proficiency in English or due to a disability. Beginning in 2008, data are for a revised assessment format that provides accommodations for students with disabilities and English language learners. Includes public and private schools. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

—Not available.

†Not applicable.

[1]Scale ranges from 0 to 500.

[2]*Basic* denotes partial mastery of prerequisite knowledge and skills that are fundamental for proficient work at the 4th-grade level.

[3]*Proficient* represents solid academic performance for 4th-graders. Students reaching this level have demonstrated competency over challenging subject matter.

[4]*Advanced* signifies superior performance.

[5]Did not meet one or more of the guidelines for school participation in 2000. Data are subject to appreciable nonresponse bias.

[6]Prior to 2005, NAEP divided the Department of Defense (DoD) schools into two jurisdictions, domestic and overseas. In 2005, NAEP began combining the DoD domestic and overseas schools into a single jurisdiction. Data shown in this table for years prior to 2005 were recalculated for comparability.

[7]Because of modifications to the 2005 Puerto Rico administration, results from 2003 should not be compared to results from 2005. Although parallel changes were not made in the nation in 2005, within-year comparisons between Puerto Rico and the nation are valid.

NOTE: With the exception of 1992, includes students for whom accommodations were permitted. Excludes students unable to be tested (even with accommodations) due to limited proficiency in English or due to a disability. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 1992, 2000, 2003, 2005, 2007, and 2009 Mathematics Assessments, retrieved November 19, 2009, from the Main NAEP Data Explorer (http://nces.ed.gov/nationsreportcard/naepdata). (This table was prepared November 2009.)

Table 136. Average mathematics scale score of 8th-grade public school students and percentage attaining mathematics achievement levels, by level of parental education and state or jurisdiction: Selected years, 1990 through 2009

State or jurisdiction	Average scale score[1]														Percent attaining mathematics achievement levels, 2009								Average scale score, by highest level of education attained by parents, 2009[2]							
	1990		1996		2000		2003		2005		2007		2009		Below *Basic*		At or above *Basic*[3]		At or above *Proficient*[4]		At *Advanced*[5]		Did not finish high school		Graduated high school		Some education after high school		Graduated college

—Not available.
†Not applicable.
‡Reporting standards not met.
[1]Scale ranges from 0 to 500.
[2]Excludes students who responded "I don't know" to the question about educational level of parents.
[3]*Basic* denotes partial mastery of prerequisite knowledge and skills that are fundamental for proficient work at the 8th-grade level.
[4]*Proficient* represents solid academic performance for 8th-graders. Students reaching this level have demonstrated competency over challenging subject matter.
[5]*Advanced* signifies superior performance.
[6]Did not meet one or more of the guidelines for school participation in 2000. Data are subject to appreciable nonresponse bias.
[7]Prior to 2005, NAEP divided the Department of Defense (DoD) schools into two jurisdictions, domestic and overseas. In 2005, NAEP began combining the DoD domestic and overseas schools into a single jurisdiction. Data shown in this table for years prior to 2005 were recalculated for comparability.
[8]Because of modifications to the 2005 Puerto Rico administration, results from 2003 should not be compared to results from 2005. Although parallel changes were not made in the nation in 2005, within-year comparisons between Puerto Rico and the nation are valid.
NOTE: Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or due to a disability. Data for 2000, 2003, 2005, 2007, and 2009 include students for whom accommodations were permitted. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.
SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 1990, 1996, 2000, 2003, 2005, 2007, and 2009 Mathematics Assessments, retrieved November 18, 2008, from the Main NAEP Data Explorer (http://nces.ed.gov/nationsreportcard/naepdata). (This table was prepared November 2009.)

#Rounds to zero.
‡Reporting standards not met.
[1]Scale ranges from 0 to 500.
[2]*Basic* denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.
[3]*Proficient* represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

NOTE: Race categories exclude persons of Hispanic origin. Detail may not sum to totals because of rounding and missing data. Totals include racial/ethnic groups not shown separately.

[1]Scale ranges from 0 to 500.

NOTE: Includes public and private schools. Includes students for whom accommodations were permitted. Excludes students unable to be tested (even with accommodations) due to limited proficiency in English or due to a disability. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

—Not available.
†Not applicable.
‡Reporting standards not met.
[1]Testing accommodations (e.g., extended time, small group testing) for children with disabilities and limited-English-proficient students were not permitted on the 1996 science assessment.
[2]The percentile represents a specific point on the percentage distribution of all students ranked by their science score from low to high. For example, 10 percent of students scored at or below the 10th percentile score, while 90 percent of students scored above it.
[3]*Basic* denotes partial mastery of the knowledge and skills that are fundamental for proficient work.
[4]*Proficient* represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.
[5]*Advanced* signifies superior performance.
NOTE: The NAEP science scale ranges from 0 to 300. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

—Not available.
†Not applicable.
‡Reporting standards not met.
[1]Accommodations were not permitted for this assessment.
[2]Significantly different from 2005 when only one jurisdiction or the nation is being examined.
[3]Did not satisfy one or more of the guidelines for school participation in 1996. Data are subject to appreciable nonresponse bias.
[4]Did not satisfy one or more of the guidelines for school participation in 2000. Data are subject to appreciable nonresponse bias.
[5]Before 2005, Department of Defense domestic and overseas schools were separate jurisdictions in NAEP. Data for 1996 and 2000 were recalculated for comparability.

NOTE: Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or due to a disability (if sample not tested with accommodations or if the accommodations provided in 2000 and 2005 were not sufficient to enable the test to properly reflect the students' science proficiency). Scale ranges from 0 to 300. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses. Some data have been revised from previously published figures.

NOTE: Data are for seniors who took the SAT any time during their high school years through March of their senior year. If a student took a test more than once, the most recent score was used. The SAT was formerly known as the Scholastic Assessment Test and the Scholastic Aptitude Test. Possible scores on each part of the SAT range from 200 to 800. The critical reading section was formerly known as the verbal section. The writing section was introduced in March 2005.

[1]Data for 1966–67 to 1985–86 were converted to the recentered scale by using a formula applied to the original mean and standard deviation. For 1986–87 to 1994–95, individual student scores were converted to the recentered scale and then the mean was recomputed. For 1995–96 to 1998–99, nearly all students received scores on the recentered scale; any score on the original scale was converted to the recentered scale prior to recomputing the mean. From 1999–2000 on, all scores have been reported on the recentered scale.
[2]Writing data are based on students who took the SAT writing section, which was introduced in March 2005.

NOTE: Data for 1966–67 through 1970–71 are estimates derived from the test scores of all participants. Data for 1971–72 and later are for seniors who took the SAT any time during their high school years through March of their senior year. If a student took a test more than once, the most recent score was used. The SAT was formerly known as the Scholastic Assessment Test and the Scholastic Aptitude Test. Possible scores on each part of the SAT range from 200 to 800. The critical reading section was formerly known as the verbal section.

#Rounds to zero.
[1]Prior to 2006, the critical reading section was known as the verbal section.
[2]Writing data are based on students who took the SAT writing section, which was introduced in March 2005.
[3]Beginning in 2005–06, the College Board has reported third, fourth, and fifth quintiles as the bottom three quintiles instead of reporting them separately as in previous years.
[4]Data may not be comparable over time because of additions to the list of majors and changes in subspecialties within majors.
[5]Home economics was changed to Family and consumer sciences/human sciences as of 2006–07.

NOTE: Data are for seniors who took the SAT any time during their high school years through March of their senior year. If a student took a test more than once, the most recent score was used. The SAT was formerly known as the Scholastic Assessment Test and the Scholastic Aptitude Test. Possible scores on each part of the SAT range from 200 to 800. Detail may not sum to totals because of rounding and survey item nonresponse.

[1]Participation rate is based on the projection of high school graduates by the Western Interstate Commission for Higher Education (WICHE), and the number of seniors who took the SAT in each state.

[2]Writing data are based on students who took the SAT writing section, which was introduced in March 2005.

[3]Beginning with the spring SAT administration in 2006, all Maine high school juniors, including all students in their third year of high school, are required to take SAT tests in critical reading, writing, and mathematics.

NOTE: Data are for seniors who took the SAT any time during their high school years through March of their senior year. If a student took a test more than once, the most recent score was used. The SAT was formerly known as the Scholastic Assessment Test and the Scholastic Aptitude Test. Possible scores on each part of the SAT range from 200 to 800. The critical reading section was formerly known as the verbal section.

†Not applicable.
!Interpret data with caution.
‡Reporting standards not met.

NOTE: Includes children enrolled in kindergarten through grade 12. Excludes children whose programs have no classes with lettered grades. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Parent and Family Involvement in Education/ Civic Involvement Survey and Parent and Family Involvement in Education Survey of the National Household Education Surveys Program (PFI/CI-NHES:1996 and PFI-NHES:2003 and 2007). (This table was prepared August 2009.)

Table 149. Average number of Carnegie units earned by public high school graduates in various subject fields, by selected student characteristics: Selected years, 1982 through 2005

Graduation year and selected student characteristic	Total	English	History/ social studies	Mathematics			Science					Foreign languages	Arts	Career/ technical education[1]	Personal use[2]	Computer related[3]
				Total	Less than algebra	Algebra or higher	Total	General science	Biology	Chemistry	Physics

[1]Includes general labor market preparation, consumer and homemaking education, and occupational education in agriculture, business, marketing, health, occupational home economics, trade and industry, and technical courses.

[2]Includes general skills, personal health and physical education, religion, military sciences, special education, and other courses not included in other subject fields.

[3]Though shown separately here, computer-related courses are also included in the mathematics and career/technical categories.

[4]Includes students who complete at least 12 Carnegie units in academic courses, but less than 3 Carnegie units in any occupational education field.

[5]Includes students who complete at least 3 Carnegie units in an occupational education field, but less than 12 Carnegie units in academic courses.

[6]Includes students who complete at least 12 Carnegie units in academic courses and at least 3 Carnegie units in an occupational education field.

[7]Includes students who complete less than 12 Carnegie units in academic courses and less than 3 Carnegie units in an occupational education field.

NOTE: The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1-year course. Data differ slightly from figures appearing in other NCES reports because of differences in taxonomies and case exclusion criteria. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, High School and Beyond Longitudinal Study of 1980 Sophomores (HS&B-So:80/82), "High School Transcript Study"; and 1987, 1990, 1994, 1998, 2000, and 2005 High School Transcript Study (HSTS). (This table was prepared January 2007.)

Table 150. Average number of Carnegie units earned by public high school graduates in career/technical education courses, by selected student characteristics: Selected years, 1982 through 2005

Graduation year and selected student characteristic	Total		General labor market preparation		Consumer and homemaking education		Occupational education field

#Rounds to zero.

[1]Includes unclassified courses not shown separately.

[2]Includes students who complete at least 12 Carnegie units in academic courses, but less than 3 Carnegie units in any occupational education field.

[3]Includes students who complete at least 3 Carnegie units in an occupational education field, but less than 12 Carnegie units in academic courses.

[4]Includes students who complete at least 12 Carnegie units in academic courses and at least 3 Carnegie units in an occupational education field.

[5]Includes students who complete less than 12 Carnegie units in academic courses and less than 3 Carnegie units in an occupational education field.

NOTE: The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1-year course. Data differ slightly from figures appearing in other NCES reports because of differences in taxonomies and case exclusion criteria. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

†Not applicable.

[1]These data only report the percentage of students who earned the indicated credit (0.5 = one semester; 1.0 = one academic year) in each course while in high school and do not count those students who took these courses prior to entering high school.

[2]Excludes pre-algebra.

[3]Includes algebra/trigonometry and algebra/geometry.

NOTE: The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1-year course. Data differ slightly from figures appearing in other NCES reports because of differences in taxonomies and case exclusion criteria. Some data have been revised from previously published figures. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

† Not applicable.

[1]Level 1 = no math; Level 2 = basic math/prealgebra; Level 3 = core secondary through algebra II; Level 4 = trigonometry, statistics, precalculus; and Level 5 = calculus.

[2]Level 1 = no science; Level 2 = primary physical science; Level 3 = secondary physical science and basic biology; Level 4 = general biology; Level 5 = chemistry I or physics I; Level 6 = chemistry I and physics I; Level 7 = chemistry II or physics II or advanced biology; Level 8 = both Levels 6 and 7.

[3]Race categories exclude persons of Hispanic ethnicity.

[4]The first language students learned to speak when they were children.

[5]Transfer students were classified as "mixed" if their base-year school and their transfer school were in different categories (e.g., a Catholic school student who transferred to a public school or a student who transferred from an urban to a rural school).

[6]Region is defined by the U.S. Census Bureau based on the state in which the school is located.

NOTE: Highest mathematics and science courses taken are based on a taxonomy of course types for which the student received a nonzero credit while in high school. Detail may not sum to totals because of rounding. The academic year extended from September 1, 2003, to August 31, 2004. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Academic Pathways, Preparation, and Performance: A Descriptive Overview of the Transcripts From the High School Graduating Class of 2003–04*, Education Longitudinal Study of 2002 (ELS:2002), "High School Transcript Study." (This table was prepared May 2007.)

Table 153. Percentage of public and private high school graduates earning minimum credits in selected combinations of academic courses, by sex and race/ethnicity: Selected years, 1982 through 2005

Year of graduation and course combination taken[1]	All students		Sex				Race/ethnicity									
			Male		Female		White		Black		Hispanic		Asian/Pacific Islander		American Indian/Alaska Native		Other

†Not applicable.
#Rounds to zero.
!Interpret data with caution.
‡Reporting standards not met.
[1]Enrollments may include duplicated counts of students in each type of course, since schools were instructed to count a student enrolled in multiple courses of a particular type for each course in which he or she was enrolled.
[2]Excludes schools not reporting minority enrollment.

NOTE: Data were collected during the 2002–03 12-month school year. Dual credit courses are those in which high school students can earn both high school and postsecondary credits for the same course. Percentages are based on unrounded numbers. Detail may not sum to totals because of rounding or missing data. Standard errors appear in parentheses.

[1]Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income. The "low" SES group is the lowest quartile; the "middle" SES group is the middle two quartiles; and the "high" SES group is the upper quartile.

[2]Question does not specify where computer is used.

NOTE: Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

[1]Interscholastic refers to competition between teams from different schools. Intramural refers to competition between teams or students within the same school. Data on these categories are available only for 2004.
[2]These data were not collected in 2004.
[3]Composite test performance quartile on mathematics, reading, science, and social studies in 1990 (for 1994 seniors) and composite test performance quartile on mathematics, reading, and science in 2002 (for 2004 seniors).
[4]Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income.
NOTE: Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

— Not available.
†Not applicable.
‡Reporting standards not met.
!Interpret data with caution.
[1]Refers to one or more parent or other household adult. Only includes students who had homework outside of school.

NOTE: Includes children enrolled in kindergarten through grade 12 and ungraded students. Data based on responses of the parent most knowledgeable about the student's education. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses. Totals include data for other racial/ethnic groups not separately shown.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Parent and Family Involvement in Education Survey of the National Household Education Surveys Program (PFI-NHES:2003 and 2007). (This table was prepared June 2008.)

Table 158. Tenth-graders' attendance patterns, by selected student and school characteristics: 1990 and 2002

[1]Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income. The "low" SES group is the lowest quarter; the "middle" SES group is the middle two quarters; and the "high" SES group is the upper quarter.

NOTE: Race categories exclude persons of Hispanic ethnicity. Data for 2002 for persons reporting two or more races are not shown separately, but are included in totals. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

!Interpret data with caution.
‡Reporting standards not met.
[1]Violent incidents include serious violent incidents (i.e., rape or attempted rape, sexual battery other than rape, physical attack or fight with a weapon, threat of physical attack with a weapon, and robbery with or without a weapon) plus physical attack or fight without a weapon and threat of physical attack without a weapon.
[2]Serious violent incidents include rape or attempted rape, sexual battery other than rape, physical attack or fight with a weapon, threat of physical attack with a weapon, and robbery with or without a weapon.
[3]Rape was defined for respondents as "forced sexual intercourse (vaginal, anal, or oral penetration). This includes penetration from a foreign object."
[4]Sexual battery was defined for respondents as an "incident that includes threatened rape, fondling, indecent liberties, child molestation, or sodomy."
[5]Physical attack or fight was defined for respondents as an "actual and intentional touching or striking of another person against his or her will, or the intentional causing of bodily harm to an individual."
[6]Weapon was defined for respondents as "any instrument or object used with the intent to threaten, injure, or kill. Includes look-alikes if they are used to threaten others."
[7]Robbery was defined for respondents as "the taking or attempting to take anything of value that is owned by another person or organization, under confrontational circumstances by force or threat of force or violence and/or by putting the victim in fear. A key difference between robbery and theft/larceny is that robbery involves a threat or battery."
[8]Theft/larceny (taking things over $10 without personal confrontation) was defined for respondents as "the unlawful taking of another person's property without personal confrontation, threat, violence, or bodily harm. Included are pocket picking, stealing purse or backpack (if left unattended or no force was used to take it from owner), theft from a building, theft from a motor vehicle or motor vehicle parts or accessories, theft of bicycles, theft from vending machines, and all other types of thefts."
[9]Other incidents include possession of a firearm or explosive device; possession of a knife or sharp object; distribution, possession, or use of illegal drugs or alcohol; and vandalism.
[10]Firearm/explosive device was defined as "any weapon that is designed to (or may readily be converted to) expel a projectile by the action of an explosive. This includes guns, bombs, grenades, mines, rockets, missiles, pipe bombs, or similar devices designed to explode and capable of causing bodily harm or property damage."
[11]Vandalism was defined for respondents as "the willful damage or destruction of school property including bombing, arson, graffiti, and other acts that cause property damage. Includes damage caused by computer hacking."
NOTE: Either the school principal or the person most knowledgeable about discipline issues at school completed the questionnaire. If the respondent did not provide a value for the total number of specified incidents at the school, the value was imputed to equal the number of specified incidents reported to police. Includes incidents happening in school buildings, on school grounds, on school buses, and at places that are holding school-sponsored events or activities. Covers times during normal school hours or when school activities/events were in session. Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. All public schools also includes schools with other combinations of grades (including K–12 schools), which are not shown separately. The table excludes schools with a high grade of kindergarten or lower and nonregular schools such as special education, vocational, alternative/other, and ungraded schools. Detail may not sum to totals because of rounding.

†Not applicable.
#Rounds to zero.
!Interpret data with caution.
[1]Access to buildings is controlled during school hours (e.g., by locked or monitored doors).
[2]Access to grounds is controlled during school hours (e.g., by locked or monitored gates).
[3]All students must pass through a metal detector each day.
[4]All or most students are required to stay on school grounds during lunch.
[5]Elementary schools have grade 6 or below, with no grade higher than 8; secondary schools have no grade lower than 7; and combined schools have grades lower than 7 and higher than 8.
NOTE: Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

†Not applicable.
#Rounds to zero.
!Interpret data with caution.
[1]A student is counted only once, even if suspended more than once during the same school year.
[2]Data are based on universe counts of schools and school districts; therefore, these figures do not have standard errors.

NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

—Not available.
†Not applicable.
‡Reporting standards not met.
[1]Includes other illegal drug use not shown separately.
NOTE: Marijuana includes hashish usage for 1996 and later years. Data for 1999 and later years were gathered using Computer Assisted Interviewing (CAI) and may not be directly comparable to previous years. Because of survey improvements in 2002, the 2002 data constitute a new baseline for tracking trends. Valid trend comparisons can be made for 1982 through 1998, 1999 through 2001, and 2002 through 2007. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

†Not applicable.
[1]Survey question changed in 1993; later data are not comparable to figures for earlier years.
[2]Other illicit drugs include any use of LSD or other hallucinogens, crack or other cocaine, or heroin, or any use of other narcotics, amphetamines, barbiturates, or tranquilizers not under a doctor's orders.
NOTE: Standard errors appear in parentheses. Standard errors were calculated from formulas to perform trend analysis over an interval greater than 1 year (for example, a comparison between 1975 and 1990). A revised questionnaire was used in 1982 and later years to reduce the inappropriate reporting of nonprescription stimulants. This slightly reduced the positive responses for some types of drug abuse.

X Denotes that the state has a policy. A blank denotes that the state does not have a policy.

[1]Most states have a provision whereby education is provided up to a certain age or completion of secondary school, whichever comes first.

[2]Child may be exempted from compulsory attendance if he/she meets state requirements for early withdrawal with or without meeting conditions for a diploma or equivalency.

[3]State requires districts with full-day programs to offer half-day programs.

[4]Districts may apply for exemptions from the requirement.

[5]Parent/guardian may delay child's entry until a later age per state law/regulation.

[6]Under 21 or until child graduates from high school.

[7]Full-day requirement becomes effective upon each district's confirming vote and upon specific funding appropriation by the General Assembly.

[8]Attendance is compulsory until age 18 for Manatee County students, unless they earn a high school diploma prior to reaching their 18th birthday.

[9]Some districts operate on a multi-track system; the schools are open year-round, but different cohorts start and end at different times.

[10]To be determined by rules and regulations adopted by the state board.

[11]Must be age 5 before October 1, and not age 20 before start of school year.

[12]Policies about year-round schools are decided locally.

[13]State requires a "program," not necessarily a traditional kindergarten program.

[14]State did not participate in the 2008 online survey. Data shown are from 2006.

[15]Compulsory attendance age is 18 effective July 1, 2009.

[16]Abbott districts only (31). These are districts covered by New Jersey Supreme Court rulings requiring the state to implement comprehensive programs and reforms to improve the education of students in the poorest schools.

[17]School-age unless otherwise provided by law.

[18]New York City and Buffalo require school attendance until age 17 unless employed; Syracuse requires kindergarten attendance at age 5.

[19]Must not be age 21 by September 1.

[20]A child may skip kindergarten at the parent's request and if the child demonstrates that he or she possesses the social, emotional, and cognitive skills for first grade.

[21]Children from birth through age 2 are eligible for additional services. Eligibility for special education services ceases upon completion of a secondary education program; no age limit.

[22]Beginning in 2011–12, with the option for districts to transfer intradistrict, interdistrict, or to a licensed child care provider.

[23]Compulsory attendance until age 18 is effective July 1, 2009; compulsory attendance beginning at age 5 is effective July 1, 2010.

[24]Student may complete school year if 21st birthday occurs while attending school.

[25]Districts are required to provide full-day kindergarten for low-income students.

NOTE: The Education of the Handicapped Act (EHA) Amendments of 1986 make it mandatory for all states receiving EHA funds to serve all 3- to 18-year-old disabled children.

†Not applicable.
X Denotes that the state has a policy. A blank denotes that the state does not have a policy.
[1]Includes time for staff development.
[2]1994 data.
[3]Or an equivalent number of minutes of instruction per year for districts on an alternate schedule.
[4]Does not include time for staff development.
[5]No statewide policy; varies by district.
[6]1996 data.
[7]Instructional time for graduating seniors may be reduced.
[8]1998 data.
[9]Instructional hours shown apply to schools with grades 1 through 5, 6, 7, or 8.
[10]Instructional hours shown apply to schools with any combination of grades within the given range.
[11]Middle schools (any combination of grades 4 through 8) are required to have the same hours as secondary schools (grades 9 through 12).
[12]Teachers may use 33 hours of the full-day kindergarten program and 22 hours of the grades 1 through 5 programs for home visits or parent-teacher conferences.
[13]Does not include time for staff development and parent-teacher conferences.
[14]Kindergarten instructional time is effective July 1, 2010.
[15]The Board of Education sets the minimum number of hours in the school term for grades 1 through 3.
NOTE: Minimum number of instructional days refers to the actual number of days that pupils have contact with a teacher. Some states allow for different types of school calendars by setting instructional time in both days and hours, while others use only days or only hours. For states in which the number of days or hours varies by grade, the relevant grade(s) appear in parentheses.

†Not applicable.

[1]Exit exam subjects tested: E = English (including writing), M = Mathematics, S = Science, H = History/social studies, and T = Technology.

[2]Requirement takes effect for class of 2010 in Arkansas and class of 2012 in Oklahoma.

[3]Graduation requirements are determined locally.

[4]Florida offers three graduation programs: one 4-year, 24-credit program, and two 3-year, 18-credit programs. The 4-year program requires 4 credits of mathematics, and both 3-year programs require 3 credits of mathematics.

[5]Expressed in semester credits instead of Carnegie units.

[6]State did not participate in the 2008 online survey; data are from 2006.

[7]Expressed in credit hours instead of Carnegie units.

[8]Determined locally, but state encourages school boards to adopt this requirement.

NOTE: Local school districts frequently have other graduation requirements in addition to state requirements. The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1-year course.

X State has a test.
[1]Off-the-shelf/norm-referenced tests (NRTs) are commercially developed tests that have not been modified to reflect state content standards.
[2]Custom-developed criterion-referenced tests (CRTs) are explicitly designed to measure state content standards.
[3]Augmented or hybrid tests incorporate elements of both NRTs and CRTs. These tests include NRTs that have been augmented or modified to reflect state standards.
NOTE: ES = elementary school, MS = middle school, and HS = high school.

#Rounds to zero.
[1]Includes a relatively small amount from nongovernmental private sources (gifts and tuition and transportation fees from patrons). These sources accounted for 2.1 percent of total revenues in 2006–07.
[2]Revised from previously published figures.
NOTE: Beginning in 1980–81, revenues for state education agencies are excluded. Beginning in 1988–89, data reflect new survey collection procedures and may not be entirely comparable with figures for earlier years. With the exception of federal revenue per student, data are not adjusted for changes in the purchasing power of the dollar due to inflation. Detail may not sum to totals because of rounding.

—Not available.

[1]Prior to 1959–60, items included under "other school services" were listed under "auxiliary services," a more comprehensive classification that also included community services.

[2]Includes expenditures for summer schools, adult education, community colleges, and community services.

[3]Prior to 1969–70, excludes capital outlay by state and local school housing authorities.

[4]Plant operation also includes plant maintenance.

[5]Data not comparable to figures prior to 1989–90.

[6]Data have been revised from previously published figures.

NOTE: Beginning in 1959–60, includes Alaska and Hawaii. Beginning in 1989–90, state administration expenditures were excluded from both "total" and "current" expenditures. Beginning in 1989–90, extensive changes were made in the data collection procedures. Detail may not sum to totals because of rounding.

[1]Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.
[2]Excludes capital outlay for years through 1979–80, and 1989–90 to the latest year. From 1980–81 to 1988–89 total transportation figures include capital outlay.
[3]Estimate based on data appearing in January issues of *School Bus Fleet*.
[4]Estimate based on data reported by *School Transportation News*.
NOTE: Some data have been revised from previously published figures.

[1]Includes expenditures for adult education, community colleges, private school programs funded by local and state education agencies, and community services.
[2]Includes expenditures for property and for buildings and alterations completed by school district staff or contractors.
[3]Includes expenditures for operations funded by sales of products or services (e.g., school bookstore or computer time). Also includes small amounts for direct program support made by state education agencies for local school districts.
[4]Includes expenditures for health, attendance, and speech pathology services.
[5]Includes expenditures for curriculum development, staff training, libraries, and media and computer centers.
NOTE: Excludes expenditures for state education agencies. Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "National Public Education Financial Survey," 2006–07. (This table was prepared May 2009.)

[1]Includes expenditures for adult education, community colleges, private school programs funded by local and state education agencies, and community services.

[2]Includes expenditures for property and for buildings and alterations completed by school district staff or contractors.

[3]Includes expenditures for operations funded by sales of products or services (e.g., school bookstore or computer time). Also includes small amounts for direct program support made by state education agencies for local school districts.

[4]Includes expenditures for health, attendance, and speech pathology services.

[5]Includes expenditures for curriculum development, staff training, libraries, and media and computer centers.

NOTE: Excludes expenditures for state education agencies. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

—Not available.
†Not applicable.
[1]Data have been revised from previously published figures.
[2]Includes estimated data for subfunctions of food services and enterprise operations.
[3]Includes expenditures for guidance, health, attendance, and speech pathology services.
[4]Includes expenditures for curriculum development, staff training, libraries, and media and computer centers.
[5]Includes business support services concerned with paying, transporting, exchanging, and maintaining goods and services for local education agencies; central support services, including planning, research, evaluation, information, staff, and data processing services; and other support services.
[6]Includes expenditures for operations funded by sales of products or services (e.g., school bookstore or computer time). Includes very small amounts for direct program support made by state education agencies for local school districts.
[7]Includes expenditures for property, and for buildings and alterations completed by school district staff or contractors.
NOTE: Excludes expenditures for state education agencies. Data are not adjusted for changes in the purchasing power of the dollar due to inflation. Detail may not sum to totals because of rounding.

—Not available.
[1]Data for 1919–20 to 1953–54 are based on school-year enrollment.
[2]Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.
[3]Excludes "Other current expenditures," such as community services, private school programs, adult education, and other programs not allocable to expenditures per student at public schools.
[4]Estimated.
NOTE: Beginning in 1980–81, state administration expenditures are excluded from both "total" and "current" expenditures. Current expenditures include instruction, student support services, food services, and enterprise operations. Total expenditures include current expenditures, capital outlay, and interest on debt. Beginning in 1988–89, extensive changes were made in the data collection procedures. Some data have been revised from previously published figures.

—Not available.
[1]Constant dollars based on the Consumer Price Index (CPI), prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis. The CPI does not account for differences in inflation rates from state to state.
NOTE: Expenditures for state administration are excluded in all years except 1969–70 and 1979–80. Beginning in 1989–90, survey was expanded and coverage of state expenditures for public school districts was improved. Some data have been revised from previously published figures.
SOURCE: U.S. Department of Education, National Center for Education Statistics, *Statistics of State School Systems*, 1969–70; *Revenues and Expenditures for Public Elementary and Secondary Schools*, 1979–80; and Common Core of Data (CCD), "National Public Education Financial Survey," 1989–90 through 2006–07. (This table was prepared May 2009.)

—Not available.
[1]Constant dollars based on the Consumer Price Index (CPI), prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis. The CPI does not account for differences in inflation rates from state to state.
[2]Estimated by the National Center for Education Statistics.
NOTE: State administration expenditures are excluded in all years except 1959–60, 1969–70, and 1979–80. Beginning in 1989–90, extensive changes were made in the data collection procedures. There are discrepancies in average daily attendance reporting practices from state to state. Some data have been revised from previously published figures.

(This table was prepared May 2009.)

CHAPTER 3
Postsecondary Education

Postsecondary education includes an array of diverse educational experiences offered by American colleges and universities and technical and vocational institutions. For example, a community college may offer vocational training or the first 2 years of training at the college level. A university typically offers a full undergraduate course of study leading to a bachelor's degree, as well as first-professional and graduate programs leading to advanced degrees. Vocational and technical institutions offer training programs that are designed to prepare students for specific careers. Community groups, religious organizations, libraries, and businesses provide other types of educational opportunities for adults.

This chapter provides an overview of the latest statistics on postsecondary education, which includes academic, career and technical, and continuing professional education programs after high school. However, to maintain comparability over time, most of the data in the *Digest* are for degree-granting institutions, which are defined as postsecondary institutions that grant an associate's or higher degree and whose students are eligible to participate in the Title IV federal financial aid programs.[1] Degree-granting institutions include almost all 2- and 4-year colleges and universities; they exclude institutions offering only career and technical programs of less than 2 years' duration and continuing education programs. The degree-granting institution classification is very similar to the higher education institution classification that the National Center for Education Statistics (NCES) used prior to 1996–97.[2] This chapter highlights historical data that enable the reader to observe long-range trends in college education in America.

Other chapters provide related information on postsecondary education. Data on price indexes and on the number of degrees held by the general population are shown in chapter 1. Chapter 4 contains tabulations on federal funding for postsecondary education. Information on employment outcomes for college graduates is shown in chapter 5. Chapter 7 contains data on college libraries and use of computers by young adults. Further information on survey methodologies is presented in Appendix A: Guide to Sources and in the publications cited in the table source notes.

[1] Title IV programs, which are administered by the U.S. Department of Education, provide financial aid to postsecondary students.

[2] Included among degree-granting institutions are some institutions (primarily 2-year colleges) that were not previously designated as higher education institutions. Excluded from degree-granting institutions are a few institutions that were previously designated as higher education institutions even though they did not award an associate's or higher degree. Institutions of higher education were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education. Institutions of higher education offered courses that led to an associate's or higher degree, or were accepted for credit towards a degree.

Enrollment

Enrollment in degree-granting institutions increased by 11 percent between 1988 and 1998 (table 189 and figure 11). Between 1998 and 2008, enrollment increased at a faster rate (32 percent), from 14.5 million to 19.1 million. Much of the growth between 1998 and 2008 was in full-time enrollment; the number of full-time students rose 37 percent, while the number of part-time students rose 24 percent. During the same time period, the number of females rose 34 percent, while the number of males rose 29 percent. Enrollment increases can be affected both by population growth and by rising rates of enrollment. Between 1998 and 2008, the number of 18- to 24-year-olds increased from 26.1 million to 29.8 million, an increase of 14 percent (table 15), and the percentage of 18- to 24-year-olds enrolled in college rose from 37 percent in 1998 to 40 percent in 2008 (table 204). In addition to enrollment in accredited 2-year colleges, 4-year colleges, and universities, about 423,000 students attended non-degree-granting, Title IV eligible, postsecondary institutions in fall 2007 (table 187).

The number of young students has been growing more rapidly than the number of older students, but this pattern is expected to shift (table 191 and figure 13). Between 1995 and 2007, the enrollment of students under age 25 increased by 38 percent. Enrollment of people 25 and over rose 14 percent during the same period. From 2007 to 2018, NCES projects a rise of 9 percent in enrollments of people under 25, and a rise of 20 percent in enrollments of people 25 and over.

Enrollment trends have differed at the undergraduate and postbaccalaureate levels (which include graduate and first-professional programs). Undergraduate enrollment generally increased during the 1970s, but dipped from 10.8 million to 10.6 million between 1983 and 1985 (table 205). From 1985 to 1992, undergraduate enrollment increased each year, rising 18 percent before stabilizing between 1992 and 1998. Undergraduate enrollment rose 32 percent between 1998 and 2008. Postbaccalaureate enrollment had been steady at about 1.6 million in the late 1970s and early 1980s, but rose about 66 percent between 1985 and 2008 (table 206).

Since 1988, the number of females in postbaccalaureate programs has exceeded the number of males (table 206). Between 1998 and 2008, the number of male full-time postbaccalaureate students increased by 30 percent, compared with a 61 percent increase in the number of females. Among part-time postbaccalaureate students, the number of males increased by 11 percent and the number of females increased by 24 percent.

The percentage of American college students who are Hispanic, Asian/Pacific Islander, and Black has been increasing (table 226). Much of the change in the racial/ethnic distribution of students from 1976 to 2008 can be attributed to rising numbers of students in these racial/ethnic groups. During that time period, the percentage of Hispanic students rose from 3 percent to 12 percent, the percentage of Asian/Pacific Islander students rose from 2 percent to 7 percent, and the percentage of Black students rose from 9 percent to 14 percent. Nonresident aliens, for whom race/ethnicity is not reported, made up 3 percent of the total enrollment in 2008.

Despite the sizable numbers of small degree-granting colleges, most students attend larger colleges and universities. In fall 2007, some 41 percent of institutions had fewer than 1,000 students; however, these campuses enrolled 4 percent of all college students (table 234). While 12 percent of the campuses enrolled 10,000 or more students, they accounted for 56 percent of total college enrollment.

In 2007, the five postsecondary institutions with the highest enrollment were University of Phoenix Online Campus, with 224,880 students; Miami-Dade College, with 54,094 students; Ohio State University, with 52,568 students; University of Florida, with 51,725 students; and Arizona State University at the Tempe Campus, with 51,481 students (table 235).

Faculty, Staff, and Salaries

Approximately 3.6 million people were employed in colleges and universities in fall 2007, including 2.6 million professional and 0.9 million nonprofessional staff (table 245). In fall 2007, there were 1.4 million faculty members in degree-granting institutions, including 0.7 million full-time and 0.7 million part-time faculty. The proportion of executive, administrative, and managerial staff was 6 percent in 2007, compared to 5 percent in 1976 (table 244). The proportion of other non-teaching professional staff rose from 10 percent in 1976 to 20 percent in 2007, while the proportion of nonprofessional staff (including technical and paraprofessional, clerical and secretarial, skilled crafts, and service and maintenance staff) declined from 42 percent to 26 percent. The full-time-equivalent (FTE) student/FTE staff ratio at colleges and universities was lower in 2007 (5.0) than in 1976 (5.4). The FTE student/FTE faculty ratio declined from 16.6 in 1976 to 14.9 in 2007.

Colleges and universities differ in their practices of employing part-time and full-time staff. In fall 2007, some 48 percent of the employees at public 2-year colleges were employed full time, compared with 68 percent at public 4-year colleges and universities, 67 percent at private 4-year colleges and universities, and 66 percent at private 2-year colleges (table 245). A higher percentage of the faculty at public 4-year colleges and universities were employed full time (68 percent) than at private 4-year colleges and universities (48 percent), private 2-year colleges (46 percent), or public 2-year colleges (31 percent). In general, the number of full-time staff has been growing at a slower rate than the number of part-time staff (table 243). Between 1997 and 2007, the number of full-time staff increased by 25 percent, compared to an increase of 39 percent in the number of part-time staff. Most of the increase in the part-time staff was due to the increase in the number of part-time faculty (59 percent) and graduate assistants (48 percent) during this time period.

In fall 2007, some 7 percent of college and university faculty were Black (based on a faculty count that excludes persons whose race/ethnicity was unknown), 6 percent were Asian/Pacific Islander, 4 percent were Hispanic, and 1 percent were American Indian/Alaska Native (table 246). About 80 percent of all faculty were White; 43 percent were White males and 36 percent were White females. Staff who were Black, Hispanic, Asian/Pacific Islander or American Indian/Alaska Native made up about 18 percent of executive, administrative, and managerial staff in 2007 and about 33 percent of nonprofessional staff. The proportion of total staff made up of Blacks, Hispanics, Asians/Pacific Islanders, and American Indians/Alaska Natives was similar at public 4-year colleges (23 percent), private 4-year colleges (22 percent), and public 2-year colleges (22 percent), but the proportion at private 2-year colleges (27 percent) was slightly higher.

On average, full-time instructional faculty and staff spent 58 percent of their time teaching in 2003 (table 251). Research and scholarship accounted for 20 percent of their time, and 22 percent was spent on other activities (administration, professional growth, etc.).

Faculty salaries generally lost purchasing power in the period from 1970–71 to 1980–81, during which average salaries for faculty on 9-month contracts declined by 16 percent after adjustment for inflation (table 257). During the 1980s, average salaries rose and recouped most of the losses. Between 1998–99 and 2008–09, there was a further increase in average faculty salaries, resulting in an average salary in 2008–09 that was about 7 percent higher than the average salary in 1970–71, after adjustment for inflation. The average salary in current dollars for males in 2008–09 ($79,706) was higher than the average salary for females ($65,638). Between 1998–99 and 2008–09, the average salary for males increased by 5 percent and the average salary for females increased by 6 percent, after adjustment for inflation.

The percentage of faculty with tenure has declined in recent years. About 49 percent of full-time instructional faculty had tenure in 2007–08, compared with 56 percent in 1993–94 (table 264). A difference was observed between males and females in the percentage of faculty with tenure. Fifty-five percent of males had tenure in 2007–08, compared with 40 percent of females. About 51 percent of the instructional faculty at public and private for-profit institutions had tenure, compared with 45 percent of faculty at private not-for-profit institutions.

Degrees

During the 2008–09 academic year, 4,409 accredited institutions offered degrees at the associate's degree level or above (table 266). These included 1,676 public institutions, 1,629 private not-for-profit institutions, and 1,104 private for-profit institutions. Of the 4,409 institutions, 2,719 awarded degrees at the bachelor's or higher level, and 1,690 offered associate's degrees as their highest award. Institutions awarding various degrees in 2007–08 numbered 2,768 for associate's degrees, 2,301 for bachelor's degrees, 1,736 for master's degrees, and 693 for doctor's degrees (table 278).

Growing numbers of people are completing college degrees. Between 1997–98 and 2007–08, the number of associate's, bachelor's, master's, first-professional, and doctor's degrees that were conferred rose (table 268). During this period, associate's degrees increased by 34 percent, bachelor's degrees increased by 32 percent, master's degrees increased by 45 percent, first-professional degrees increased by 16 percent, and doctor's degrees increased by 38 percent. Since the mid-1980s, more females than males have earned associate's, bachelor's, and master's degrees. In 2006–07 and 2007–08, the number of females earning doctor's degrees exceeded the number of males. Also, the number of females receiving degrees has increased at a faster rate than the number of males. Between 1997–98 and 2007–08, the number of bachelor's degrees awarded to males increased by 28 percent, while the number awarded to females increased by 35 percent. The number of males earning doctor's degrees rose 17 percent between 1997–98 and 2007–08, while the number of females earning doctor's degrees rose 68 percent. In addition to degrees awarded at the associate's and higher levels, 750,000 certificates were awarded by postsecondary institutions participating in federal Title IV financial aid programs (table 281).

Of the 1,563,000 bachelor's degrees conferred in 2007–08, the greatest numbers of degrees were conferred in the fields of business (335,000); social sciences and history (167,000); health sciences (111,000); and education (103,000) (table 271). At the master's degree level, the greatest numbers of degrees were conferred in the fields of education (176,000) and business (156,000) (table 272). At the doctor's degree level, the greatest number of degrees were conferred in the fields of health professions and related clinical sciences (9,900); education (8,500); engineering (8,100); biological and biomedical sciences (6,900); psychology (5,300); and physical sciences (4,800) (table 273).

In recent years, the numbers of bachelor's degrees conferred have followed patterns that differed significantly by field of study. While the number of degrees conferred increased by 32 percent overall between 1997–98 and 2007–08, there was substantial variation among the different fields of study, as well as shifts in the patterns of change during this time period (table 271). The number of bachelor's degrees conferred in the combined fields of engineering and engineering technologies was 4 percent higher in 2002–03 than in 1997–98 and rose 8 percent between 2002–03 and 2007–08 (table 271 and figure 15). The number of engineering and engineering technologies degrees conferred in 2007–08 was about 12 percent higher than the number conferred in 1997–98. The number of degrees conferred in the health professions declined by 18 percent between 1997–98 and 2002–03, but then rose 56 percent between 2002–03 and 2007–08. Similarly, the number of degrees conferred in biological sciences decreased by 8 percent between 1997–98 and 2002–03, but then increased by 30 percent between 2002–03 and 2007–08; and the number conferred in the physical sciences declined by 7 percent between 1997–98 and 2002–03 but increased by 22 percent between 2002–03 and 2007–08. Some technical fields experienced a contrasting pattern. After an increase of 106 percent between 1997–98 and 2002–03, the number of degrees conferred in computer and information sciences decreased by 33 percent between 2002–03 and 2007–08. Other fields with sizable numbers of degrees (over 5,000) that showed increases of over 30 percent between 2002–03 and 2007–08 included security and protective services (54 percent) and parks, recreation, and leisure studies (40 percent).

Approximately 57 percent of first-time students seeking a bachelor's degree or its equivalent and attending a 4-year institution full time in 2001 completed a bachelor's degree or its equivalent at that institution within 6 years (table 331). This graduation rate is the percentage of students first enrolled at an institution in the 2001–02 academic year who completed a degree at that institution within the specified time to degree attainment. Graduation rates were higher at private not-for-profit institutions than at public or private for-profit institutions. The 6-year graduation rate for the 2001 cohort at private not-for-profit institutions was 64 percent, compared with 55 percent at public institutions and 24 percent at private for-profit institutions. Graduation rates also varied by race/ethnicity. At 4-year institutions overall, the 6-year graduation rate for Asians/Pacific Islanders in the 2001 cohort was 67 percent, compared with 60 percent for Whites, 48 percent for Hispanics, 42 percent for Blacks, and 39 percent for American Indians/Alaska Natives.

Finances and Financial Aid

For the 2008–09 academic year, annual prices for undergraduate tuition, room, and board were estimated to be $12,283 at public institutions and $31,233 at private institutions (table 334). Between 1998–99 and 2008–09, prices for undergraduate tuition, room, and board at public institutions rose 32 percent, and prices at private institutions rose 24 percent, after adjustment for inflation.

In 2007–08, about 80 percent of full-time undergraduate students received financial aid (grants, loans, work-study, or aid of multiple types) (table 338). About 63 percent of full-time undergraduates received federal financial aid in 2007–08, and 63 percent received aid from nonfederal sources. (Some students receive aid from both federal and nonfederal sources.) Section 484(r) of the Higher Education Act of 1965, as amended, suspends a student's eligibility for Title IV federal financial aid if the student is convicted of

certain drug-related offenses that were committed while the student was receiving Title IV aid. The *Digest* is congressionally mandated to report on student loss of eligibility under this provision. Less than 0.1 percent of postsecondary students had their eligibility to receive aid suspended for 2008–09 (table C).

Table C. Postsecondary students denied access to Title IV financial aid because eligibility was suspended due to a drug-related conviction: 2008–09

Suspension status	Number of applications	Percentage distribution
Total	**16,412,471**	**100.0**
No suspension of eligibility	16,405,757	99.96
Suspension of eligibility		
For part of award year (suspension ends during year)	946	0.01
For full award year		
Due to conviction	2,853	0.02
Due to failure to report conviction status on aid application form	2,915	0.02

NOTE: It is not possible to determine whether a student who lost eligibility due to a drug conviction otherwise would have received Title IV aid, since there are other reasons why an applicant may not receive aid. Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Education, Federal Student Aid, Free Application for Federal Student Aid (FAFSA), unpublished data.

In 2006–07, average total expenditures per full-time-equivalent (FTE) student at public degree-granting colleges were $25,130 (table 362). This total reflects an increase of about 3 percent between 2003–04 and 2006–07, after adjustment for inflation. In 2006–07, public 4-year colleges had average total expenditures per FTE student of $33,670, compared with $11,609 at public 2-year colleges. At private not-for-profit colleges, total expenditures per FTE student rose 17 percent between 1996–97 and 2006–07, after adjustment for inflation (table 364). In 2006–07, total expenditures per FTE student at private not-for-profit colleges were $42,060; they averaged $42,256 at 4-year colleges and $19,498 at 2-year colleges. The expenditures per FTE student at private for-profit institutions were $12,880 in 2006–07, which was about 7 percent higher than in 1998–99, after adjustment for inflation (table 366). The difference between average expenditures per FTE student at private for-profit 4-year colleges ($12,551) and private for-profit 2-year colleges ($13,848) was relatively small compared to the differences between 2-year and 4-year public and private not-for-profit colleges.

As of June 30, 2007, the market value of the endowment funds of colleges and universities was $410 billion, with the 120 colleges with the largest endowments accounting for $310 billion of that amount (table 361). The market value of endowment funds of U.S. colleges and universities increased 22 percent between 2006 and 2007. The five colleges with the largest endowments in 2007 were Harvard University ($35 billion), Yale University ($22 billion), Stanford University ($17 billion), Princeton University ($16 billion), and the University of Texas System ($14 billion). These values do not reflect changes that have occured since 2007 in response to economic conditions.

—Not available.
[1]Prior to 1979–80, excludes branch campuses.
[2]Total number of different individuals (not reduced to full-time equivalent). Beginning in 1959–60, data are for the first term of the academic year.
[3]Estimated.
[4]Estimated number of senior instructional staff based on actual enrollment data for the designated year and enrollment/staff ratios for the prior staff survey. Excludes graduate assistants.
[5]Because of revised survey procedures, data may not be directly comparable with figures prior to 1989–90. Estimated number of senior instructional staff based on actual enrollment data for the designated year and enrollment/staff ratios for the prior staff survey. Excludes graduate assistants.
[6]Data for 1869–70 to 1939–40 are for resident degree-credit students who enrolled at any time during the academic year.
[7]From 1869–70 to 1959–60, first-professional degrees are included under bachelor's degrees.
[8]Figures for years prior to 1969–70 are not precisely comparable with later data.
[9]Includes unexpended plant funds.
[10]Book value. Includes other nonexpendable funds.

NOTE: Data through 1989–90 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Appendix A: Guide to Sources for details.) Detail may not sum to totals because of rounding.

—Not available.
[1]Degree-credit enrollment only.
[2]Includes part-time resident students and all extension students (students attending courses at sites separate from the primary reporting campus).
[3]Large increases are due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology.
[4]Because of imputation techniques, data are not consistent with figures for other years.
NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Appendix A: Guide to Sources for details.)

—Not available.
[1]Data for 2-year branch campuses of 4-year institutions are included with the 4-year institutions.
[2]Large increases are due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology.
[3]Because of imputation techniques, data are not consistent with figures for other years.
NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Appendix A: Guide to Sources for details.) Some data have been revised from previously published figures.
SOURCE: U.S. Department of Education, National Center for Education Statistics, *Opening Fall Enrollment in Higher Education*, 1965; Higher Education General Information Survey (HEGIS), "Fall Enrollment in Institutions of Higher Education" surveys, 1966 through 1985; and 1986 through 2008 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:86–99), and Spring 2001 through Spring 2009. (This table was prepared September 2009.)

Table 191. Total fall enrollment in degree-granting institutions, by sex, age, and attendance status: Selected years, 1970 through 2018

NOTE: Distributions by age are estimates based on samples of the civilian noninstitutional population from the U.S. Census Bureau's Current Population Survey. Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Appendix A: Guide to Sources for details.) Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1970 and 1980; 1990 through 2008 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:90–99), and Spring 2001 through Spring 2008; and *Projections of Education Statistics to 2018*. U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, selected years, 1970 through 2008. (This table was prepared September 2009.)

Table 192. Total fall enrollment in degree-granting institutions, by level of enrollment, sex, age, and attendance status of student: 2007

#Rounds to zero.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 2007 Integrated Postsecondary Education Data System (IPEDS), Spring 2007. (This table was prepared October 2008.)

Table 193. Total fall enrollment in degree-granting institutions, by control and type of institution, age, and attendance status of student: 2007

Age of student and attendance status	All institutions			Public institutions			Private (not-for-profit and for-profit) institutions			Private not-for-profit institutions only

[1]Large increase in private 2-year institutions in 1980 is due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology.
NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Appendix A: Guide to Sources for details.)
SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1970 through 1985; and 1990 through 2008 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:90–99), and Spring 2001 through Spring 2009. (This table was prepared September 2009.)

—Not available.
[1]Counts of institutions in this table may be lower than reported in other tables, because counts in this table include only institutions reporting separate enrollment data.
[2]Included under "Other public."
[3]Religious affiliation as reported by institution.
NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Appendix A: Guide to Sources for details.) Some data have been revised from previously published figures.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Institutions of Higher Education" and "Institutional Characteristics" surveys, 1980; and 1990 through 2008 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:90), "Institutional Characteristics Survey" (IPEDS-IC:90), and Spring 2001 through Spring 2009. (This table was prepared September 2009.)

Table 198. Total first-time freshmen fall enrollment in degree-granting institutions, by attendance status, sex of student, and type and control of institution: 1955 through 2008

Year	Total, all freshmen			Males			Females			4-year		2-year

—Not available.
[1]Excludes first-time freshmen in occupational programs not creditable towards a bachelor's degree.
[2]Data for 2-year branches of 4-year college systems are aggregated with the 4-year institutions.
[3]Large increases are due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology.
NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Appendix A: Guide to Sources for details.) Beginning in fall 2000, data are for first-time degree/certificate-seeking undergraduates. Alaska and Hawaii are included in all years.

[1]Individuals ages 16 to 24 who graduated from high school or completed a GED during the preceding 12 months.
[2]Enrollment in college as of October of each year for individuals ages 16 to 24 who completed high school during the preceding 12 months.
NOTE: Data are based on sample surveys of the civilian population. High school completion data in this table differ from figures appearing in other tables because of varying survey procedures and coverage. High school completers include GED recipients. Standard errors appear in parentheses. Detail may not sum to totals because of rounding.
SOURCE: American College Testing Program, unpublished tabulations, derived from statistics collected by the Census Bureau, 1960 through 1969. U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1970 through 2008. (This table was prepared August 2009.)

Table 201. Recent high school completers and their enrollment in college, by race/ethnicity: 1960 through 2008

[Numbers in thousands]

Year	Number of high school completers[1]								Enrolled in college[2]													
									Total				White				Black[3]				Hispanic[3]			
																					Percent			
	Total		White		Black[3]		Hispanic[3]		Number		Percent		Number		Percent		Number		Percent		Number		Annual		3-year moving average

—Not available.
†Not applicable.
[1]Individuals ages 16 to 24 who graduated from high school or completed a GED during the preceding 12 months.
[2]Enrollment in college as of October of each year for individuals ages 16 to 24 who completed high school during the preceding 12 months.
[3]Due to the small sample size, data are subject to relatively large sampling errors. A 3-year moving average is an arithmetic average of the year indicated, the year immediately preceding, and the year immediately following. Moving averages are used to produce more stable estimates.
[4]White and Black data exclude persons identifying themselves as two or more races.
NOTE: High school completion data in this table differ from figures appearing in other tables because of varying survey procedures and coverage. High school completers include GED recipients. Race categories exclude persons of Hispanic ethnicity. Total includes persons of other racial/ethnic groups not separately shown. Standard errors appear in parentheses.
SOURCE: American College Testing Program, unpublished tabulations, derived from statistics collected by the Census Bureau, 1960 through 1969. U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1970 through 2008. (This table was prepared August 2009.)

Table 202. Graduation rates of previous year's 12th-graders and college attendance rates of those who graduated, by selected high school characteristics: 1999–2000, 2003–04, and 2007–08

Selected high school characteristic	For 1998–99 school year		College attendance rate of 1998–99 graduates in 1999–2000			For 2002–03 school year		College attendance rate of 2002–03 graduates in 2003–04			For 2006–07 school year		College attendance rate of 2006–07 graduates in 2007–08 at 4-year institutions
	Number of high schools with 12th-graders	Graduation rate of 12th-graders[1]	Total	4-year institutions	2-year institutions	Number of high schools with 12th-graders	Graduation rate of 12th-graders[1]	Total	4-year institutions	2-year institutions	Number of high schools with 12th-graders	Graduation rate of 12th-graders[1]

—Not available.
†Not applicable.
‡Reporting standards not met.
[1]Includes only students who were enrolled in 12th grade in fall of the school year and graduated with a diploma by the end of the following summer.

NOTE: Data are based on a sample survey and may not be strictly comparable with data reported elsewhere. Includes all schools, including combined schools, with students enrolled in the 12th grade. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

[1]Total includes public high school graduates for 2005–06 and private high school graduates for 2004–05. Data on private high school graduates are not available for 2005–06.
[2]All of the new students reported by the institutions in that state; i.e., all in-migrants and "remaining" students. Also, includes students who are not residents of the United States.
[3]All U.S. resident students living in a particular state when admitted to an institution in any state. Students may be enrolled in any state.
[4]Students who attend institutions in their home state.
[5]U.S. total enrollment includes some students not identified by state.
[6]Projected data from NCES 2008-078, *Projections of Education Statistics to 2017*.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Detail may not sum to totals because of rounding.

—Not available.
†Not applicable.
[1]All students who enrolled in college are counted as high school completers, including students who enrolled in college but did not report high school completion.
[2]White and Black data include persons of Hispanic ethnicity.
[3]White and Black data exclude persons identifying themselves as two or more races.

NOTE: Data are based on sample surveys of the civilian noninstitutional population. Percentages based on 18- to 24-year-old high school completers for 1992 and later years use a slightly different definition of completion and may not be precisely comparable with figures for other years. Totals include other racial/ethnic groups not separately shown. Race categories exclude persons of Hispanic ethnicity except where otherwise noted. Standard errors appear in parentheses.
SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1967 through 2008. (This table was prepared August 2009.)

Table 205. Total undergraduate fall enrollment in degree-granting institutions, by attendance status, sex of student, and control of institution: 1967 through 2008

NOTE: Data include unclassified undergraduate students. Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Appendix A: Guide to Sources for details.) Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1967 through 1985; and 1986 through 2008 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:86–99), and Spring 2001 through Spring 2009. (This table was prepared September 2009.)

Table 206. Total postbaccalaureate fall enrollment in degree-granting institutions, by attendance status, sex of student, and control of institution: 1967 through 2008

NOTE: Data include first-professional and graduate-level students. Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Appendix A: Guide to Sources for details.)

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1967 through 1985; and 1986 through 2008 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:86–99), and Spring 2001 through Spring 2009. (This table was prepared September 2009.)

[1]Data for 2000 and later years reflect a substantial reduction in the number of Department of Defense institutions included in the IPEDS survey.

NOTE: Data through 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Appendix A: Guide to Sources for details.)

[1]Data for 2000 and later years reflect a substantial reduction in the number of Department of Defense institutions included in the IPEDS survey.

NOTE: Data through 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Appendix A: Guide to Sources for details.)

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1970 and 1980; and 1990 through 2007 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:90), and Spring 2001 through Spring 2008. (This table was prepared July 2009.)

Table 209. Total fall enrollment in private degree-granting institutions, by state or jurisdiction: Selected years, 1970 through 2007

†Not applicable.
NOTE: Data through 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Appendix A: Guide to Sources for details.)

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1970 and 1980; and 1990 through 2007 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:90), and Spring 2001 through Spring 2008. (This table was prepared July 2009.)

—Not available.
[1]Large increases are due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology.
[2]Because of imputation techniques, data are not consistent with figures for other years.
NOTE: Full-time-equivalent enrollment is the full-time enrollment, plus the full-time equivalent of the part-time students. Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Appendix A: Guide to Sources for details.)
SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1969 through 1985; and 1986 through 2008 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:86–99), and Spring 2001 through Spring 2009. (This table was prepared September 2009.)

†Not applicable.
[1]Data for 2000 and later years reflect substantial change in survey coverage.
NOTE: Full-time-equivalent enrollment is the full-time enrollment, plus the full-time equivalent of the part-time students. Data through 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Appendix A: Guide to Sources for details.)
SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" 1980 survey; and 1990 through 2007 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:90), and Spring 2001 through Spring 2008. (This table was prepared July 2009.)

Table 221. Total full-year enrollment in degree-granting institutions, by control and type of institution and state or jurisdiction: 2006–07 and 2007–08

State or jurisdiction	2006–07							2007–08

†Not applicable.
[1]Students residing in a particular state when admitted to an institution anywhere—either in their home state or another state.
[2]Includes students coming to U.S. colleges from foreign countries and other jurisdictions.
[3]Students whose residence is in the same state as the service academy.
[4]Institution unable to determine student's home state.

NOTE: Includes all first-time postsecondary students enrolled at reporting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs.

†Not applicable.
[1]Students residing in a particular state when admitted to an institution anywhere—either in their home state or another state.
[2]Includes students coming to U.S. colleges from foreign countries and other jurisdictions.
[3]Students whose residence is in the same state as the service academy.
[4]Institution unable to determine student's home state.

NOTE: Includes all first-time postsecondary students who graduated from high school in the previous 12 months and were enrolled at reporting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs.
SOURCE: U.S. Department of Education, National Center for Education Statistics, 2008 Integrated Postsecondary Data System (IPEDS), Spring 2009. (This table was prepared November 2009.)

Table 224. Residence and migration of all freshmen students in 4-year degree-granting institutions who graduated from high school in the previous 12 months, by state or jurisdiction: Fall 2008

State or jurisdiction	Total freshman enrollment in institutions located in the state	State residents enrolled in institutions		Ratio of in-state students		Migration of students		
		In any state[1]	In their home state	To freshman enrollment (col. 4/col. 2)	To residents enrolled in any state (col. 4/col. 3)	Out of state (col. 3 - col. 4)	Into state[2] (col. 2 - col. 4)	Net (col. 8 - col. 7)

#Rounds to zero.
[1]In 1999–2000 only, separate data were collected on foreign students studying in the United States on visas who left the United States to study abroad for a period of time.
[2]Asia excludes the Middle Eastern countries (Bahrain, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Oman, the Palestinian Authority, Qatar, Saudi Arabia, Syria, the United Arab Emirates, and Yemen).
[3]Cyprus and Turkey were classified as being in the Middle East prior to 2004–05, but in Europe for 2004–05 and later years. Data for years prior to 2004–05 have been revised for comparability.
[4]Mexico and Central America are included in Latin America, not in North America.
[5]Includes Antarctica from 2002–03 onward.
NOTE: Detail may not sum to totals because of rounding.

NOTE: Race categories exclude persons of Hispanic ethnicity. Because of underreporting and nonreporting of racial/ethnic data, some figures are slightly lower than corresponding data in other tables. Data through 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Appendix A: Guide to Sources for details.) Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1976 and 1980; and 1990 through 2008 Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:90), and Spring 2001 through Spring 2009. (This table was prepared September 2009.)

Table 227. Total fall enrollment in degree-granting institutions, by race/ethnicity of student and type and control of institution: Selected years, 1976 through 2008

Race/ethnicity of student and type and control of institution	Fall enrollment (in thousands)											Percentage distribution of students

NOTE: Race categories exclude persons of Hispanic ethnicity. Because of underreporting and nonreporting of racial/ethnic data, some figures are slightly lower than corresponding data in other tables. Data through 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Appendix A: Guide to Sources for details.) Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1976 and 1980; and 1990 through 2008 Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:90), and Spring 2001 through Spring 2009. (This table was prepared September 2009.)
